CABI is not like other publishers...

CABI has scientific research, publishing and international development at its core. We improve people's lives by solving problems in agriculture and the environment. Together with our members we address issues of global concern, such as food security and climate change. By generating and increasing access to scientific knowledge, and delivering change through development projects we work to improve crop yields, combat agricultural pests and diseases, protect biodiversity and safeguard the environment, which enables the world's poorest communities to feed themselves.

CABI is a not-for-profit organization. Our profits support rural development projects that go some way to helping the world's poorest people to grow more, lose less and improve their livelihoods.

To find out more about the development work we do visit www.cabi.org/projects

Key new titles for 2015

Domestic Animal Behaviour and Welfare, 5th Edition

Donald M. Broom, Cambridge University, UK and **Andrew F. Fraser**, formerly Memorial University of Newfoundland, Canada

Now in its fifth edition, this book includes new chapters detailing the welfare of sheep, goats and exotic pets, and welfare in relation to genetic selection and modification. It covers animal behaviour and welfare for companion animals, farm animals and farmed fish, reviewing development, socialization, locomotion, reproduction and more.

page 28

Improving Animal Welfare, 2nd Edition

Edited by **Temple Grandin**, Colorado State University, USA

By taking an entirely practical approach, this textbook aims to help those working with animals to apply methods for improving welfare, bridging the gap between scientific research and practical application. This book provides a guide to practical evaluation and auditing of welfare problems for farmed animals, emphasizing the importance of measuring conditions that compromise welfare such as lameness, or the use of electric goads. This second edition is fully updated with new literature, new, up-to-date coverage of pain management, and the addition of a new chapter on animal welfare in organic farming systems.

page 28

Vegetable Production and Practices

Gregory E. Welbaum, Virginia Tech University, USA

This major new textbook brings the science and practice of vegetable production up to date by addressing modern culture techniques and the recent challenges of consumer demand facing producers today. It introduces vegetable production from the perspective of producing high quality produce that satisfies the needs of the modern consumer.

CAB eBooks

For the librarian who wants to bring broad, authoritative knowledge from a leading scientific publisher to students and staff, CAB eBooks is an award-winning web-based multi-disciplinary eBook package, offering anytime/anywhere unlimited access to CABI books in applied life sciences and tourism under an innovative lease-purchase model.

Unlike aggregator services, CAB eBooks provides complete applied life science coverage (at a fraction of the cost of buying individually), with no restrictions to concurrent users or interlibrary loan.

Packages

CAB eBooks 2011–present

- Dynamic front file product that grows as newly-published material is added
- Currently over 150 books in this collection (over 2,800 chapters)

CAB eBooks 2008–2010

- 112 titles (over 1,800 chapters)
- available as a one-off purchase for perpetual ownership

CAB eBooks 2005–2007

- 159 titles (over 2,800 chapters)
- available as a one-off purchase for perpetual ownership

CAB eBooks 2000–2004

- 244 titles (over 4,000 chapters)
- available as a one-off purchase for perpetual ownership

CABI Choice Collections

For the librarian who wants titles tailored to their faculty and staff, CABI Choice Collections are precision tools for selecting exactly the right CABI book content for your needs.

Unlike eBook aggregators, the CABI Choice Collections don't place restrictions or limits on usage.

Choice Collections

Subject-based collections curated into specific and highly-specialized themes with zero overlap.

Choice Reference

CABI Reference works: leading encyclopedias and dictionaries available for site-wide access.

(Not included in subject Choice Collections)

Choice 100

Build a collection of 100 titles from our complete Choice Collections title list for a fixed sum

– you choose precisely what titles. Limitless combinations.

Your Choice

Choose any titles from the entire Choice Collections catalogue: no minimum or maximum number, select exactly the eBooks you need.

CABI end-user eBooks

Consumers can buy CABI eBooks for their own use from major retail stores Amazon, Google Play and eBooks.com

**An Introduction to Economics
Concepts for Students of Agriculture and
the Rural Sector
4th Edition**

Berkeley Hill, formerly University of London,
Imperial College, UK

Fully updated, this incorporates the impacts of the EU expansion, changes to financial support of agriculture, financial crises, economic recession and unemployment. The inclusion of chapter-focused exercises, essay questions and further reading make this textbook a valuable learning tool for students of agriculture, economics and related sectors.

October 2014 / PB / 240 pages / 9781780644752
£39.95 / €55.00 / \$75.00

www.cabi.org/bookshop/book/9781780644752

**Wheat Production and Utilization
Systems, Quality and the Environment,
2nd Edition**

Mike Gooding, University of Reading, UK and
W. Davies, Royal Agricultural College, UK

Global circumstances have changed; strengthening issues of environmental concerns, climate change, pressures on farming resources, food insecurity and grain market volatility. This new edition covers wheat quality requirements for world markets. A 'food and processing chain' approach will be adopted to relate the production system to the end-user.

July 2015 / HB / 200 pages / 9781780641119
£75.00 / €100.00 / \$145.00

July 2015 / PB / 200 pages / 9781780644134

**The Nature of Crops
How we came to eat the plants
we do**

John Warren, Aberystwyth University, UK

Our ancestors chose to cultivate some plant species and not others. Through years of association with humans, these wild plants have been changed so that the crops we

eat often hardly resemble their wild progenitors. Arranged into broad themes depicting the history of domestication, this book documents the history and biology of over 40 crops.

April 2015 / HB / 208 pages / 9871780645087
£45.00 / €60.00 / \$85.00

**International Trade and Food
Security
The Future of Indian Agriculture**

Edited by **Floor Brouwer**, LEI-Wageningen
UR, The Netherlands and **Pramod K. Joshi**,
IPPRI, South Asia

The dynamics in the agrifood sector are explored in the context of the overall economy, taking into account agricultural and trade policies and their impact on national and global markets. Effects for income distribution in rural and urban areas are presented, as well as the future potential for international trade. The book also includes recent work on supply and demand projections for food grains and high-valued agrifood commodities in India.

August 2015 / HB / 276 pages / 9781780642826
£75 / €100.00 / \$145.00

**Climate Change Challenges and
Opportunities at Farm-level
Experiences from Asia and Africa
CABI Climate Change Series**

Edited by **Naveen P. Singh**, ICRISAT,
India, **Cynthia Bantilan**, ICRISAT, India,
Kattarkandi Byjesh, ICRISAT, India and
Swamikannu Nedumaran, ICRISAT, India

This book emphasizes the role of farm-level adaptation as a key in developmental pathways that are challenged by climate risks in the semi-arid tropics of Asia and Africa. It throws light on key issues that arise in farm-level impacts, adaptation and vulnerability to climate change. Chapters identify constraints and opportunities that are translated into indicative intervention recommendations towards climate-resilient farm households in the semi-arid tropics of Asia and Africa. Furthermore, it also discusses the development of livelihood strategy for poor farmers in Asia and Africa.

August 2015 / HB / 300 pages / 9781780644639
£95 / €125.00 / \$180.00

www.cabi.org/bookshop/book/9781780644639

**Natural Products for Sustainable
Crop Disease Management**

Edited by **Zy G. Sangeetha**, Annamalai
University, India, **V. Kurucheve**, Annamalai
University, India and **J. Jayaraj**, The University
of The West Indies, Trinidad and Tobago

Alternative methods of disease control such as natural products and compounds derived from biological origins, provide an effective alternate to the use of chemical products or a means to minimize their use. It is imperative now to look for such sustainable crop disease management approaches, that include routine and alternative methods. This book is an effort in this direction, and deals with immediate concerns in the field of natural and alternative products for disease control, apart from using biocontrol organisms. This book presents up-to-date information on natural products and compounds derived from biological origins and thoroughly discusses their applicability, field use and prospects for adoption under different cropping conditions.

July 2015 / HB / 376 pages / 9781780643236
£145 / €190.00 / \$275.00

www.cabi.org/bookshop/book/9781780643236

**Coping with Risk in Agriculture
Applied Decision Analysis
3rd Edition**

J. Brian Hardaker, University of New England, Australia, **Gudbrand Lien**, Lillehammer University College, Norway,

Jock R. Anderson, Consultant, USA and **Ruud B.M. Huirne**, Wageningen University, The Netherlands

Farmers face risks from the weather, crop and livestock performance, pests and diseases, as well as institutional, personal and business risks. This book includes updated chapters on theory and methods and a new chapter on the state-contingent approach to the analysis of production and the use of copulas to better model stochastic dependency.

March 2015 / PB / 272 pages / 9781780642406
£39.95 / €55.00 / \$75.00

**Transition to Agricultural Market Economies
The Future of Kazakhstan, Russia and Ukraine**

Edited by **Andrew Schmitz**, University of Florida, USA and **William H. Meyers**, University of Missouri, Colombia, USA

It is believed that the major countries of the former Soviet Union – specifically Kazakhstan, Russia and Ukraine (KRU region) – are the part of the world with the most potential to increase food supplies and strengthen world food security. This book examines the future of the KRU countries in global agricultural markets and examines a number of agricultural sectors. Particular attention is paid to the potential expansion of the grain sector and why the KRU region emerged during the 2000s as a major grain exporter, and its potential to further expand grain production and exports.

Climate Change and Agricultural Water Management in Developing Countries

CABI Climate Change Series

Edited by **Chu T. Hoanh**, IWMI-SEA, Lao, **Vladimir Smakhtin**, International Water Management Institute (IWMI), Sri Lanka and **Robyn Johnston**, International Water

Management Institute (IWMI), Sri Lanka

The book provides an analysis of impacts of climate change on water for agriculture, and the adaptation strategies in water management to deal with these impacts. Chapters include an assessment at global level, with details on impacts in various countries.

August 2015 / HB / 272 pages / 9781780643663
£85 / €110.00 / \$160.00

www.cabi.org/bookshop/book/9781780643663

**Mites of Economic Plants
Identification, Bio-ecology and Control**

Vincenzo Vacante, Mediterranean University, Italy

An encyclopedic reference on major mites, described by family in terms of internal and external morphology, bio-ecology and family systematics. Methods of mite collection and laboratory study are described, plus species diagnostic characteristics, world distribution, host plants, identification by type of damage they cause and control strategies.

September 2015 / HB / 700 pages / 9781845939946
£160 / €210.00 / \$305.00

www.cabi.org/bookshop/book/9781845939946

Abiotic Stresses in Crop Plants

Edited by **Usha Chakraborty** and **Bishwanath Chakraborty**, University of North Bengal, India

This book reviews the biochemical and molecular mechanisms of tolerance of abiotic stresses in nature. Covering increasing temperature, flooding, drought, salinity, heavy metals and ozone, it discusses how these abiotic stresses can be managed in a cost-effective and eco-friendly way by microbes through their alleviation mechanisms.

April 2015 / c.264 pages / HB / 9781780643731
£85 / €110 / US\$160

www.cabi.org/bookshop/book/9781780643731

**Water Dynamics in Plant Production
2nd Edition**

Wilfried Ehlers, University of Göttingen, Germany and **Michael Goss**, University of Guelph, Canada

This new edition describes the basic scientific principles of water transport in the soil-plant-atmosphere continuum. It explains the linkage between transpirational water use and dry matter production paying particular attention to the various agronomic strategies for adaptation to climate-driven limitations of water resources.

August 2015 / HB / 272 pages / 9781780643816
£85 / €110.00 / \$160.00

www.cabi.org/bookshop/book/9781780643816

Transition Pathways towards Sustainability in Agriculture Case Studies from Europe

Edited by **Lee-Ann Sutherland**, James Hutton Institute, UK, **Ika Darnhofer**, University of Natural Resources and Life Sciences, Austria, **Geoff Wilson**, University of Plymouth, UK and **Lukas Zagata**, Czech University of Life Sciences, Czech Republic

Using case studies from various countries in the EU the book adopts a novel analytical approach based on transition management theory. It discusses the importance of understanding transition pathways towards sustainability in European agriculture at a time of economic recession, migration of young people from rural areas, and increasing global competition in agro-commodity chains. It also discusses the utility of transition management concepts for addressing contemporary issues, and identifies future research needs and possible approaches.

November 2014 / HB / 242 pages / 9781780642192
£85 / €110.00 / \$160.00

www.cabi.org/bookshop/book/9781780642192

Conservation Agriculture Global Prospects and Challenges

Edited by **Ram A. Jat**, Directorate of Groundnut Research India, **Kanwar L. Sahrawat**, ICRISAT, India and **Amir H. Kassam**, University of Reading, UK and FAO, Rome, Italy

The book covers the spread of conservation agriculture (CA) to regions including Brazil, Argentina, Canada, Australia, Europe and emerging CA destinations in Asia and Africa. Topics covered include the various components of CA, and how their individual and combined implementation influence productivity, soil health and environmental quality under diverse edaphic and climatic conditions. The book will be useful to teachers, researchers, extensionists, farmers and students interested in environmental quality.

December 2013 / HB / 242 pages / 9781780642598
£120 / €160 / \$230

Promoting Investment in Agriculture for Increased Production and Productivity

Co-published with The Food and Agriculture Organization of the United Nations

Saifullah Syed and **Masahiro Miyazako**, both Investment Centre Division, FAO, Italy

Covering the development of sustainable agriculture, food production and food security, this book explains the relationship between all levels of investment and their interdependence to be successful. It also describes how to drive increased investment, at what stage and where, providing a useful overview of investment in agriculture.

November 2013 / HB / 112 pages / 9781780643885
£65 / €85 / \$125

Climate Change Impact and Adaptation in Agricultural Systems CABI Climate Change Series

Edited by **Jürg Fuhrer**, Oeschger Center for Climate Change Research, University of Bern, Switzerland and **Peter Gregory**, University of Reading, UK

This book focuses on future global climate change and its implications for agricultural systems which are the main sources of agricultural goods and services to society. This book brings together a series of chapters providing scientific insights to possible implications of projected climate changes for different crop types and livestock systems.

June 2014 / HB / 242 pages / 9781780642901
£85 / €110.00 / \$160.00

Sustainable Animal Agriculture

Edited by **Ermias Kebreab**, University of California Davis, USA

Sustainable Animal Agriculture covers practical topics such as air quality, manure management, animal feeds, production efficiency, environmental sustainability, biotechnology issues, animal welfare concerns, societal impacts and an analysis of the data used to assess the economic sustainability of farms.

December 2013 / HB / 336 pages / 9781780640426
£99.95 / €130 / \$190

Realizing Africa's Rice Promise

Edited by **Marco C.S. Wopereis**, Africa Rice Center (AfricaRice), Benin, **David Johnson**, International Rice Research Institute (IRRI), Philippines, **Nourallah Ahmadi**, Centre de Coopération Internationale en Recherche Agronomique pour le Développement (Cirad), France, **Eric Tollens**, Catholic University of

Leuven, Belgium and **Abdulai Jalloh**, West and Central African Council for Agricultural Research and Development (CORAF/WECARD), Senegal

Aimed at researchers, policy makers, agricultural ministries, donors, regional and sub-regional organizations, non-governmental development organizations and universities – this book provides an overview of state-of-the-art research and recommendations for handling future challenges in Africa's food security.

October 2013 / HB / 480 pages / 9781845938123
£115 / €150 / \$220

**Rural Women in Leadership
Positive Factors in Leadership
Development**

Edited by **Lori Ann McVay**, Spring Arbor University, USA

Rural women and leadership have, in recent years, come to be the focus of development initiatives in many countries. Citing examples from a case study in Northern Ireland, this book gives voice to the many vital, positive elements in rural women's leadership development.

**Banana Systems in the Humid
Highlands of Sub-Saharan Africa
Enhancing Resilience and Productivity**

Edited by **Guy Blomme**, Bioversity, Uganda, **Bernard Vanlauwe**, Tropical Soil Biology and Fertility Programme, Nairobi, Kenya and **Piet van Asten**, IITA, Uganda

Banana Systems in the Humid Highlands of Sub-Saharan Africa: Enhancing Resilience and Productivity addresses issues related to agricultural intensification in the (sub)humid highland areas of Africa, based on research carried out in the Great Lakes Region by the Consortium for Improving Agriculture-based Livelihoods in Central Africa.

**November 2013 / HB / 268 pages / 9781780642314
£90 / €115 / \$170**

**Transgenic Insects
Techniques and Applications
CABI Biotechnology Series**

Edited by **Mark Q. Benedict**, University of Perugia, Italy

Agriculture presents the largest market for transgenic insects and has a foundational history of success with sterile insect technique for control of pests including Mediterranean fruit flies and screwworms. Biotechnology will contribute superior markers, suppressible sterility and sex-conversion. Public health is also seeing transgenic mosquitoes developed which suppress natural populations and are incapable of transmitting disease. Experts in the field will contribute their insights into the latest technology and its applications. Authors will also consider the larger risks, social and economic aspects of transgenic insects whose value must be proven in political, regulatory and public acceptance arenas.

Vegetable Production and Practices

Gregory E. Welbaum, Virginia Tech University, USA

This major new textbook brings the science and practice of vegetable production up to date by addressing modern culture techniques and the recent challenges of consumer demand facing producers today. It introduces vegetable production from the perspective of producing high quality produce that satisfies the needs of the modern consumer.

Environmental Horticulture Science and Management of Green Landscapes

Modular Texts

Ross Cameron, Nigel Dunnett and **James Hitchmough**

Environmental horticulture is horticulture we encounter in our daily lives. It includes parks, botanic gardens, sports facilities, roundabouts, cemeteries and shopping centres. This textbook gives an overview of the subject, discusses the impacts it has on the environment and covers the practical management of environmental horticulture.

Fruit Ripening Physiology, Signalling and Genomics

Edited by **Pravendra Nath**, National Botanical Research Institute, India, **Mondher Bouzayen**, INRA, France, **Autar Mattoo**, USDA, Jean Claude Pech, ENSA, France

There are fast-moving developments in knowledge of the factors affecting fruit ripeness, and this up-to-date monograph draws together the disparate research in this area. The result is a comprehensive account covering almost every area related to fruit ripening including the latest molecular mechanisms regulating fruit ripening, its impact on human nutrition and emerging research and technologies.

Health Promoting Properties of Herbs and Spices

Leon Terry, Cranfield University, UK

Herbs and spices are some of the richest sources of ascorbic acid, antioxidants and bioactive compounds, which protect against oxidative damage and may reduce the incidence of certain diseases. This book focuses on a broad range of the most commonly used herbs and spices, with the active ingredients and effects on human diseases discussed for each.

The Potato Botany Production and Uses

Edited by **Roy Navarre**, USDA-ARS and Washington State University, USA and **Mark J. Pavek**, Washington State University, USA

Covering all aspects of botany, production and uses, this book presents a broad discussion of the most important topics for potato researchers and professionals. It assesses the latest research on plant growth, water use and seed production; covers all aspects of pest management and reviews postharvest issues and nutritional value and flavour.

Plants as a Source of Natural Antioxidants

Nawal Kishore Dubey, Banaras Hindu University, India

A comprehensive overview of the health effects of plant-based antioxidants, this book reviews medicinal and aromatic plants from around the world. It covers the different sources of antioxidants, the role of abiotic and biotic stresses, endophytes, transgenic approaches in scavenging ROS and antioxidant plants used in different therapeutic systems.

December 2014 / HB / 280 pages / 9781780642666

Analytical Techniques for Natural Product Research

Satyanshu Kumar, Directorate of Medicinal and Aromatic Plants Research, India

Plants are an important source of lead molecules for drug discovery. These lead molecules serve as starting materials for laboratory synthesis of drugs as well as a model for production of biologically active compounds. Phytochemical processing of raw plant materials is essentially required to optimize the concentration of known constituents and also to maintain their activities. Extraction techniques and analytical techniques have played critical roles in phytochemical processing of raw materials. Extraction technologies from conventional extraction to green extraction as well as analytical techniques from single technique to hyphenated/coupled techniques most frequently used in phytochemistry laboratories are covered in the book.

Bioenergy and Biological Invasions Ecological, Agronomic and Policy Perspectives on Minimizing Risk

CABI Invasives Series

Edited by **Lauren D. Quinn**, University of Illinois, USA, **David P. Matlaga**, Susquehanna University, USA and **Jacob N. Barney**, Virginia Tech, USA

A cohesive state-of-the-art review of the invasive potential of bioenergy crops, this book covers the identified risks of invasion, distributions of key crops and management issues. Including a section on developing predictive models, this book also assesses the potential societal impact of bioenergy crops and how to mitigate invasive risks.

Tomatoes 2nd Edition Crop Production Science in Horticulture

Edited by **Ep Heuvelink**, Wageningen University, The Netherlands

Tomatoes are one of the most important horticultural crops, grown in vast quantities worldwide. This new edition covers genetics and breeding, crop growth and yield, irrigation and fertilization, fruit ripening and quality, and postharvest biology and handling. Updated throughout, it also includes a new chapter on organic tomato production.

Fungicides in Crop Protection 2nd Edition

Richard P. Oliver, Curtin University, Australia and H.G. Hewitt, University of Reading, UK

This book provides a concise and balanced review of fungicides and their application. It describes the science of fungicide use, selection and resistance within the context of

farming situations, with major updates reflecting the emergence of two new classes of fungicides (strobilurins and SDHI) and the increased incidence of fungicide resistance.

Urban Insect Pests Sustainable Management Strategies

Partho Dhang, Independent Consultant, Philippines

A companion to *Urban Pest Management*, this book builds on the issues of insect pests in urban settings to discuss control strategies.

From an environmental and health perspective,

it is not always practical to spray chemicals, so this work discusses sustainable control and best practice methods for managing insects.

Brassica Oilseeds Breeding and Management

Edited by **Arvind Kumar**, Indian Council of Agricultural Research, India, **Surinder S. Banga**, Punjab Agricultural University, India, **Prabhu Dayal Meena**, Directorate of Rapeseed-Mustard Research (ICAR), India and **Priya Ranjan Kumar**, Formerly of Indian Council of Agricultural Research, India

This book is applied and covers the entire gamut of oilseed brassicas, including breeding, heterosis, selection methods, genomics, stress management as well as the important pathogens. *Brassica Oilseeds Breeding and Management* has 12 chapters, organized in two sections: Genetics and genomics and Stress management. Section one deals with issues relating to brassica productivity in terms of genetic constraints, germplasm enhancement options and molecular breeding. Section two emphasizes stress management.

Biocontrol Agents of Phytonematodes

Edited by **Tarique Hassan Askary**, Sher-e-Kashmir University of Agricultural Sciences and Technology of Kashmir (SKUAST-K), India and **P.R.P. Martinelli**, Universidade Estadual Paulista (FCAV -UNESP), Brazil

Highlighting the use of biocontrol agents as an alternative to chemical pesticides in the management of plant nematodes, this book reviews current progress and developments. Each biocontrol agent, i.e. nematophagous fungi, parasitic bacteria, predaceous mites, rhizobacteria, mycorrhiza and predaceous nematodes, has been described separately.

Invasive Plant Species

A Reference Guide to Environmental Weeds

2nd Edition

Ewald Weber, University of Potsdam, Germany

Invasive plant species cause severe disruption to natural and managed ecosystems. A full-colour reference guide to the major invasive plants, this book includes over 500 economically and environmentally important species. It provides illustrations, synonyms, geographical distribution, habitats invaded, morphology, ecology and references for each.

Potato and Sweetpotato in Africa Transforming the Value Chains for Food and Nutrition Security

Edited by **Jan Low**, International Potato Center, Kenya, **Moses Nyongesa**, Kenya International Research Institute, Kenya, **Sara Quinn** and **Monica Parker**

Sweetpotato and potato are expanding faster than any other food crops in sub-Saharan Africa. There is growing investment in research to address bottlenecks in value chains concerning these two crops, and growing interest from the private sector in investing in them. This book addresses five major themes on sweetpotato and potato: policies for germplasm exchange, food security and trade in Africa; seed systems; breeding and disease management; post harvest management, processing technologies and marketing systems; nutritional value and changing behaviours.

Bt resistance Characterization and Strategies for GM Crops Expressing *Bacillus thuringiensis* Toxins

CABI Biotechnology Series

Edited by **Mario Soberón**, Instituto de Biotecnología UNAM, Mexico, **Yulin Gao**, Chinese Academy of Agricultural Science, China and **Alejandra Bravo**, Universidad Nacional Autónoma de México, Mexico

Nacional Autónoma de México, Mexico

This book describes the use of *Bacillus thuringiensis* (Bt) crops and the emerging problem of resistance, recent progress in understanding the mechanism of action of Bt toxins, different resistance mechanisms and strategies to cope with resistance in the field. It describes resistant insects found in the field in different countries, particularly in the developing world, and ways to counter resistance such as gene stalking, refuges, modified toxins and gene discovery of novel toxins with different a mode of action.

Climate Change and Insect Pests

CABI Climate Change Series

Edited by **Christer Björkman**, Swedish University of Agricultural Sciences, Sweden and **Pekka Niemelä**, University of Turku, Finland

It is anticipated that the damage by insects will increase as a consequence of climate change,

i.e. increasing temperatures primarily. However, the evidence in support of this common 'belief' is sparse. *Climate Change and Insect Pests* sums up present knowledge regarding both agricultural and forest insect pests and climate change in order to identify future research directions.

Europe's Changing Woods and Forests

From Wildwood to Managed Landscapes

Edited by **Keith Kirby**, Oxford University, UK and **Charles Watkins**, University of Nottingham, UK

This book provides a comprehensive account of the relevance of historical studies to current

conservation and management of forests. It combines theory with a series of regional case studies to show how different aspects of forestry play out according to the landscape and historical context of the local area.

Tree-Crop Interactions

Agroforestry in a Changing Climate

2nd Edition

Edited by **Chin K. Ong**, International Centre for Research in Agroforestry (ICRAF), Kenya and **Colin Black**, University of Nottingham, UK

This new edition provides an update on the considerable amount of evidence on tree-crop interactions which has accumulated during the last two decades, especially on the more complex multi-strata agroforestry systems, which are typical of the humid tropics. In addition three new chapters have been added to describe the new advances in the relationship between climate change adaptation, rural development and how trees and agroforestry will contribute to a likely reduction in vulnerability to climate change in developing countries.

Rodent Pests and their Control

2nd Edition

Edited by **Alan P. Buckle**, The University of Reading, UK and **Robert H. Smith**, University of Huddersfield, UK

In the last two decades, the science and practice of rodent control has faced new legislation on rodenticides, the pests'

increasing resistance to chemical control and the impact on non-target species. This makes this updated 2nd edition a key read for researchers, conservationists, practitioners and public health specialists within pest control.

Global Forest Fragmentation

Edited by **Chris J. Kettle** and **Lian Pin Koh**, ETH Zurich, Switzerland

This book provides a cutting-edge review of the multi-disciplinary sciences related to studies of global forest fragmentation. It specifically addresses cross-cutting themes from both an ecological and a social sciences' perspective.

Invasive Species and Global Climate Change

CABI Invasives Series

Edited by **Lewis Ziska**, USDA-ARS, USA and **Jeffrey Dukes**, Purdue University, USA

This book examines what will happen to global invasive species, including plants, animals and pathogens with current and expected man-made climate change. The effects on distribution, success, spread and impact of invasive species are considered for a series of case studies from a number of countries.

August 2014 / HB / 376 pages / 9781780641645

Land-Use Change Impacts on Soil Processes
Tropical and Savannah Ecosystems

Edited by **Francis Q. Brearley** and **Andrew D. Thomas**, Manchester Metropolitan University

This book examines the effects that land-use changes (notably agricultural intensification, logging, soil erosion, urbanization and mining) have on soil characteristics and processes in tropical and savannah environments. It covers a range of geographical regions and environments as impacts of land-use change are often site specific.

July 2015 / HB / 224 pages / 9781780642109

Ecology of Soil Decomposition
2nd Edition

Sina M. Adl, University of Saskatchewan, Canada

This new edition describes trophic interactions between species and interactions with the mineral soil. Key topics addressed include spatial stratification, succession patterns over time and biogeochemistry. Featuring new material on soil remediation, the emphasis is placed on the role of species in functional groups.

July 2015 / HB / 224 pages / 9781780642680

Temperate Agroforestry Systems
2nd Edition

Edited by **Andrew M. Gordon**, University of Guelph, Canada and **Scott M. Newman**, Biodiversity International Ltd, UK

The first edition of this book explored the development of temperate agroforestry systems, concentrating on those areas within the temperate zones where the greatest advances, adoptions and modifications had taken place to that time. This second edition has updated material, in some cases substantially, as well as introducing to the reader other regions where temperate agroforestry research and development is contributing to sustainable food production systems. There are new chapters for India, Chile and Scandinavia.

Soil Carbon
Science, Management and Policy for Multiple Benefits

Edited by **Steven A. Banwart**, University of Sheffield, UK, **Elke Noellemeier**, The National University of La Pampa, Argentina and **Eleanor Milne**, University of Leicester, UK and Colorado State University, USA

This book brings together the essential evidence and policy opportunities regarding the global importance of soil carbon for sustaining essential ecosystems services. Covering the science and policy background for this important natural resource, it describes land management options that improve soil carbon status.

Poplars and Willows
Trees for Society and the Environment

Edited by **J.G. Isebrands**, Environmental Forestry Consultants, LLC, USA and **J. Richardson**, J Richardson Consulting, Canada

Poplars and willows form an important component of forestry and agricultural systems, providing a wide range of wood and non-wood products. This book synthesizes the latest research in an accessible format, providing a practical worldwide overview and guide to their basic characteristics, cultivation and use, and issues, problems and trends.

Plant Genetic Resources and Climate Change
CABI Climate Change Series

Edited by **Michael Jackson**, previously International Rice Research Institute, The Philippines, **Brian V. Ford-Lloyd**, University of Birmingham, UK and **Martin L. Parry**, Imperial College London, UK

This book addresses the current state of climate change predictions, and how climate change will affect conservation and use of crop germplasm, both *ex situ* and *in situ*. Examples of germplasm research related to 'climate change threats' are also highlighted.

Forestry in a Global Context 2nd Edition

Edited by **Roger Sands**, New Zealand School of Forestry, University of Canterbury, New Zealand

This broad introductory textbook sets world forestry in a social, environmental, historical and economic context. Fully updated throughout and with new contributions from international experts, this second edition includes new chapters on climate change and international forest policy, and expanded coverage of forest products and bioenergy production.

November 2013 / HB / 264 pages / 9781780641560

Infectious Forest Diseases

Edited by **Paolo Gonthier** and **Giovanni Nicolotti**, University of Torino, Italy

This book covers recent advances in the management of forest diseases, including the epidemiology and infection biology of forest pathogens, and forest protection based on integrated pest and disease management

approaches. A comprehensive range of diseases are discussed in detail, making this book essential reading for forest managers and extension specialists.

Insect Pests in Tropical Forestry 2nd Edition

F. Ross Wylie, Queensland Government, Australia and **Martin R. Speight**, University of Oxford, UK

The management of tropical forest ecosystems is essential to the health of the planet. This book addresses forest insect pest problems

across the world's tropics. Fully updated, this second edition also includes discussions of new areas of interest including climate change, invasive species, forest health and plant clinics.

Introductory Probability and Statistics

Applications for Forestry and Natural Sciences

A. Kozak, R. Kozak, S. Watts and **Christina Stadhammer**

With interest growing in areas of forestry, conservation and other natural sciences, the need to organize and tabulate large amounts of forestry and natural science information has become a necessary skill. This book utilizes basic descriptive statistics and probability, as well as commonly used statistical inferential tools to introduce topics that are commonplace in a forestry context.

CAB eBooks Collection: Ecology, Conservation and Climate Change

We know how important it is to have access to the most relevant information. With so many **eBooks** to choose from we have done the hard work for you and created the CABI Choice Collections.

why purchase a CABI Choice eBook Collection?

- Own your collection with outright purchase
- Access your eBooks your way – available to read online and download for offline access
- Hand-picked collections targeted to your research needs
- Significant savings compared to individual purchase

what is the Ecology, Conservation and Climate Change eBook Collection?

This Choice Collection offers 48 hand-picked titles across a variety of key topics within the field of ecology, conservation and climate change including:

- Biodiversity
- Conservation
- Environmental Impacts
- Greenhouse Gases
- Invasive Species
- Land Use
- Plant Genetics
- Pollution

Domestic Animal Behaviour and Welfare
5th Edition

Donald M. Broom, University of Cambridge Veterinary School, UK and **Andrew F. Fraser**, formerly Memorial University of Newfoundland, Canada

Now in its fifth edition, this book includes new chapters detailing the welfare of sheep, goats and exotic pets, and welfare in relation to genetic selection and modification. It covers animal behaviour and welfare for companion animals, farm animals and farmed fish, reviewing development, socialization, locomotion, reproduction and more.

Improving Animal Welfare
A Practical Approach, 2nd Edition

Edited by **Temple Grandin**, Colorado State University, USA

By taking an entirely practical approach, this textbook aims to help those working with animals to apply methods for improving welfare, bridging the gap between scientific research and practical application. This book provides a guide to practical evaluation and auditing of welfare problems for farmed animals, emphasizing the importance of measuring conditions that compromise welfare such as lameness, or the use of electric goads. This second edition is fully updated with new literature, new, up-to-date coverage of pain management, and the addition of a new chapter on animal welfare in organic farming systems.

Ethics of Animal Trade

Clive J.C. Phillips, University of Queensland, Australia

The trade in live and dead animals and animal parts is a significant aspect of the global economy, but economic considerations are at odds with animal welfare. This book discusses the background to modern international trade, welfare, and the environmental, economic and cultural issues for farm, zoo and sport animals as well as the pet industry.

Tuberculosis, Leprosy and Mycobacterial Diseases of Man and Animals

The Many Hosts of Mycobacteria

Edited by **Harshini Makundan**, Los Alamos National Laboratory, USA, **Mark Chambers**, **Ray Waters**, USDA, USA and **Michelle Larsen**, Albert Einstein College of Medicine, USA

This book covers members of the *Mycobacterium tuberculosis* complex (MTC) and *Mycobacterium leprae* across a wide range of host species. *M. tuberculosis* and *Mycobacterium bovis* are considered in regards to increasing drug resistance, HIV co-infection associated with *M. tuberculosis* and the possible cross-infection of badgers and cattle associated with *M. bovis*.

Equine Reproductive Physiology, Breeding and Stud Management, 4th edition

Mina C.G. Davies Morel, University of Wales, Aberystwyth, UK

The fourth edition of this popular textbook provides a comprehensive account of how to successfully breed horses. Updated throughout, the new edition will cover techniques such as cloning, intra-cytoplasmic sperm injections (ICSI), *in vitro* fertilization (IVF) and related reproductive technology that is currently being developed. This book also looks at reproductive anatomy, endocrine control and selection for breeding mares and stallions, and pregnancy, parturition and lactation in the mare.

Genetics and Genomics of the Rabbit

Edited by **Luca Fontanesi**, University of Bologna, Italy

A research monograph covering all aspects of the genetics and genomics of the rabbit, with contributions from international experts.

Contents include: evolution, domestication, breeds, classical genetics, the rabbit genome, genetic maps and markers, coat colour genetics, immunogenetics, the genetics of fibre production, the genetics of meat production and carcass traits, the genetics of reproduction and disease resistance, rabbit breeding and selection, the rabbit as an animal model, transgenic rabbits and biotechnology applications in rabbits.

Livestock Production and Climate Change

CABI Climate Change Series

Edited by **P.K. Malik** and **R. Bhatta**, National Institute of Animal Nutrition and Physiology, India, **Junichi Takahashi**, Obihiro University of Agriculture and Veterinary Medicine, Japan, **Richard Kohn**, University of Maryland, USA

and **C.S. Prasad**, National Institute of Animal Nutrition and Physiology, India

In a changing climate, livestock production is expected to exhibit dual roles of mitigation and adaptation in order to meet the challenge of food security. This book approaches the issues of livestock production and climate change through three sections: I. Livestock production; II. Climate change; and III. Enteric methane amelioration.

March 2015 / HB / 384 pages / 9781780644325

Encyclopedia of Livestock Breeds and Breeding

Valerie Porter, **Lawrence Alderson**, **Stephen Hall** and **Philip Sponenberg**

Over thousands of years, animal husbandry coupled with natural selection has given rise to a great diversity of livestock breeds. A major new reference work, *The Encyclopedia of*

Livestock Breeds and Breeding describes breeds of livestock worldwide. It presents easily accessible information on domestication, potential domesticants, genetics and breeding, livestock produce and markets, cultural and social aspects of livestock farming, genetic conservation and the use of livestock for conservation grazing.

The encyclopedia will be of great value to agriculturalists, breeders, geneticists, biologists, rural historians, conservationists, ecologists and all those who are interested in the rich diversity of livestock breeds.

Practical Veterinary Forensics

Edited by **David Bailey**, Veterinary Forensic Consultant, UK

Veterinarians often come into contact with the law in cases of animal cruelty, domestic animal and wildlife crimes, and human crimes with an animal element. This book provides practical training, covering how to operate in

a crime scene, work with emergency service personnel, collect evidence, prepare reports and provide evidence in court.

One Health

The Theory and Practice of Integrated Health Approaches

Edited by **Jacob Zinsstag**, Swiss Tropical and Public Health Institute, Switzerland, **E. Schelling**, Swiss Tropical and Public Health Institute, Switzerland, **D. Waltner-Toews**, University of Guelph, Canada, **M. Whittaker**,

University of Queensland, Herston, Australia, **M. Tanner**, Swiss Tropical and Public Health Institute, Switzerland

This book examines the origins of One Health and includes practical content on methodological tools, data gathering, monitoring techniques, study designs and mathematical models. Discussing how to put policy into practice, zoonotic diseases and real-world issues such as sanitation, food security and vaccination programmes are covered in detail.

Nutritional Modelling for Pigs and Poultry

Edited by **N.K. Sakmoura, R. Gous, I. Kyriazakis, L. Hauschild**

Modelling is a useful tool for decision making in complex agro-industrial scenarios. Containing a selection of papers presented at the International Symposium of Modelling

in Pig and Poultry Production 2013, this book reviews basic modelling concepts, descriptions and applications of production models and new methods and approaches in modelling.

Beef Cattle Production Systems

Modular Texts

Andy Herring, Texas A&M University

This textbook provides an integrated view of beef cattle production with a systems-based approach, discussing the interrelationships of many aspects with the overall goal of optimizing cattle production. A key read for upper level undergraduate and postgraduate students in animal and veterinary science, producers, extension workers and veterinarians.

November 2014 / HB / 480 pages / 9781845937959

Rabbit Behaviour, Health and Care

Marit Emilie Buseth and Richard Saunders

Developed from the successful Norwegian book *Den Store Kaninboka (The Big Book of Rabbits)* this book covers all aspects of rabbit behaviour, welfare, health and husbandry, with updated and expanded content relevant to veterinarians. Case studies from around the world give this valuable resource an international perspective.

Genetics of Cattle

2nd Edition

Edited by **Dorian J. Garrick**, Iowa State University and **Anatoly Ruvinsky**, University of New England, Australia

Understanding of cattle genetics and genomics has increased dramatically. This book covers genetic components behind important factors in cattle production such as breeds, disease resistance, growth, development, behaviour, body composition and meat quality. With significant updates throughout, this new edition includes new contributing authors and new chapters on genetics of fat production and deposition, nutrition, feed intake and feed efficiency, growth and body composition and genomic selection in beef and dairy cattle.

Pig Disease Identification and Diagnosis Guide

Steven McOrist, Consultant pig veterinarian, formerly University of Nottingham, UK

This textbook covers more than 100 of the most common pig diseases. With each presented as a case study, the book uses a question and answer format to enable students

to recognize the key features of each disease, identify the problem and suggest a course of action. Fully illustrated with colour photos, it is an invaluable learning tool.

Sentience and Animal Welfare

Donald M. Broom, University of Cambridge
Veterinary School, UK

Sentience – the ability to feel, perceive and experience – is central to the animal welfare debate. This book investigates and defines aspects of sentience such as consciousness, memory and emotions, and discusses brain complexity in detail. It looks at sentience from a developmental perspective and includes a chapter on ethical decisions.

Diseases and Disorders of Finfish in Cage Culture

2nd Edition

Edited by **Patrick T.K. Woo**, University of
Guelph, Canada and **David W. Bruno**, Marine
Scotland, Aberdeen, UK

This new edition of *Diseases and Disorders of Finfish in Cage Culture* is a timely update due to important advances in the understanding of infectious diseases of finfish. The content has been significantly updated to reflect current knowledge and the developments in the fish production industry in the last 10 years, including the dramatic increases in production in the Asia-Pacific region.

Livestock Handling and Transport 4th Edition

Edited by **Temple Grandin**, Colorado State
University, USA

Edited by world-renowned animal scientist Dr Temple Grandin, this practical book integrates scientific research and industry literature on cattle, pigs, poultry, sheep, goats, deer and horses, in both the developed and the developing world, to provide a practical guide to humane handling and minimizing animal stress. Reviewing the latest research on transport systems, restraint methods and facilities for farms and slaughterhouses, this fully updated fourth edition of *Livestock Handling and Transport* includes new coverage of animal handling in South America, and reviews extensive new research on pig transportation in North America.

Animal Andrology Theories and Applications

Edited by **Peter J. Chenoweth**, Cheno Vet,
Australia and **Steven Lorton**, Reproduction
Resources, USA

Understanding animal andrology is fundamental to optimizing genetic breeding traits in domestic and wild animals. This book provides extensive coverage of male reproductive biology, discussing the essentials of sperm production, harvest and preservation before covering the applications to a range of animals including cattle, horses, pigs, small ruminants, camelids, cats and dogs, poultry and exotic species. It also examines the laboratory procedures that provide the basis of general fertility research.

Dilemmas in Animal Welfare

Edited by **Michael C. Appleby**, World Society for the Protection of Animals (WSPA), UK, **Daniel M. Weary**, The University of British Columbia, Canada and **Peter Sandøe**, University of Copenhagen, Denmark

There are endless on-going debates in animal welfare. This book seeks to distil some of the major themes of current debate into one volume edited by internationally known names in the field of animal welfare. Each chapter, written by a leading expert, will discuss in an open-handed way a provocative topic, which will be of interest to anyone concerned with animal welfare. Issues covered include tail docking, pet obesity, isolation vs group aggression, neutering feral cats and the need to conserve wildlife habitats in the face of wild animal overpopulation.

Animal Nutrition with Transgenic Plants

CABI Biotechnology Series

Edited by **Gerhard Flachowsky**, FLI Braunschweig, Germany

Transgenic plants are cultivated globally on a large scale, and mostly fed to domestic animals. Including over 150 feeding studies with food-producing animals, and covering first and second generation transgenic plants, this book is the first key resource of this information for researchers, students and policy makers.

Linear Models for the Prediction of Animal Breeding Values 3rd Edition

Raphael A. Mrode, Scottish Agricultural College, Edinburgh, UK

The prediction of producing desirable traits in offspring is a vital tool to animal scientists. Summarizing the developments in genomics and design of breeding programmes, this book covers models of survival analysis, social interaction and sire and dam models, plus advancements in the use of SNPs in the computation of genomic breeding values.

Mononegaviruses of Veterinary Importance, Volume 1 Pathobiology and Molecular Diagnosis

Edited by **Muhammad Munir**, Swedish University of Agricultural Science, Sweden

Mononegavirales is an order of viruses affecting large, small and marine animals.

Discussing the pathology and laboratory diagnosis, this book covers diseases that cause significant threat to animals in terms of severity and epidemiological risk, as well as those which are used as models in the study of infectious disease. Also including viruses with zoonotic potential, this book reviews the literature for rinderpest, rabies, ebola and more.

Farm Animal Medicine and Surgery For Small Animal Veterinarians

Graham R. Duncanson, Westover Veterinary Centre, UK

Small animal veterinarians are increasingly taking on caseloads that include farm animals, with cases being presented by local hobby farmers, smallholders and 'novelty pet' owners. Recognizing this trend, this book provides a quick reference guide for small-animal orientated veterinarians in the basics of surgery and treatment of farm animals.

Tuberculosis, Leprosy and Mycobacterial Diseases of Man and Animals

The Many Hosts of Mycobacteria

Edited by **Harshini Makundan**, Los Alamos National Laboratory, USA, **Mark Chambers**, **Ray Waters**, USDA, USA and **Michelle Larsen**, Albert Einstein College of Medicine, USA

This book covers members of the *Mycobacterium tuberculosis* complex (MTC) and *Mycobacterium leprae* across a wide range of host species. *M. tuberculosis* and *Mycobacterium bovis* are considered in regards to increasing drug resistance, HIV co-infection associated with *M. tuberculosis* and the possible cross-infection of badgers and cattle associated with *M. bovis*.

Natural Polymers for Drug Delivery

Edited by **Harsha Kharkwal**, Amity University, Uttar Pradesh, India and **Srinivas Janaswamy**, Purdue University, USA

This book provides an overview of the source, chemical structure and action mechanism of natural polymers. Focusing on their utility in developing effective drug delivery systems,

it covers polymers' role in binding drugs towards enhancing bioavailability, modification and derivatization for targeted delivery, and modification as active drugs.

Metabolomics and Systems Biology in Human Health and Medicine

Edited by **Oliver A.H. Jones**, RMIT University, Australia

This book provides a solid introduction to medical metabolomics and systems biology, and demonstrates how they have been applied to studies in medicine and human health,

including nutrition and pathogenic microorganisms. Following core themes of diagnosis, pathology and aetiology of disease, this book provides a reference in how to use metabolomics for medical research.

Microbial Bioresources

Edited by **Vijai Kumar Gupta**, University of Ireland Galway, Ireland, **Devrajan Thangadurai**, Karnataka University, India, **Gauri Dutt Sharma**, Bilaspur University, India and **Rajeeva Gaur**, Dr RML Avadh University, India

Microbial technology has an integral role in the development of biotechnology, bioengineering and biomedicine. This book provides a detailed compendium of the methods, biotechnological routes and processes used to investigate microbial applications. It covers the applied aspects of microorganisms in the health, industry and environmental sectors.

Home Parenteral Nutrition 2nd Edition

Edited by **Federico Bozzetti**, Hospital of Prato, Italy, **Michael Staun**, Rigshospitalet, Denmark and **Andre Van Gossum**, Université Libre de Bruxelles, Belgium

Home parenteral nutrition (HPN) is the intravenous administration of nutrients carried out in the patient's home. This book analyses current practices in HPN, covering epidemiology of HPN across the UK and Europe, USA and Australia, its role in the treatment of clinical conditions, as well as ethical and legal aspects and patient quality of life.

Dengue and Dengue Hemorrhagic Fever 2nd Edition

Edited by **Duane J. Gubler**, Duke-NUS Graduate Medical School, Singapore, **Eng Eong Ooi**, Duke-NUS Graduate Medical School, Singapore, **Subhash Vasudevan**, Duke-NUS Graduate Medical School,

Singapore and **Jeremy Farrar**, Oxford University Clinical Research Unit, Vietnam

Over 20,000 deaths are associated with dengue virus infections yearly, and DF/DHF is globally one of the most important emerging tropical diseases. This updated edition gathers leading research and clinical scientists to review the latest findings on dengue virus biology, epidemiology, entomology, therapeutics, vaccinology and clinical management.

Climate Change and Global Health

Edited by **Colin D. Butler**, University of Canberra, Australia

This broad, research-level book covers the impacts of climate change on human health worldwide. Immediate and direct impacts, secondary impacts such as vector ranges and disease incidence, and long-term ones are

covered as well as the role of health professionals in preventing and mitigating the health issues caused by climate change.

Bacterial Pili

Structure, Synthesis and Role in Disease

Advances in Molecular and Cellular Microbiology

Edited by **Michele A. Barocchi** and **John L. Telford**

Bacterial pili play important roles as environmental sensors, in host colonization and in biofilm formation, enabling bacteria to interact with the environment, with surfaces and with other bacteria and host cells. Most bacteria, both Gram positive and Gram negative, and almost all bacterial pathogens, are piliated. This book discusses the synthesis, structure, evolution, function and role in pathogenesis of these complex structures, and their basis for vaccine development and therapeutics for Streptococcus pathogens.

Improving Diets and Nutrition Food-based Approaches

Edited by **Brian Thompson** and **Leslie Amoroso**, FAO, Italy

Co-published with the FAO

Nutrition-sensitive, food-based approaches towards hunger and malnutrition are effective,

sustainable and long-term solutions. Discussing the policy, strategic, methodological, technical and programmatic issues associated with such approaches, this book also provides practical lessons for advancing nutrition-sensitive, food-based approaches.

Natural Environments and Human Health

Edited by **Alan Ewert**, Indiana University, USA, **Denise Mitten**, Prescott College, USA and **Jill Overholt**, Warren Wilson College, USA

The role natural environments play in human health and well-being is attracting increasing attention. This book examines the history of natural environments used for stress-reduction, enjoyment, aesthetics and catharsis, and traces the development of connections between humans and environment, and how they impact our personal and collective health.

Geographic Health Data Fundamental Techniques for Analysis

Edited by **Francis Boscoe**, New York State Cancer Registry, USA

An accessible overview of recurring global problems in the display and analysis of health data involving a geographic component.

Focusing on proven techniques that have been recognized as sufficient for real-world data sets, this book provides a comprehensible introduction to geographic information systems (GIS) and includes information on GIS applications in disaster response.

Disaster Management

Medical Preparedness, Response and Homeland Security

Edited by **Rajesh Arora**, Defence Research and Development Organization, Delhi, India and **Preeti Arora**, Guru Gobind Singh Indraprastha University, India

Disaster management is an increasingly important subject, as effective management is essential to save lives and minimize casualties. This book discusses the best practice in both developed and developing countries, including planning and preparedness of hospitals, emergency medical services, communication and IT tools for medical disaster response and psychosocial issues.

**Genetic Epidemiology
Methods and Applications**

Modular Texts

Melissa A. Austin, University of Washington, USA

Following an overview of the field, this textbook reviews key genetic concepts, provides an update on relevant genomic technology, and describes methods for assessing the magnitude of genetic influences on diseases and risk factors. This textbook is an essential new resource for graduate students in epidemiology and public health genetics.

**The Human Microbiota
and Microbiome**

Advances in Molecular and Cellular Microbiology

Edited by **Julian R. Marchesi**, Cardiff University, UK

A research-level review text of the current understanding of human microbiomes, functions they bring to the host, how we can model them, their role in health and disease and exploration methods. Current research in areas such as long-term effects of antibiotics makes this a subject of interest particularly for microbiology researchers and students.

Encyclopedia of Sustainable Tourism

Edited by **Carl I. Cater** and **Brian Garrod**, Aberystwyth University, UK

Tourism is the world's fastest growing industry and has global impacts. Development must be sustainable in order to preserve the environment and culture it exploits. This reference work defines terms associated with considering and preserving the environment, host peoples, communities, cultures, customs, lifestyles and social and economic systems.

October 2015 / HB / 700 pages / 9781780641430

Mountain Tourism Experiences, Communities, Environments and Sustainable Futures

Edited by **Harold Richins**, Thompson Rivers University, Canada and **John Hull**, Thompson Rivers University, Canada

This book focuses on the diversity of perspectives, interaction and role of tourism in mountainous areas. It considers the interdisciplinary context of communities, the creation of experiences and the impacts tourism has. With authors from Europe, Asia-Pacific and North America, the development, planning and governance issues are also covered.

Risk and Safety Management in the Leisure, Sport, Tourism and Events Industries

Edited by **Mark Piekarz**, University of Worcester, UK, **Ian Jenkins**, Glion Institute of Higher Education, Switzerland and **Peter Mills**, QLM, UK

The management of risk and safety is not simply a matter of trying to remove risks, but is necessary and vital to these industries. Sensible risk management is concerned with making the most of the positive opportunities or reducing the negative risks. This book shows how the absence of explicit risk practices is not necessarily an absence of risk management, and how many existing operational and strategic practices can be understood as part of a process of risk and safety management. Its main objective is to develop greater clarity in the communication of risks and the development of safety programmes, illustrating how organizations can use a single language of risk, relevant for all levels of management and areas of operation.

Transformational Tourism Host Perspectives

Edited by **Yvette Reisinger**, Gulf University for Science and Technology, Kuwait

Transformational Tourism deals with the important issue of how travel and tourism can change human behaviour and have a positive impact on the world. The book focuses on human development in a world dominated by post-9/11 security and political challenges, economic and financial collapses, as well as environmental threats. It identifies various types of tourism that can transform human beings, such as educational, volunteer, survival, community-based, eco, farm, extreme, religious, spiritual, wellness, and mission tourism.

Tourism Information Technology 2nd Edition

CABI Tourism Texts

Edited by **Pierre J. Benckendorff**, The University of Queensland, Australia, **Pauline J. Sheldon**, University of Hawaii, USA and **Daniel R. Fesenmaier**, University of Florida, USA

Fully updated, this new edition covers IT applications and social media across the industry, including airlines, travel intermediaries, accommodation, foodservice, destinations, events and entertainment. Organized around the visitor journey, it considers how tourists use technologies for decision making before, during and after their travels.

Imagining

Innovation in the Experience Economy

Gabrielle Kuiper, Utrecht University of Arts, The Netherlands and **Bert Smit**, NHTV University of Applied Sciences, The Netherlands

To survive in today's economies, it is imperative for companies to understand their consumers in terms of how and why they like to use their products. Imagineers use design methods to create meaningful experiences that connect consumers to brands. This book explains the background of the need for experiences and focuses on how to design them.

Events as a Strategic Marketing Tool

CABI Tourism Texts

Dorothe Gerritsen and **Ronald van Olderen**, NHTV Breda University of Applied Science, The Netherlands

Experiences, encounters and events have come to play an ever-growing role in marketing. *Events as a Strategic Marketing Tool* describes how events can be used as a strategic tool in marketing practices. The introductory chapters address the development of the experience economy, events and event marketing. Subsequently, the book covers the various areas of marketing within which experiences play a role, such as branding, relationship marketing and city marketing. The final chapters deal with the step from strategy to concept, and discuss event design and touchpoints. The book concludes with a chapter on effect measurement and evaluation.

Entertainment Management

Towards Best Practice

CABI Tourism Texts

Edited by **Stuart Moss**, Leeds Metropolitan University and **Ben Walmsley**, University of Leeds, UK

Following on from *The Entertainment Industry: An Introduction*, this book takes the next step in the development of entertainment as a practice and as an academic subject. Aimed at higher level undergraduates, the book discusses best practices in the entertainment industry, reflecting the knowledge students will need for entertainment management.

June 2014 / HB / 328 pages / 9781780640228

Handbook of Scales in Tourism and Hospitality Research

Dogan Gursoy, Washington State University, USA, **Muzaffer Uysal**, Virginia Tech, USA, **Ercan Sirakaya-Turk**, University of South Carolina, USA, **Yukse Ekinci**, Oxford Brookes University, UK and **Seyhmus Baloglu**, Harrah College of Hotel Administration, USA

As the field of tourism and hospitality experiences maturity and scientific sophistication, researchers need to fully understand the breadth and depth of existing scales that help explain, understand, monitor and predict not only behaviour but also consequences of such behaviour as a function of demand and supply interactions in the field. By introducing the importance of measurement and scales and providing groupings of existing scales *The Handbook of Scales in Tourism and Hospitality Research* serves as the state of the art reference book in the field of tourism, hospitality and allied fields such as leisure, recreation and services management.

Food Tourism

A Practical Marketing Guide

John Stanley and **Linda Stanley**, John Stanley Associates, Australia

The fastest growth in tourism is the culinary sector. Covering farmers' markets, agri-entertainment, glamping, restaurants, farm shops and more, food tourism is both an important part of holidaying and a purpose in itself. This book provides an overall direction to the development of food tourism and a section on the future of this trend.

Dogs in the Leisure Experience

Neil Carr, University of Otago, New Zealand

This book explores the social and cultural constructions and debates of dogs and leisure. It looks at working dogs and considers the differing roles and changing acceptance of dogs' involvement in sport. Within the setting of the animal welfare and sentience debates, it examines the leisure needs of dogs and their owners.

Creating Experience Value in Tourism

Edited by **Nina K. Prebensen**, University of Tromsø, Norway, **Joseph S. Chen**, Indiana University at Bloomington, USA and **Muzaffer Uysal**, Virginia Tech, USA

This book evaluates vacation experience value, as it is created and co-created by the tourist engaging in the experience, for himself, other tourists and the tourism firm. Providing a framework to distinguish among key resources or antecedents of customer value, this book also considers consumer behaviour.

July 2014 / HB / 288 pages / 9781780643489

Ideological, Social and Cultural Aspects of Events

Edited by **Omar Moufakkir**, Group Sup de Co La Rochelle, France and **Tomas Pernecky**, Auckland University of Technology, New Zealand

This book addresses the social and cultural side of events and explores the role events

have in fostering change and community development. It examines the transformatory function of events in the context of development studies – as phenomena that can promote and facilitate human development, including social, societal and individual change.

December 2014 / HB / 208 pages / 9781780643526

Tourism Enterprise Developments, Management and Sustainability

David Leslie, formerly of Glasgow Caledonian University, UK

The environmental quality and popularity of a tourist destination is the outcome of sustained development. This book therefore examines the tourism business in terms of 'greening' the local economy, people and environment, establishing the green agenda and investigating its application to the tourism sector.

Tourism Crisis and Disaster Management in the Asia-Pacific

CABI Series in Tourism Management

Edited by **Brent W. Ritchie**, University of Queensland, Australia and **Kom Campiranon**, Dhurakij Pundit University, Thailand

The Asia-Pacific area is one of the fastest growing tourism regions and a major driver of global tourism in general. Tourism industries in the Asia-Pacific have been challenged in recent years by a number of major crises and disasters including terrorism, outbreaks, natural disasters and political crisis. This book contributes to the understanding of crisis and disaster management generally, but with a specific focus on the Asia-Pacific. With contributions by international scholars and practitioners, the book discusses both the theoretical and the practical approaches towards successful crisis and disaster management.

Research Themes for Events

Edited by **Rebecca Finkel**, Queen Margaret University, UK, **David McGillivray**, University of the West of Scotland, UK, **Gayle McPherson**, University of the West of Scotland, UK and **Peter Robinson**, University of Wolverhampton, UK

Events management as a subject has been well documented from a practical angle, but this is the first book to cover events from a research perspective. Subjects on consumer behaviour, authenticity and new technologies are included, and the research angle is covered by addressing key concepts, theories and discussions centring on these subjects.

October 2013 / HB / 192 pages / 9781780642529
£70 / €90 / \$130

www.cabi.org/bookshop/book/9781780642529

Nautical Tourism

Edited by **Tihomir Lukovic**, University of Dubrovnik, Croatia

Nautical tourism as an industry has been developing rapidly in scope and economic status and continues to do so. This book provides a timely analysis of nautical tourism in Europe, examining the provision and

expansion of nautical tourism in economies at different stages of development.

July 2013 / HB / 256 pages / 9781780642444
£80 / €105 / \$150

www.cabi.org/bookshop/book/9781780642444

Garden Tourism

Richard W. Benfield, Central Connecticut State University, USA

This book traces the history of garden visitation and examines tourist motivations to visit gardens. Useful for garden managers and tourism students as well as casual readers, it also examines management and marketing of gardens for tourism purposes, before concluding with a detailed look at the form and tourism-based role of gardens in the future.

Medical Tourism

John Connell, University of Sydney, Australia

Tourism has long been associated with improved health, resulting in a boom of spas, yoga and rejuvenation treatments. *Medical Tourism* looks at the background and rise of health tourism, new emerging facets of the sector, and examines how medical tourism

benefits local health care providers, economies and the tourism industry as a whole.

International Volunteer Tourism Integrating Travellers and Communities

Stephen Wearing, University of Technology, Sydney and **Nancy Gard McGehee**, Virginia Tech, USA

Concentrating on the experience of the volunteer tourist and the host community, this book builds on the view of volunteer tourism as

a positive and sustainable form of tourism to examine a broader spectrum of behaviours and experiences and consider critically where the volunteer tourist experience both compliments and collides with host communities.

Cultural Tourism

Edited by **Razaq Raj**, Leeds Metropolitan University, UK, **Kevin Griffin**, Dublin Institute of Technology, Ireland and **Nigel D. Morpeth**, Leeds Metropolitan University, UK

This book provides a broad discussion of cultural tourism as a concept and the way it is implemented in diverse regions around the world. It addresses the notion of cultural tourism, what it means to tourism as an industry, and types of cultural tourism offered to tourists. The book features international case studies on specific instances of cultural tourism.
