

Forest Science

the complete online forest science information service that covers forestry, wood science and agroforestry research

what is the Forest Science Database?

Updated weekly, the database supplies bibliographic information and abstracts for all aspects of agroforestry, forestry, tree biology, land use and wood science. Climate change effects, deforestation, forest logging and urban forestry are key areas covered by the resource.

Forest Science Database (a subset of CAB Abstracts) contains:

- over 1.1 million scientific abstracts covering the last 75 years
- weekly updates, with over 46,000 records added per year
- English summaries for literature from over 100 countries
- over 30,000 full-text records, including:
 - all relevant publications by the Center for International Forestry Research (CIFOR), Ontario Forest Research Institute (OFRI) and the Forest Research Institute, Bulgarian Academy of Sciences
 - all relevant conferences by the International Tropical Timber Organization (ITTO) and the Institute of Chartered Foresters, UK

who uses it?

An essential resource for foresters, scientists, environmental consultants, policy makers and others actively involved in research or decision-making in agroforestry, forestry, wood science, and the forest and timber industries.

why use it?

- you don't have to scan the ever-increasing scientific literature – we've done it for you
- you'll find it easy to track down research that matters to you, because we've tagged all the important concepts
- as well as the best-known journals, we cover publications that other databases do not include

subscribe to Forest Science Database and benefit from

- up-to-the-minute access to research developments in forest science

take advantage of

- Smart Searches on key topics prepared for you by our information experts
- 'My Forest Science' personalisation feature allowing you to save your searches, save and export records, and subscribe to saved searches via RSS and eMail alerts so you can keep up to date with the latest content
- Search filters and refine options allow you to quickly drill down to the content you need
- CAB Thesaurus, the essential tool for indexing and retrieving information that allows users to search the database in a far more systematic and specific way than simply searching on free text
- navigating from abstract to CABI Full Text in just one click
- OpenURL compliance and support to serve libraries who wish to select and customise the links of most value to their users
- Forest Science news articles to keep you up to date on research in your field
