

CABI Microbial Services Prices from 1 January 2010

Identification	Price (excl VAT)
Isolation from a contaminated sample and identification to species level of predominant mould	£340
Identification of each additional organism to species level	£195
Fungal Sampling Kit	£75
Identification of a single pure culture of a mould, yeast or bacterium Normal rate: Priority rate:	£195 £300
Detailed identification report Normal rate: Priority rate:	£30 £45
Provision of sequence data Normal rate: Priority rate:	£30 £35
Molecular characterisation	
Molecular fingerprinting of a mould, yeast or bacterium	From £200
Molecular sequencing plus fingerprinting of a mould, yeast or bacterium Normal rate: Priority rate:	From £320 From £440
Supply	
Freeze dried culture	£145
Active culture on agar	£178
Genomic DNA	£364
Culture extract	£225
Testing	
Site consultancy UKAS accredited	From £4,000
Testing to BS EN60068/MIL STD 810 UKAS accredited	From £3,725
Fuel testing UKAS accredited	£250
Challenge testing	On request
Other testing prices on request, dependent on requirements	
Preservation and patenting	
Safe Deposit 'Gold' option: Molecular strain definition of stored strains including comparison against type strains and biannual viability check	£560 + yearly charge
Safe Deposit Standard option: Preservation and one year safe deposit	£225
Annual safe deposit charge	£105
Biannual viability check	£50 per strain
Freeze drying of a microorganism	£170
Patent deposit	From £675
Genetic integrity after storage	From £560

- Listed prices are for single samples. Bulk orders are available on request
- Excludes postage & packing. (Quoted on an individual basis)
- VAT will be charged where applicable
