"It is not the strongest of the species that survives,
nor the most intelligent that survives.

It is the one that is the most adaptable to change."

Charles Darwin

UNDERSTANDING THE RECORD INFORMATION

Each record comprises:

Genus Species and Author The taxonomy of weeds is very fragmented and many sources used old names. Rather than update these old names they have been left as published by the source author and links provided between synonymous and current names. While all effort has been made to determine the appropriate links between related records, it is possible some may have been overlooked or never determined. With the large number of sources used to determine synonymy it was common to encounter differences of opinion as to the correct name and a decision, right or wrong, had to be made.

Plant FAMILY Again, decisions right or wrong, had to be made.

Alternate Names Are only listed when they are referred to elsewhere in the compendium. Listed alternate names will refer to the current name and the current name will refer to all listed alternate names. This removes the need for an index. Some of these references may refer to the same record, I have tried to remove these occurrences but some may remain. Be aware that they exist and alert me of such finds if possible.

Common Names Are not listed in this compendium. They create too much confusion and add little value to the compendium. Common names also require an extensive index listing which is not needed when the alternate scientific names are internally referenced.

USAGE COMMENTS

The number after each section represents the number of species in the compendium with this status.

Cultivated Plants that are considered worthy of commercial cultivation or grown by collectors. In many cases these are garden plants, but this category can also include crops. (17,446)

Pasture Plants specifically grown for grazing or fodder production for stock or native species that are utilized for the grazing of stock. (1,441)

Forestry Species used for timber or fire wood production. (766)

Toxic Where a species is documented as toxic. The level of toxicity or parts considered most toxic are often difficult to determine, as sources rarely indicate this. These factors and the varying susceptibility of different species from humans to livestock to wildlife should all be considered. (2,965)

Parasitic Plants known to be parasitic on other plants. (328)

Arid and Aquatic This section is a basic measure of a plant's ability to survive, by avoidance or adaptation, in either environmental extreme. Some species can survive either extreme while others can establish only during a period of good conditions. This listing is not complete and is only an indication of a capacity to grow under either extreme of moisture availability. Some species noted as arid may be annuals that only appear in good conditions, set seed and then die off. Perennials may only establish under good conditions, then survive extreme droughts. The use of aquatic is to flag a species capacity to survive under very wet conditions from herbs, trees or shrubs in saturated soils to free floating aquatics. (Arid – 2,494, Aquatic – 2,317 and both - 305)

Crop Any species grown by humans for food or some other utility use. Some timber and pasture species may also be noted here, it is often difficult to pull these apart at times. (910)

For those species with three or more references the total number is given in brackets just prior to the reference codes.

REFERENCE SOURCE CODES (see Table 1.)

Numerical codes for references used in the Compendium (see alpha sorted variation in Appendix 1).

STATUS CODES: A group of relatively standard descriptors were used to form the status field of the dataset. In a departure to the first compendium this edition lists the status code after each reference source code so readers can be certain of a species status as defined by each individual reference.

A – Agricultural Weed Species commonly found in or impacts on any harvested commodity be they broadacre crops, plantations, orchards, small vegetable plots etc. (10,107)

C - Cultivation Escape Species may have escaped from gardens, cultivation or both; source not specific but includes some crop and pasture species. (4,463)

E - Environmental Weed Species that invade and impact on native ecosystems. (4,980)

G - Garden Escape Garden species known to have escaped, either directly by seed or other propagules moving out of the garden, or indirectly by establishing from dumped garden waste. Other garden escapes originate from abandoned gardens, graveyards and commercial waste disposal sites, to name just a few. (3,072)

I - Invasive Species may have escaped from gardens, cultivation or both; source not specific but includes some crop and pasture species. (4,186)

N - Naturalised Species has self-sustaining and spreading populations with no human assistance, but does not necessarily impact upon the environment. A species' capacity to naturalise in foreign environments, however, is a good indicator of its weed potential. (18,048)

nc – unconfirmed naturalisation Some records indicate that a status of Naturalised was possible but not yet confirmed or the record claims that the species is present but is not clear on its naturalisation status. (791)

Q - Quarantine Weed Species prohibited entry under a country's quarantine laws, either because it's not present or present and under a management program. (1,818)

S - Sleeper Weed Species that have been identified as present and posing a future threat. Often the source of these references has already been proved correct by other publications acknowledging the impacts of the species. (526)

U - Casual Alien These species appear with no direct (apparent) human assistance, survive, possibly set seed, but do not persist. They then may appear again some seasons later, but do not develop persistent populations. (7,002)

v - Native Weed Species that are native to the country in which they are considered weedy. Sometimes it is difficult to determine if the species has spread outside its native range within its country of origin or is just weedy within its native range, as sources are often state or regionally based. (492)

W - Weed Most common term used. These plants are nearly always economic weeds (i.e., pests of agriculture, horticulture, turf, nurseries etc.). The source details can sometimes give an idea of the type of weed, but are not conclusive in all cases. (17,882)

X – Noxious Weed Species that landholders are required by an act of law to manage, control or eradicate. For some countries this term also encompasses quarantine species (i.e., US Federal Noxious Weeds). (1,595)

Z – Contaminant Species that have been documented as a contaminant, usually as seed but potentially as other propagable plant parts.

NOMENCLATURE AND ERRORS

Every attempt has been made to retain the original species names as supplied by the authors in each source. At times, where there have been spelling errors, some records have been changed and more than likely, but hopefully not too frequently, errors may have been made at this end of the data daisy chain. Some spelling errors or variations may not have been detected in the screening process when adding new data sources. For these and any other errors the author takes full responsibility and apologises in advance. It would be appreciated if readers finding errors could advise the author.

Author's email address: rod.randall@agric.wa.gov.au

CASCADING SOURCES

Frequent readers will quickly recognise that several sources regularly appear together. This should in no way be taken as a reliable measure of the weediness of a species, it should rather lend greater weight to the original source, which has prompted this cascade of reporting (i.e., an original reference being continually cited by other authors). This phenomenon is certainly not new, nor restricted to the study or reporting of weeds.

INTERPRETING THE DATA

The simplest measure of the weediness of a species that can be drawn from this compendium is the number of sources, combined with the range of weed types that have been allocated. For example, a species may have twelve sources attributed (taking into account any cascaded sources), but is only ever considered a 'weed' in the status section.

Another species may have six sources, but be considered a noxious, quarantine and environmental weed, plus a garden escape and casual alien. All other considerations being considered equal, the second species should pose a greater potential threat because of its demonstrated plasticity.

That said a single weed related reference for a species doesn't mean that this species is any less of a weed than a species with six, twelve or 200 references. Every species listed here is a weed somewhere, it is up to the informed reader to determine if that species will have potential elsewhere.

DATA SOURCES

For most published books and articles the conventional citation is usually sufficient, but where it would assist the reader any other appropriate information has been included. There are several personal communication sources, these will provide as much information and background as necessary to validate the credentials of the source. Also provided is a geographically sorted list of the source codes to assist people in compiling regional weed lists from the data sources. (See Appendix 2.)

The main database (Randall, 1996 - 2012) that was used to construct this document contains 2.7 million records from many thousands of data sources, including the complete floras of some countries and numerous naturalised flora lists from many dozens of countries and regions. These range in size from a handful of records sourced via personal communications, up to the 85,000 record dataset from the Flora of North America. This database was the main source of the status, characteristics and nomenclature as listed being derived from many hundreds more databased references.

ACKNOWLEDGMENTS

Over the sixteen plus years of the development of this data set a great many people have had input, either directly or indirectly. It would be foolish now to try and attempt to list all the names of those who have helped, needless to say it's a long list and certainly some names would be forgotten so its best not to try and list you all but just thank one and all for all their generous help over the years.

gigantea
Poaceae
904-U
- Arundinaria japonica* Siebold & Zucc. ex Steud.
Poaceae
= *Pseudosasa japonica* (Sieb. & Zucc. ex Steud.) Makino ex Nakai
Cultivated
328-E
- Arundinaria maling* Gamble
Poaceae
1124-A
- Arundinaria pusilla* A.Chevalier & A.Camus
Poaceae
Cultivated
209-A
- Arundinaria pygmaea* (Miq.) Asch. & Graebn.
Poaceae
See: *Pleioblastus distichus* (Mitford) Nakai, *Pleioblastus pygmaeus* (Miq.) Nakai, *Pleioblastus pygmaeus* (Miq.) Nakai var. *distichus* (Mitford) Nakai
Cultivated
Refs: 3
1020-N, 819-N, 204-W
- Arundinaria simonii* (Carrière) A.Rivière & C.Rivière
Poaceae
See: *Pleioblastus simonii* (Carrière) Nakai
Cultivated
Refs: 4
1020-N, 869-W, 819-N, 101-N
- Arundinaria* spp. Michx.
Poaceae
See: *Pleioblastus* spp. Nakai
Cultivated
Refs: 3
869-W, 782-CE, 73-E
- Arundinaria tecta* (Walter) Muhl.
Poaceae
= *Arundinaria gigantea* subsp. *tecta* (Walter) Muhl. (Walter) McClure
Cultivated, Pasture
218-W, 87-W
- Arundinaria viridistriata* (Regel) Makino ex Nakai
Poaceae
See: *Pleioblastus auricomus* (Mitford) D.C.McClint.
Cultivated
85-N
- Arundinella anomala* Steud.
Poaceae
= *Arundinella hirta* (Thunb.) Koidz.
Cultivated
431-W
- Arundinella bengalensis* (Spreng) Druce
Poaceae
Refs: 3
758-A, 431-W, 87-W
- Arundinella deppeana* Nees ex Steud.
Poaceae
1226-W, 890-W
- Arundinella hirta* (Thunb.) Koidz.
Poaceae
See: *Arundinella anomala* Steud.
Cultivated
Refs: 5
1207-A, 648-A, 286-W, 204-W, 87-W
- Arundinella hookeri* Munro. ex Keng
Poaceae
423-W, 244-A
- Arundinella leptochloa* (Nees) Hook.f.
Poaceae
Cultivated
1207-A, 87-W
- Arundinella setosa* Trin.
Poaceae
Cultivated

- Bidens polylepis* S. F. Blake
Asteraceae
= *Bidens aristosa* (Michx.) Britt.
Refs: 11
1278-N, 1104-W, 794-N, 725-N, 346-E, 287-N, 218-W, 87-W, 85-NW, 80-E, 42-U
- Bidens pseudocosmos* Sherff
Asteraceae
Refs: 3
1229-N, 765-N, 300-N
- Bidens radiata* Thuill.
Asteraceae
Refs: 5
1220-U, 1219-E, 272-W, 251-U, 87-W
- Bidens radiata* Thuill. var. *pinnatifida* (Trucz.) Kitam.
Asteraceae
286-W
- Bidens reptans* (L.) Don
Asteraceae
87-W
- Bidens riparia* Kunth
Asteraceae
87-W
- Bidens schimperi* Sch.-Bip. ex Walp.
Asteraceae
Refs: 3
1284-N, 980-A, 87-W
- Bidens serrulata* (Desf.) Poir.
Asteraceae
Cultivated
Refs: 4
1226-W, 890-W, 757-A, 735-W
- Bidens* spp. L.
Asteraceae
Cultivated
Refs: 5
930-A, 602-A, 543-A, 382-W, 198-N
- Bidens squarrosa* Kunth
Asteraceae
933-A, 157-W
- Bidens steppia* (Steetz) Sherff
Asteraceae
Refs: 3
980-A, 121-AZW, 87-W
- Bidens subalternans* DC.
Asteraceae
Cultivated
Refs: 44
1270-N, 1265-N, 1239-E, 1230-I, 1229-N, 1220-U, 1177-E, 1049-N, 1040-N, 1017-N, 1008-N, 951-W, 945-N, 924-A, 891-I, 876-NI, 869-W, 853-W, 819-N, 818-UI, 802-I, 775-I, 769-I, 765-N, 764-i, 738-I, 653-N, 638-I, 482-NI, 407-W, 405-I, 361-W, 354-N, 314-UZ, 300-N, 295-W, 270-A, 269-W, 255-W, 253-A, 251-I, 237-W, 236-A, 68-A
- Bidens subalternans* DC. var. *simulans* Sherff
Asteraceae
270-A
- Bidens subalternans* DC. var. *subalternans*
Asteraceae
270-A
- Bidens sulphurea* (Cav.) Sch. Bip.
Asteraceae
Cultivated
1071-N, 255-W
- Bidens tenuisecta* A. Gray
Asteraceae
314-UZ
- Bidens tinctoria* Baill.
Asteraceae
Refs: 3
1071-N, 984-I, 704-I
- Bidens tripartita* L.
Asteraceae
See: *Bidens comosa* (A. Gray) Wiegand, *Bidens connata* Muhl. ex Willd.
Cultivated
Aquatic - Refs: 51
1282-A, 1266-A, 1240-W, 1238-W, 1232-A, 1196-N, 1049-N, 1042-N, 1033-N, 1017-N, 1014-N, 998-A, 951-W, 946-W, 945-N, 944-Z, 919-N, 914-N, 889-A, 883-W, 869-W, 853-W, 819-N, 756-C, 712-A, 664-A, 648-A, 642-A, 519-N, 486-W, 431-W, 354-N, 327-E, 297-W, 286-W, 280-N, 275-A, 272-W, 269-W, 263-A, 253-A, 243-A, 198-N, 94-A, 87-W, 86-N, 85-NW, 70-W, 68-A, 44-A, 23-W
- Bidens tripartita* L. var. *repens* (D. Don) Sherff.
Asteraceae
431-W
- Bidens triplinervia* Kunth
Asteraceae
See: *Bidens humilis* Kunth
Cultivated
Arid. Refs: 3
1226-W, 890-W, 819-N
- Bidens triplinervia* Kunth var. *macrantha* (Wedd.) Sherff
Asteraceae
Cultivated
1220-U

- Bidens vulgata* Greene
Asteraceae
See: *Bidens frondosa* L. var. *puberula* Wieg., *Bidens vulgata* Greene var. *puberula* (Wieg.) Greene, *Bidens vulgata* Greene var. *schizantha* Lunell
Refs: 21
1243-N, 1220-U, 1154-AN, 1039-N, 1024-N, 1017-N, 946-W, 896-I, 889-AN, 819-N, 756-C, 708-U, 642-A, 482-NW, 314-UZ, 251-N, 218-W, 161-W, 87-W, 85-NW, 23-W
- Bidens vulgata* Greene var. *puberula* (Wieg.) Greene
Asteraceae
= *Bidens vulgata*
642-A
- Bidens vulgata* Greene var. *schizantha* Lunell
Asteraceae
= *Bidens vulgata*
642-A
- Bidens vulgatus* Greene
Asteraceae
642-A
- Bifora radians* M. Bieb.
Apiaceae
Cultivated
Refs: 36
1240-W, 1238-W, 1220-U, 1207-A, 1141-A, 1123-Q, 1039-N, 1038-N, 1019-N, 1013-N, 998-A, 977-A, 942-A, 889-A, 819-N, 773-N, 761-N, 732-A, 728-A, 687-A, 667-A, 653-N, 643-U, 400-NZI, 314-U, 272-W, 253-A, 243-A, 144-A, 101-N, 94-A, 87-W, 85-NW, 70-W, 44-A, 42-U
- Bifora* spp. Hoffmann
Apiaceae
243-A
- Bifora testiculata* (L.) Spreng.
Apiaceae
Cultivated
Refs: 26
1278-N, 1243-N, 1228-A, 1220-U, 1207-A, 1134-Q, 945-N, 944-Z, 869-W, 855-NX, 819-N, 794-N, 711-UC, 653-N, 611-Z, 417-A, 354-N, 314-U, 287-N, 272-W, 171-X, 101-N, 94-A, 87-W, 85-N, 70-W
- Bignonia capreolata* L.
Bignoniaceae
Cultivated
Toxic - Refs: 5
1104-W, 943-nc, 380-W, 218-W, 87-W
- Bignonia exoleta* Vell.
Bignoniaceae
= *Macfadyena unguis-cati* (L.) A.H.Gentry
923-A, 87-W
- Bignonia stans* L.
Bignoniaceae
= *Tecoma stans* (L.) Juss. ex Kunth
878-I
- Bignonia unguis-cati* L.
Bignoniaceae
= *Macfadyena unguis-cati* (L.) A.H.Gentry
Cultivated
Refs: 3
1207-A, 976-N, 87-W
- Bilderdykia aubertii* (L.Henry) Dumoptier
Polygonaceae
= *Polygonum aubertii* L.Henry
1238-W
- Bilderdykia baldschuanica* (Regel) D.A. Webber
Polygonaceae
= *Polygonum baldschuanicum* Regel
Cultivated
894-W
- Bilderdykia cilinodis* (Michx.) Greene
Polygonaceae
= *Polygonum cilinode*
642-A
- Bilderdykia convolvulus* (L.) Dumort
Polygonaceae
= *Fallopia convolvulus* (L.) Á.Löve
Refs: 15
1240-W, 1238-W, 1222-W, 1127-W, 1122-N, 944-Z, 642-A, 417-A, 382-W, 287-N, 272-W, 243-A, 241-N, 121-AZW, 70-W
- Bilderdykia dumetorum* (L.) Dumort.
Polygonaceae
= *Fallopia dumetorum* (L.) Holub
Refs: 3
1238-W, 272-W, 70-W
- Billardiera cymosa* F. Müell.
Pittosporaceae
Cultivated
354-N
- Billardiera cymosa* F.Muell. subsp. *pseudocymosa* (Klatt) L.W.Cayzer & Crisp
Pittosporaceae
354-N
- Billardiera fusiformis* Labill.
Pittosporaceae
See: *Sollya fusiformis* (Labill.) Briq.
Cultivated
354-N, 85-N
- Billardiera heterophylla* (Lindl.) L.W.Cayzer & Crisp
Pittosporaceae
See: *Sollya heterophylla* Lindl.
Cultivated
Refs: 7
1262-E, 1049-N, 880-E, 869-W, 855-N, 354-N, 85-N
- Billbergia pyramidalis* (Sims) Lindl.
Bromeliaceae
Cultivated
Refs: 4
943-nc, 261-CW, 179-W, 101-N
- Biophytum reinwardtii* (Zucc.) Klotz
Oxalidaceae
87-W
- Biophytum sensitivum* DC.
Oxalidaceae
Cultivated
Refs: 3
948-A, 87-W, 66-A
- Bischofia javanica* Blume
Euphorbiaceae
Cultivated, Forestry
Refs: 22
1197-Q, 1106-A, 1046-W, 976-N, 839-N, 788-W, 741-vI, 714-NI, 649-E, 617-CE, 301-N, 191-W, 179-EW, 151-E, 142-CE, 122-EX, 112-EL, 101-N, 85-N, 80-E, 22-W, 3-W
- Biscutella auriculata* L.
Brassicaceae
See: *Iondraba auriculata* (L.) Webb & Berthel.
Cultivated
Refs: 4
1154-U, 819-N, 314-U, 94-A
- Biscutella cichoriifolia* Loisel.
Brassicaceae
314-U
- Biscutella didyma* L.
Brassicaceae
See: *Biscutella didyma* L. var. *columnae* (Ten.) Halácsy
Cultivated
1228-A, 87-W
- Biscutella didyma* L. var. *columnae* (Ten.) Halácsy
Brassicaceae
= *Biscutella didyma* L.
1207-A
- Biscutella eriocarpa* DC.
Brassicaceae
819-N
- Biscutella laevigata* L.
Brassicaceae
Cultivated
Refs: 4
1205-Q, 314-U, 94-A, 87-W
- Biserrula pelecinus* L.
Fabaceae - Papilionaceae
See: *Astragalus pelecinus* (L.) Barneby
Cultivated, Pasture, Crop
Refs: 5
1220-U, 819-N, 354-N, 314-U, 70-W
- Bistella digyna* (Retz.) Bullock
Vahliaceae - Saxifragaceae
= *Vahlia digyna* (Retz.) Kuntze
221-W
- Bistorta affinis* (D. Don) Greene
Polygonaceae
See: *Persicaria affinis* (D.Don) Ronse Decr.
Cultivated
1243-N, 711-UC
- Bistorta amplexicaulis* (D. Don) Greene
Polygonaceae
See: *Persicaria amplexicaulis* (D. Don) Ronse Decr., *Polygonum amplexicaule* D.Don
Cultivated
Refs: 3
1220-U, 711-UC, 400-U
- Bistorta bistortoides* (Pursh) Small
Polygonaceae
= *Polygonum bistortoides*
See: *Polygonum bistortoides* Pursh
642-A

- Bistorta officinalis* Delarbre
Polygonaceae
See: *Persicaria bistorta* (L.) Samp.,
Polygonum bistorta L.
Cultivated
Refs: 3
1243-N, 507-U, 85-N
- Bistorta vivipara* (L.) Delarbre
Polygonaceae
(L.) S.F. Gray = *Polygonum viviparum*
See: *Persicaria vivipara* (L.) Ronse
Decr., *Polygonum viviparum* L.

- Freesia caryophyllacea* (Burm. f.) N.E.Br.
Iridaceae
See: *Freesia elimensis* L.Bolus
Cultivated
1134-Q
- Freesia corymbosa* (Burm. f.) N.E.Br.
Iridaceae
Cultivated
764-i, 101-N
- Freesia* x *hybrid* sensu
Iridaceae
= *Freesia alba* (G.L.Mey.) Gumbel. x *Freesia leichtlinii* Klatt, as naturalised in Australia
Cultivated
Refs: 14
1278-N, 1049-N, 869-W, 856-N, 855-N, 819-N, 812-UC, 794-N, 519-N, 314-C, 198-N, 189-E, 176-N, 9-N
- Freesia laxa* (Thunb.) Goldblatt & J.C.Manning
Iridaceae
See: *Anomatheca laxa* (Thunb.) Goldblatt, *Lapeirousia cruenta* (Lindl.) Benth. ex Baker
Cultivated
Refs: 5
1262-E, 660-G, 354-N, 310-N, 101-N
- Freesia laxa* (Thunb.) Goldblatt & J.C.Manning subsp. *laxa*
Iridaceae
Cultivated
869-W, 354-N

- Freesia laxa* (Thunb.) Goldblatt & J.C.Manning 'Sunset Boulevard'
Iridaceae
Cultivated
624-N
- Freesia leichtlinii* Klatt
Iridaceae
Cultivated
Refs: 4
869-W, 649-E, 85-N, 72-E
- Freesia leichtlinii* Klatt x *Freesia refracta* (Jacq.) Klatt
Iridaceae
Cultivated
945-N, 334-CW
- Freesia refracta* (Jacq.) Klatt
Iridaceae
Cultivated
Refs: 26
1174-U, 1142-N, 1089-N, 1040-N, 1035-N, 1031-N, 1030-N, 1024-N, 1017-N, 1012-N, 1008-N, 991-N, 919-N, 906-W, 898-N, 819-N, 807-W, 718-N, 662-N, 637-N, 534-N, 280-N, 251-N, 189-E, 34-CW, 15-N
- Freesia* x sp. nom. hort.
Iridaceae
Cultivated
296-E
- Freesia sparrmannii* (Thunb.) N.E.Br.
Iridaceae
Cultivated
1134-Q
- Freycinetia ponapensis* Martelli
Pandanaeae
230-N
- Fritillaria imperialis* L.
Liliaceae
Cultivated
Toxic - Refs: 5
1255-U, 907-W, 819-N, 809-U, 80-E
- Fritillaria meleagris* L.
Liliaceae
Cultivated
Toxic - Refs: 9
