

CABI Training

Course Title: Identification of Environmental Fungi

Date: 17-18 April 2012

Presented by staff from CABI, this course provides expert tuition in identification of environmental fungi.

It will be of particular value to those working in the pharmaceutical, food and biotechnology industries, scientists working in environmental mycology and laboratory personnel involved in quality control of clean rooms, products and industrial processes.

We have over 80 years' experience in microbial identification. Our scientists are world experts in identifying, preserving and maintaining microorganisms and we have a long history of training scientists from around the world.

Programme

The two-day programme includes lectures and practical demonstrations. Course participants will have opportunities to discuss aspects of their work with tutors and to improve their skills and knowledge of:

- techniques for examining fungi
- use of diagnostic media
- classification of fungal groups
- identification, sources and hazard status of key environmental and laboratory species

Training resources will include a comprehensive course manual together with authoritatively named cultures and demonstration slides.

Venue: CABI, Bakeham Lane, Egham, Surrey, TW20 9TY, England

CABI houses the UK National Collection of Fungus Cultures. The CABI Genetic Resources Collection is recognized as one of the world's most important collections of fungi and bacteria and consists of over 28,000 living specimens.

Course cost and registration

The course costs £1450 (excluding VAT) and includes buffet lunches & refreshments
