

Environmental Impact

The complete Environmental Impact internet resource that covers climate change and other human influences on the biosphere

what is Environmental Impact?

CABI's Environmental Impact is an internet resource created in response to demand from the scientific community, policy makers and information specialists for a single comprehensive bibliographic information resource covering all major aspects of mankind's influence on the environment.

vital stats

- over 2 million bibliographic records (derived from CAB Abstracts)
- over 7,700 serials indexed, plus non-serial publications including books, reports, theses and conferences
- over 74,000 specially collected full-text documents linked from the internet resource
- over 310 relevant CAB Reviews articles
- over 220 CAB eBooks from our environmental science list, including over 5,400 chapters
- over 930 news articles to keep you up to date on the latest developments

who uses it?

- lecturers, researchers and students
- government scientists and policy makers
- environmental protection agencies
- climate change campaign groups
- development project workers
- donor agencies

unique features

- the bibliographic database includes records from CAB Abstracts and CAB Abstracts Archive dating back to 1910, and is updated weekly
- full text documents available include conference papers, journal articles and bulletins including the full-text of:
 - Ontario Forest Research Institute (OFRI) bulletin series: *Climate Change Research Report*
 - all relevant publications by Bioversity International, Center for International Forestry Research (CIFOR), International Water Management Institute (IWMI), Euro-Mediterranean Center on Climate Change, International Centre for Integrated Mountain Development (ICIMOD) and the WorldFish Centre (formerly ICLARM)
 - all relevant conferences by the Agronomy Society of New Zealand, European Grassland Federation, National Institute For Agricultural Machinery, Bucharest (INMA), International Tropical Timber Organization (ITTO) and the Institute of Chartered Foresters, UK
- CAB Reviews – specially commissioned, peer-reviewed articles written by specialists
- News articles covering current topics and an events calendar
- CAB eBooks – Environmental Impact is the first of our subject-based internet resources to include content from CAB eBooks it features the entire set of CABI's environmental books published since 2000

what does it cover?

The subject coverage of this resource focuses on all aspects of the effects of climate change on the terrestrial, coastal marine and freshwater biosphere, mitigation strategies and other adverse influences of humans on the environment including:

climate change effects related to:

water resources / soils / crop production / plant pests and diseases / agrometeorology / agroforestry and non wood forest products / invasive species / human and animal health / economic aspects / rural development / tourism

other effects of humans on the biosphere including:

deforestation / pollution / habitat loss / watershed stability / land diversion / loss of land due to urban development / species losses due to human activities

adaptation and mitigation strategies including:

fuelwood and biofuels / creation of habitat corridors / cropping systems designed to sequester carbon / restoration ecology / bioremediation / animal conservation
