

VetMed Resource

The complete online veterinary information service – the perfect support tool for research and continuing education

what is VetMed Resource?

VetMed Resource is the most comprehensive collection of published veterinary scientific information available online and it has three times the coverage of any comparable open source database.

At its core is a database of the published literature on all aspects of veterinary science.

all the veterinary information from CAB Abstracts

it contains:

- over 2.2 million bibliographic records, dating back to 1972
- over 25,000 records added annually
- over 145,000 records with full text articles from journals, conference proceedings and other material

'Smart searches' are provided to give you the best results from the database, and there are contact details for you to request help in searching.

who uses it?

VetMed Resource is an essential online tool for veterinarians, researchers, policy makers, students and teachers, providing an evidence base to support decision making, continuing education and professional development.

why use it?

- no more need to scan the ever-increasing scientific literature or news sources
- access current research developments in veterinary science
- easily find the research that is relevant to you because we've tagged important concepts for retrieval
- a large and growing collection of full text content (over 145,000 records)
- flexible searching options that help you search according to your needs and level of expertise
- discover journals and publications that aren't covered by other databases
- news and reviews sections that help interpret the vast amount of data available
- mark specific records for printing or exporting to bibliographic software such as EndNote, ProCite and Reference Manager

access VetMed Resource now and benefit from

- a wealth of current and historical research in veterinary medicine
- specially commissioned, peer-reviewed articles written by experts in their field
- news reports on developments in veterinary medicine
- instant access to the Animal Health and Production Compendium
- Datasheets on major diseases of pigs, poultry and ruminants
- the best available evidence for your practice needs
- access to more than 170 CABI book chapters

“to maximize journal coverage and avoid missing potentially relevant evidence, CAB Abstracts should be included in any veterinary literature search.”
