

CABI Microbial Services Prices from 1 January 2017

Identification	Price (excl VAT)
Fungus (mould), yeast or bacteria identification per single pure culture. Normal/ priority rate:	£220/ £340
Detailed identification report. Normal/ priority rate:	£40/ £55
Provision of molecular identification sequence data. Normal/ priority rate:	£35/ £40
Molecular characterization	
DNA fingerprinting of a fungus, yeast or bacterium (bespoke service). Normal/ priority rate:	On request
Microbial Testing	
Fungal Sampling Kit (FSK) or Environmental Monitoring Kit (EMK)	£89
Analysis of FSK or EMK for predominant microorganism (up to 10 samples)	£366
Isolation and identification of predominant microorganism from one sample	£366
On site sampling for fungal isolation UKAS accredited	From £4,200
Mould growth testing including BS EN60068/MIL STD 810 UKAS accredited	From £4,300
Assessment of microbial contamination of fuel from one sample	£260
Other testing dependent on requirements	On request
Culture Supply	
Freeze dried culture	£150
Active culture on agar	£200
Culture extract	On request
DNA	On request
Microorganism Preservation and Patenting	
Patent deposit	From £600
Safe Deposit Service (enhanced service options including molecular strain definition of stored strains, comparison against type strains and biannual viability checks are available at additional cost)	£250 + yearly charge
Annual safe deposit charge	£140
Annual viability check	£65 per strain
Contract freeze drying	From £200
Genetic integrity after storage	From £600

- Listed prices are for single samples. Bulk discounts are available on request.
- Excludes postage & packing. (Quoted on an individual basis).
- VAT will be charged where applicable.
