15th European Symposium on Poultry Nutrition

is organized by the

Hungarian Branch of WPSA

in co-operation with the

Hungarian Scientific Organizing Committee

Dr. Ferenc Bogenfürst
University of Kaposvár, Faculty of Animal Science

Dr. Károly Dublecz
University of Veszprém, Georgikon Faculty of Agriculture

Dr. Péter Horn
University of Kaposvár, Faculty of Animal Science

Dr. Miklós Mézes
Szent István University, Faculty of Agricultural and Environmental Sciences

Dr. Andrea Molnár
Institute for Small Animal Research

Dr. Margit Vetési
Szent István University, Faculty of Agricultural and Environmental Sciences

Organizing Committee

Dr. Péter Horn
Chairman

Dr. Károly Dublecz
Secretary

Members

Dr. Barna Forgách
consultant for research and development

Péter Földi
Poultry Product Board of Hungary

Dr. Anita Juhász
University of West-Hungary, Faculty of Agricultural and Food Sciences

Dr. László Pál
University of Veszprém, Georgikon Faculty of Agriculture
Contents

Session 1
Interaction between genotype and nutrition

Invited papers
Genotype x environment interactions in poultry with special reference to genotype nutrition interactions
  P. Horn

The endocrine and metabolic interface of genotype-nutrition interaction in broilers and broiler breeders
  E. Decuypere, O. Onagbesan, Q. Swennen, J. Buyse and V. Bruggeman

Sequence and comparative analysis of the chicken genome: A new challenge for poultry breeding and nutrition
  M.A.M. Groenen

Short communications
Nutritional effects of feed form, and wheat compared to maize, in the D+ and D- chicken lines selected for divergent digestion capacity
  B. Carré, S. Mignon-Grasteau, B. Svihus, A. Péron, D. Bastianelli, J. Gomez, J. Besnard and N. Sellier

Nutritional and genetic interactions in avian osteoporosis
  R.H. Fleming, H.A. McCormack, L. McTeir and C.C. Whitehead

Interactions between diet composition and genotype of broiler chickens on feed intake regulation

Effect of age upon digestibility of starch in chickens with different growth rate
  J. Zelenka and Z. Čerešňáková

Genotype – nutrition interactions in broilers; response to balanced protein in two commercial strains.
  C. Kemp, C. Fisher and M. Kenny

Posters
Genetic variation in broilers and predicted response
  R.M. Gous, C. Fisher and E.T. Berhe
Session 2
Recent developments in water-fowl nutrition

Invited papers
Effect of nutrition on the reproductive parameters of geese
F. Bogenfürst

Comparative characteristic of gastrointestinal tract development and digestibility of nutrients in young chickens, ducks and geese
D. Jamroz

Towards an optimal utilisation of phosphorus sources in growing meat ducks
M. Rodehutscord

Short communications
The effect of exogenous enzymes (amylase-protease-xylanase combination) on performance, liver and carcass characteristics of mule ducks
A. M. Debicki-Garnier, N. Robin and B. Messager

Alternative methods for reducing heat stress in the practice of lake integrated table duck production
T. Köszó, M. Vetési, L. Kiss, Á. Kiss and V. Darvas

Session 3
Alternative housing systems and their nutritional impact

Invited papers
Diet x genotype interactions in different housing systems
K. Elwinger

Alternative meat chicken production; is our nutritionnal knowledge sufficient for their further development in EU?
L.P. Borgida

Ventilation, a major but a paradoxal environmental parameter in broilers and turkeys development
S. Yahav

Short communications
Effect of housing system on balanced protein requirements in laying hens
R.M. Eits, R.P. Kwakkel, B.G.E. Reindsen, T. Zandstra and A.A. Maatman

Effect of free-choice feeding and feed restriction on the performance of free-range Zagorje turkeys
Z. Janječić, S. Mužic and D. Županić
Session 4
Effect of nutrition on skeletal development and maintenance in broilers and turkeys

Invited papers
Mechanisms and nutritional influences in skeletal development: Influence of macro- and microelements on bone formation
C. C. Whitehead

The interaction between the macrominerals calcium and phosphorous, vitamin D and phytase in broilers
G. Huyghebaert, M. Lippens, P. Lescoat and Y. Nys

The Role of Nutrition in Tibial Dyschondroplasia Occurrence in Turkeys
C. Nixey

Short communications
Performance, Gait Score and Calcium and Phosphorus Retention at Different Levels of Calcium and Phosphorus in Broiler Diets
S. Steenfeldt, P. Sørensen and B.L. Nielsen

Replacement of inorganic Cu, Mn, Fe and Zn with Bioplex on growth performance and faecal mineral excretion in broilers
L. Nollet, W. Wakeman and C. Belyavin

Effect of different phosphorus sources in broiler diets on the chemical composition and breaking strength of bones
L. Perić, N. Mišošević, V. Stančećev and D. Žikić

Effects of 25-hydroxy-cholecalciferol (Hy•D) at doses from 35 to 560 µg per kg feed on the performance of broiler chickens fed a diet based on maize, wheat and soybean meal
P. Philipps, R. Aureli, G. Weber and Anna-Maria Klünter

Effect of diet phosphate source and phosphorus level on Ca and P utilisation of broilers at different ages and final tibia parameters
E. Venäläinen, J. Valaja, E. Valkonen and E. Kuja

Posters
Effect of phytase supplementation of rapeseed cake-containing diets on performance and skeletal development in broilers
S. Smulikowska, A. Mieczkowska, C.V. Nguyen and D. Weremko

Effect of Natural Zeolite on Performance, and Tibia Ash of Broiler Chicks
H. Nassiri Moghaddam, M. Rezaei and A. Hassan Abadi

Effects of Boron Supplementation on Tibia Mineral, Ash and Weight Parameters and Peripherial Blood Leucocyte Percentages of Layers
V. Kurtoğlu, F. Kurtoğlu and F. Önder
The influence of *Enterococcus faecium* M-74 bacteria on bone mineralization in chickens

_E. Horniaková_

Efficacy and safety of a novel phytase in turkeys fed diets to market weight

*D.R. Ledoux, J.N. Broomhead and I. Kühn*

The reduction of mineral phosphorus source in diets for broilers and addition of phytase in conditions of temperature stress

*M. Lukić, Z. Sinovec, Z. Pavlovski, Z. Škrbić and R. Cmiljanić*

Performance and tibia bones quality in broilers fed diet supplemented with particulate limestone and 25-hydroxycholecalciferol

*J. Koreleski and S. Świątkiewicz*

Effect of Hy-D® addition on performance and slaughterhouse results of broilers

*Y. Santos and M.F. Soto-Salanova*

**Session 5**

**Strategies to improve gut performance**

**Invited papers**

The effect of natural alternatives for anti-microbial growth promoters in broiler diets

*L.A. den Hartog, A. Gutiérrez del Álamo Oms, J. Doorenbos and A. Flores Miñambres*

Secondary plant metabolites to control growth of *Clostridium perfringens* from chickens

*J. Žrustova, M. Ritter, K.P. Svoboda and J.D. Brooker*

Effects of nutrition on development of immune competence in chicken's gut-associated lymphoid system

*A. Friedman and E. Bar-Shira*

**Short communications**

MINTREX™ Zn and MINTREX™ Cu organic trace minerals improve intestinal strength and immune response to coccidiosis infection and/or vaccination in broilers

*J.D. Richards, T.R. Hampton, C.W. Wuelling, M.E. Wehmeyer, D. Parker and J.J. Dibner*

Is there a correlation between the nutritional value of wheat-based diets and efficacy of NSP-enzymes for broiler chickens as measured by a zootechnical and a balance trial?

*G. Huyghebaert, M. Lippens and R. Mombaerts*
The Effect of a Mixture of Herbal Essential Oils on the Performance of Broiler Chicks Originated From Young and Old Broiler Breeder Flocks

M. Çabuk, M. Bozkurt and A. Alçıçek

Alternatives for flavomicin in broiler chicken nutrition

A. Rutkowski, S. Kaczmarek and D. Józefiak

The effect of conditioning temperature and exogenous xylanase addition on the viscosity of wheat-based diets and the performance of broiler chickens.

A. J. Cowieson, M. Hruby and M. Faurschou Isaksen

Effect of glycerides and free short chain fatty acids replacing avilamycin in the diet of broiler chickens

M. Antongiovanni, A. Buccioni, F. Petacchi, A. Martini and S. Minieri

Efficacy of GalliPro - a microbial feed additive for broilers

B. Lund, S. Hansen and P. Kürti

Effect of Immunovet-HBM supplementation on layer-parents’ production

E. Bajcsy, E. Kósa, Á. Resetár and I. Sári

Posters

Effect of probiotics supplementation on immuno-competence and in prevention of experimental Salmonella gallinarum infection in broiler chicken

S.K. Khurana

Influence of Bacillus subtilis on broiler performance

Influence of Bacillus subtilis on immune-response of broiler chickens

A. Kőrösi Molnár, B. Podmaniczky, P. Kürti, M. Møerk Jensen, Zs. Farkas and Zs. Szabó

Effects of a graded supplementation of herbs and essential oils in broiler feed on growth and carcass traits

The effect of grind size and wet feeding of wheat-based diets on gastrointestinal tract development of broiler chicks

M. Afsharmanesh and T.A. Scott

Effect of dietary antibiotic, mannan oligosaccharide with or without oregano and hop supplementation on the growth performance and carcass characteristic of male broilers

M. Bozkurt, K. Küçükylmaz, A.U. Çatlı and M. Çınar
The Effect of Dietary Supplementation of Prebiotic, Probiotic and Organic Acid, either Alone or Combined, on Broiler Performance and Carcass Characteristics

*M. Bozkurt, K. Küçükyılmaz, A.U. Çatlı and M. Çınar*

Effect of Enzyme Supplementation to Improve Gut Performance of Broilers Fed Diets Containing Varying Levels of Wheat

*Z. Hayat, T.N. Pasha and Z. Nasir*

The nutritional efficacy of Hostazym X in relation to its dosage and difference in nutrient density with reference to 3 other NSP-enzymes in wheat-based broiler diets

*G. Huyghebaert and M. Lippens*

Physiological response of turkeys fed diets with a different content of fructooligosaccharides

*J. Jankowski, Z. Zduńczyk and J. Juśkiewicz*

Benefits of Feeding Bio-Mos to Commercial Broilers in a Large Scale Study

*A. Kocher, P. Geliot and L.A. Tucker*

Effects of Bio-Mos for laying hens 20-52 weeks under commercial conditions

*A. Kocher, P. Garcia and L.A. Tucker*

Effects of Bio-Mos supplementation on the performance of broiler chicks: a Serbian study

*L. Perić, G. Uščebrika, D. Žikić, M. Vranjes and L. Nollet*

Effect of probiotic inclusion in different levels of barley substitution for corn diets on laying hen's histological changes of duodenum

*A.H. Mahdavi, H.R. Rahmani and J. Pourreza*

Effect of supplementation of different treatments of sodium bentonite in feed on the performance of broilers

*T.N. Pasha, A. Mahmood, F.M. Khattak, M.A. Jabbar and A.D. Khan*

Effects of phytase and/or organic acids on broiler performance

*A.M. Pérez-Vendrell, L. Llauradó and J. Bruñau de Barberà*

Digestibility of amino acids in malted sorghum sprouts supplemented with polyethylene glycol, charcoal, phytase and xylanase, when fed to broilers

*O. Oduguwa, V. Pirgozliev and T. Acamovic*

Effect of dietary phytase on performance, metabolisable energy and endogenous losses of broiler chickens

*V. Pirgozliev, O. Oduguwa, T. Acamovic and M.R. Bedford*

Poultry Nutrition- Modulator of the Immune Response in Both Animals and Consumers

*A. Pop, I. Togoe, N. Constantin, G. Gajaila and E. Balint*
The Effect of Intestinal pH on Broiler Performance and Immunity
H.R. Rahmani, W. Speer and M. Modirsanei

Microbial Population of Broiler’s Ileum is Affected by Oil Extracted Propolis (OEP)
H.R. Rahmani, A. Tabatabaei and M.A. Edriss

The Acorn’s Tannin May Affect the Microbial Content of Broilers Ileum
H.R. Rahmani and A.H. Abarghoui

The effect of selected prebiotics on performance and ileal microbiota of broiler chickens.
A. Rutkowski, S. Kaczmarek and D. Józefiak

Enzyme supplementation of barley based diet for broilers
Gh. Sadeghi and A. Samie

Influence of Bio-Mos on broilers performances and gut morphology
Z. Sinovec, R. Markovic and D. Gledic

Effect of Dried Whey and Probiotic Supplementation on Growth Performance in Broilers
M. Torki and B. Molanapour

The Development and Use of Molecular Tools to Monitor the Gut Microflora of Poultry
V.A. Torok, K. Ophel-Keller and R. J. Hughes

Effect of mannan oligosaccharides (Bio-Mos) supplementation on the small intestine morphology of broiler chickens
G. Uščebrika, D. Žikić, L. Perič, L. Nollet and M. Vukić-Vranješ

Effects of mannanoligosaccharides on composition of the cecal microflora and performance of broiler chickens
S.A. Denev, I. Dinev, I. Nikiforov and V. Koinarski

Modified glucomannans prevent negative effect of ergot mycotoxin in layers
J. Dvorska

Effect of an organic acids and medium-chain fatty acids containing product in feed on the course of artificial Necrotic Enteritis infection in broiler chickens
G.F. Mathis, J.T.P. van Dam, A. Corujo Fernández and C.L. Hofacre

The influence of non-phytate phosphorus levels and phytase supplementation on broiler chucks performance
A. Karimi and M.M. Bedford
Effect of non-phytate phosphorus levels and phytase sources on performance in broiler chicks
   A. Karimi and M.M. Bedford

Benefit of NSP enzymes on corn soybean meal based diet in poultry
   S. Maisonnier-Grenier, P. Dalibard and P.A. Geraert

Supplementing drinking water with NSP-enzyme: an alternative solution to post-pelleting application
   S. Maisonnier-Grenier, K. Liu, M. Balasini, P. Dalibard and P.A. Geraert

Benefits of Bacillus subtilis supplementation in chicken diets

Methionine hydroxy-analogue: an efficient mean to reduce intestinal microflora activity
   Y. Mercier, P.M. Becker, J.D. van der Klis and P.A. Geraert

Intestinal viscosity and metabolizable energy in chickens and turkeys of different ages fed cereal-based diets with or without enzyme supplementation
   S. Palander, M. Näsi and P. Hägg

Effects of ACTIVATE™WD on Clostridium perfringens colonization and broiler performance using a necrotic enteritis model in broiler chickens
   M. Quiroz, C. Hofacre, J. Dibner, T. York, C. Knight, R. Gonzales and D. S. Parker

Field trial of Herb-Mos™
   L. Körösi, F. Iván and Gy. Kanyóné Princes

Calcium level modulate phytate conversion degree and type of phytase A effects on production traits and egg shell quality in laying hens
   K. Żyła, M. Mika, J. Koreleski and S. Świątkiewicz

Liquid and solid wheat starch in diets for broilers: effect on feed intake, foregut development and performance
   A.K. Mai, G. Bosch, A.F.B. Van der Poel and R.P. Kwakkel

The effect of Immunovet-HBM® supplement on broiler turkey production results
   E. Kósa, Gy. Nagy, L. Jakab, M. Hidvégi, Á. Resetár and I. Sári

Effect of different feed additives on the caecal microflora of broiler chickens
   L. Babinszky, G. Csitári, Sz. Tóth, L. Wágner, L. Pál and K. Dublecze

Impacts of organic acids and nutrient density of basal diets on broiler growth and gut histomorphology
   N. Senkoylu, H.E. Samli, H. Akyürek, A. Agma
Round Table

Feed formulation; principles and practice

Invited papers
The NIRS method to support practical feed formulation

    J.C. Bodin and J.M. Aubret

Determining the feed composition and feeding programme that will optimise the performance of a broiler flock

    R.M. Gous

Least cost feed formulation by linear programming: Limitations and Extensions

    A. G. Munford

Energy and amino acid systems for formulating poultry feeds

    C. Fisher

Posters
Estimation of the MEn-content of wheat for broilers by means of physico-chemical parameters and NIRS

    G. Huyghebaert, J. De Boever, M. Lippens and J. Vanacker

The use of near-infrared reflectance spectroscopy to predict the protein, fat and gross energy contents of broiler ileum content and broiler excreta.

    P. Philipps, R. Aureli, B. Cochin de Billy and A.-M. Klünter

Net Energy Requirement Models for Broiler Breeders, Laying Hens and Broilers

Standardised ileal digestibility of crystalline amino acids

    A. Lemme, H.S. Rostagno, A. Petri and L.F. Albino

Responses of growing broilers to varying dietary energy and balanced amino acid levels

    A. Lemme, C. Kemp, C. Fisher, M. Kenny and A. Petri

Other topics

Short communications
Responses of growing male broilers to graded threonine levels at low and adequate balanced dietary protein

    A. Lemme, J. Tossenberger and A. Petri

A comparison of pelleting and expander treatment on nutritional value of a broiler diet containing two different fat sources

    O. Zimonja and B. Svihus
Influence of Ochratoxin A on the performance of broiler chicken

S. Nitsch, E. Pichler, E.M. Binder and G. Schatzmayr 458

Posters

Relationship between Lysine Levels and Packed Cell Volume under Different Temperatures in Caged Broiler Breeders

A.A. Al-saffar 462

Effect of early feed restriction on broilers performance

A. Mahmud, F.M. Khattak, Z. Ali and T.N. Pasha 465

Protein (Amino acid) metabolism of high productive laying hens

A. Chudy 468

Modelling Energy Utilization In Laying-Type Pullets

N.K. Sakomura, R. Neme, E. Fukayama, F.B. Fialho and K.T. Resende 471

The influence of supplementation food with “Bio-Chrome” and “Sel-Plex” over the quantitative and qualitative collagen matter from broiler muscles

D. Curcă, L. Pantă and A. Pop 474

Effect of Sorghum Tannin on Egg Quality and Quantity of Laying Hen

M.R. Ebadi, J. Pourreza, S. Esmaeilkhanian and A.A. Gharadaghi 477

Kolanut husk as a partial substitute for maize in broiler diet

A.O. Fanimo, J. Abioye, A.M. Bamgbose, M.A. Dipeolu and O. Olubamiwa 481

Influence of the corn endosperm type on the in vitro starch digestion rate in the small intestine of broiler chickens

D. Grbesa, B. Homen and G. Kis 484

Natural betaine maintains layer performance in methionine/choline chloride reduced diets

M. Hruby, A. Ombabi and A. Schlagheck 487

Ileal apparent digestibility of nutrients in chickens at 7 and 21 days of life under feeding differed in protein level mixtures

T. Wertelecki and D. Jamroz 490

Polish dose response data demonstrate superiority of DL-methionine over liquid methionine hydroxy analogue in broilers.

A. Kaszuba, J. Koreleski, S. Świątkiewicz, W. Szczerke and A. Lemme 493

The effect of breed, gender, protein content of the starter diet and litter material on the performances of broilers

M. Lippens and G. Huyghebaert 496
Effect of Se (Sel-Plex®) in combination with α-tocopherol on fresh and frozen poultry meat

O. Pesut, L. Nollet and L. Tucker

Effect of Se (Sel-Plex®) in combination with α-tocopherol on GSH-Px activity and TBARS in plasma of broilers

O. Pesut, I. Jovanovic, L. Nollet and L. Tucker

Producing selenium enriched eggs by different Se-sources in the feed.

L.L.M. de Lange, G. Oude Elferink and L. Nollet

Impact of oregano essential oil on production data and lipid oxidation parameters in broiler chickens

R. Messikommer, S. Baltzer and C. Wenk

Effect of Feeding Powdered Nigella Sativa L. (Kalongi) Seeds on Poultry Egg Production and Their Suitability for Human Consumption

Z. Nasir, T.N. Pasha, Z. Hayat, H.I. Shakoor and M.S. Akhtar

Effect of the method of drying on the concentration of sialic acid in poultry excreta

V. Pirgozliev, S. Shanmugavelu and T. Acamovic

Influence of organic selenium food supplements on age-related changes on antioxidant system in thigh muscle of broiler chicken

J. Piršljin, S. Milinković Tur, B. Beer Ljubić, M. Zdelar-Tuk and N. Poljičak-Milas

Eggshell Quality is Improved by Excessive Dietary Zinc and Manganese

A. Zamani, H.R. Rahmani and J. Pourreza

Protein and valine gain of broilers in response to supplemented L-valine

M. Rodehutscord and A.A. Fatufe

A linear regression approach to compare precaecal amino acid digestibility in broilers, turkeys and ducks

H. Kluth and M. Rodehutscord

Effect of Hulled and Hull-Less Barley With and Without Beta-Glucanase Enzyme on Performance of Broiler Chicks

S.A. Tabeidian and M. Toghyani

Serum Biochemistry and Organs Weight of Broilers Fed with Raw and Treated Ervil (Vicia ervilia) Seeds.

Gh. Sadeghi, J. Pourreza, F. Khajehali and H.R. Rahmani

Digestible lysine and arginine levels of broilers in pre-starter ration

J.H. Stringhini, C.P. Cruz, M.S. Thon, M.B. Café, M.A. Andrade and N.S.M. Leandro
Effect of Dietary Cumulative Levels of Cotton Seed Meal on the Performance and Certain Blood Parameters of Broiler Chicks
  
  M. Toghyani, A. Gheisari and O. Saraeian

Effect of ω3 or saturated dietary fatty acids on lipid metabolism parameters in broiler chickens
  
  G. Ferrini, D. Menoyo, E. Esteve-Garcia and A. C. Barroeta

The interactions between balanced protein level and feed form in broiler production
  
  A. Lemme, J. van Wichen, P.J.A. Wijtten, D.J. Langhout and A. Petri

Varying protein and amino acid profiles with changing ballast protein concentration in diets for male broilers
  
  J. van Wichen, A. Lemme, P.J.A. Wijtten, A. Petri and D.J. Langhout

  
  S. Cadirci and W. K. Smith

Effect of using high levels of soybean meal on performance and carcass characteristics of broiler chicks
  
  M.A. El-Moniary

Inclusion of dust bathing materials in housing systems for layers can affect performance and functionality
  
  H. Hetland, B. Svihus and M. Choct

Effects of Delayed Placement and Dietary Lysine Levels on Performance and Diameter of the Skeletal Muscle Fibers of Broiler Chickens in the Starting Period
  

Effects of hull-less barley inclusion in corn-soy diet on the nutrients digestion of broiler chickens
  
  S.D. Sharifi, A. Yaghobfar, F. Shariatmadari and H. Manaft Rasi

Grinding size and grinding method and interaction with pelleting for wheat-based broiler chicken diets
  
  B. Svihus, O. Zimonja and K.H. Kløvstad Viken

Performance of Broilers Fed on Low Protein Diets Fortified with Graded Levels of Methionine
  
  M. Torki

Consumption of Se-enriched eggs improved Se status of human volunteers
  
  J.E. Dvorska, P.F. Surai, F.O. Yaroshenko, Y.F. Yaroshenko, F. Karadas and N.H.C. Sparks
Application of a sub-optimal protocol to evaluate broiler response to additional methionine supplied as either Alimet® or DLM
D.S. Parker, P. Hillebrand and P. Buttin

Preliminary results of study on the use of corn and rye distillers dried grains with solubles in the laying hens nutrition
S. Świątkiewicz and J. Koreleski

Effect of Extrusion of Corn on Nutrient Digestibility, Metabolizable Energy, and Performance in Poultry under Tropical Environment
N. Amornthewaphat, S. Lerdsuwan and S. Attamangkane

The effects of different Ochratoxin A contaminated starter diets on the performance and some physiological parameters of broiler chicks
K. Dublecz, A. Bányai, L. Pál, Á. Bartos, Sz. Tóth and L. Wágner

The effects of physical, chemical and enzymatic treatment on rapeseed meal N- digestibility and metabolizable energy in broilers and chick performance
S. Ghazi and M.T. Mirakzehi

Evaluation of three bioassay methods and apparent metabolizable energy of 5 Iranian barley cultivars in broiler chicks
A.A. Gheisari, A.H. Pourabadeh, K.E. Bach Knudsen, J. Pourreza, M. Mahloji and R. Bahadoran

Effects of Delayed Access to Feed and Different Crude Protein Levels in Broiler Chicks After Hatching 1. Performances and Digestibility of Nutrients
D. Gökçeyrek and İ. Çiftci

Effects of Delayed Access to Feed and Different Crude Protein Levels in Broiler Chicks After Hatching 2. Physical Development of Digestive System
D. Gökçeyrek and İ. Çiftci

Effects of Delayed Access to Feed and Different Crude Protein Levels in Broiler Chicks After Hatching 3. Morphological Development of Small Intestine Segments
D. Gökçeyrek and İ. Çiftci

Effects of Feeding Olive Cake and Barley Radicle as fiber sources on lipids, cholesterol and fatty acids in Hen Eggs
S.M. Hashish and L.D. Abd El-Samee

Large scale Sel-Plex™ trial in broiler breeder
L. Kőrösi, Z. Szőcs and A. Séllyei

The effect of feeding malted sorghum sprout on laying characteristics of domestic hens
A.O. Fafiolu, O.O. Oduguwa, C.O.N. Ikeobi and C.F.I. Onwuka
The Effects of China Tea (*Camellia Sinensis*) Supplementation in Laying Hen Diets on Production, Quality and Cholesterol Content of Egg

*P. Panja*

Effect of Dietary Amino Acids on the Production of Broilers

*L. Papesova, P. Tupy and A. Fucikova*

Effect of Ovocrack on performance and egg shell quality in laying hens.

*R. Wiltenburg and A. van der Lee*

Biotransformation - A successful way to deactivate T-2 toxin in growing broiler chickens

*U. Hofstetter, D. Schatzmayr and E.M. Binder*

Development of a competitive exclusion product for chicken meeting the regulatory requirements for registration in the EU

*R. Plail, V. Klose, M. Mohnl, D. Jölli, A. Klimitsch, G. Schatzmayr and A.P. Loibner*
Session 1

Interaction between genotype and nutrition
