Summary

The problem

Plantwise is a global programme led by CABI, which helps farmers lose less of what they grow to plant health problems.

What we are doing

Worldwide, over 500 million smallholder farmers provide food for two-thirds of the earth's growing population. Achieving a zero hunger world by 2030 depends on increasing the productivity of these smallholder farmers. Plantwise is a gateway to practical on-line and on-line plant health information, including

Results so far

significant threat, nearly an estimated 40% of crops grown worldwide are lost to plant health problems. Plantwise provides practical, on-line and on-line plant health information, including
