

PlantwisePlus

CABI Regional Consultation - June 2025

Ulli Kuhlmann

Executive Director, Global Operations & PlantwisePlus Programme Executive

PlantwisePlus (2021-2030) Programme goal

75 million smallholder farmers*
in **27** low- and middle-income
countries producing **more food**
using **safer** and **sustainable**
crop production practices,
thereby improving **food**
security and **rural livelihoods**.

*over 52.4m as of end 2024

CABI's global flagship programme

Target budget and funding consortium:

Overall budget 2021 - 2030 plan: £120m

Target budget scale-out phase 2024 – 2030: £12m/yr

Donors who are supporting the programme implementation globally:

Ministry of Foreign Affairs of the
Netherlands

Schweizerische Eidgenossenschaft
Confédération suisse
Confederazione Svizzera
Confederaziun svizra

Swiss Agency for Development
and Cooperation SDC

Sustainable crop production

PlantwisePlus will achieve this vision by supporting countries to **predict, prevent, and prepare** for plant health threats in the face of a changing climate

This ensures that both women and men smallholder farmers, reduce their crop losses and **produce** more and safer food through sustainable crop production practices

Impact pathways

Pest preparedness

Coordinating and strengthening systems for detection and response to pest outbreaks

Pesticide risk reduction

Increasing awareness of, access to, and use of affordable integrated pest management (IPM) solutions

Farmer advisory

Strengthening knowledge and building uptake of IPM practices through tools, trainings and business opportunities

Vision for 2030 – Pest preparedness

Pest prioritisation (national and regional)

- Strengthened systems using data-driven pest prioritisation to guide the efficient deployment of limited resources that are critical for the prevention of and response to new pest incursions.

Pest prevention and management (national)

- Improved coordination of planning and response to invasive transboundary pests and diseases, minimising the impact on food security and livelihoods.

Vision for 2030 – Pesticide risk reduction

Pesticide alternatives (national and regional)

- Increased awareness, access to and use of lower-risk, affordable IPM solutions, achieved through collective action by regulators, farmers and the private sector.

Classical biocontrol (CBC) (national and regional)

- Improved management of invasive species using classical biocontrol, which is a public good with no cost to farmers.

Augmentative biocontrol (national)

- Commercially produced augmentative biocontrol solutions used for priority pests, reducing the reliance on chemical pesticides.

Vision for 2030 – Farmer advisory

Digital tools and learning products (global)

- Inclusive and sustainable digital tools and learning products providing expert IPM advice and best practice to extension, agri-business, universities and farmers.

Plant clinic approach (national)

- Best practice advice on IPM disseminated across all PW+ countries through plant clinics and related outreach activities, building smallholder farmer knowledge and confidence.

Vision for 2030 – Farmer advisory

Agro-input dealer training and licensing (national)

- National authorities supported to develop new, or enhanced, mandatory government training schemes for agro-input dealers to improve knowledge of these critical service providers on sustainable plant protection.

Agribusiness development (national)

- Entrepreneurship opportunities supported for rural youth, women, and men by enabling them to develop and pursue new areas of agricultural service provision.

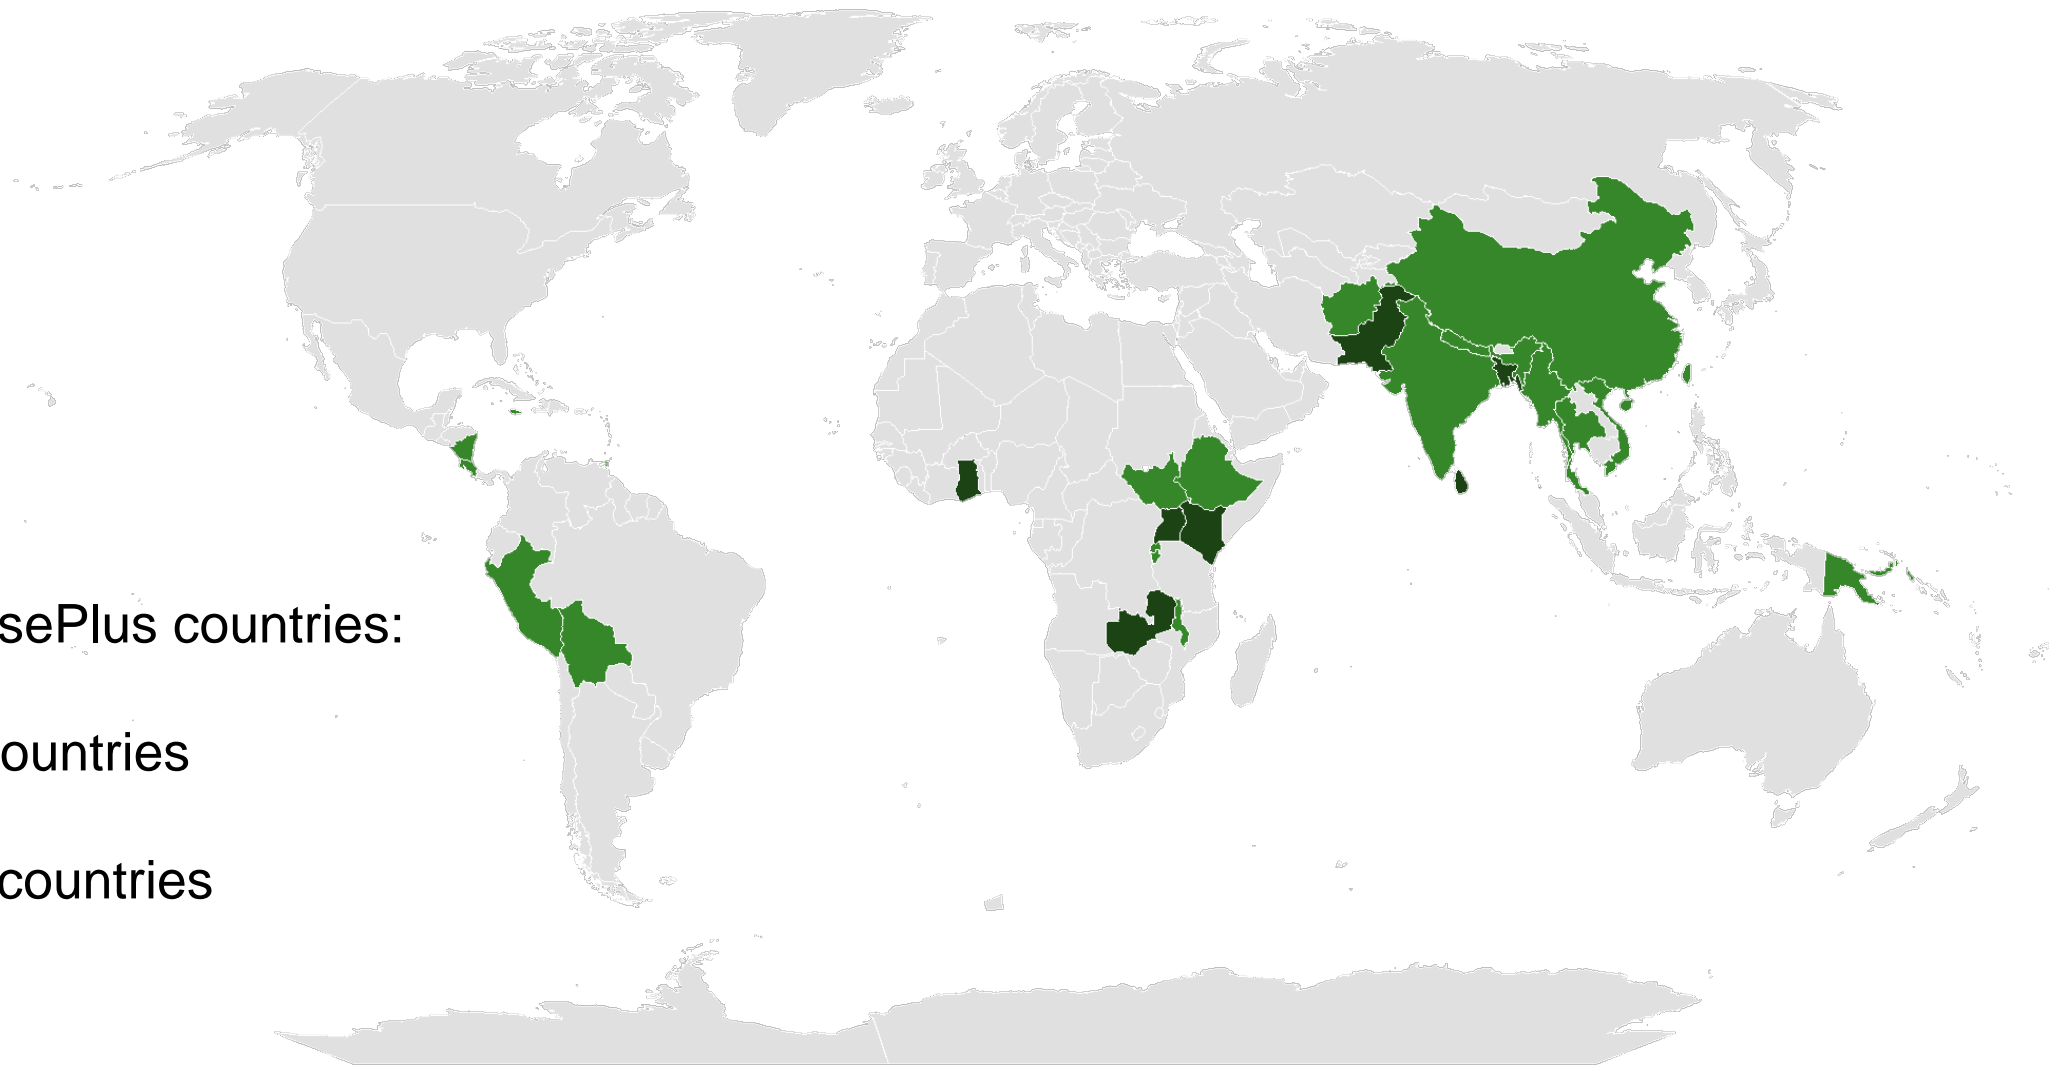

Where we work

27 PlantwisePlus countries:

20 core countries

7 focus countries

Programme offerings

Core country

- Pest prioritization (Horizon Scanning / Pest Risk)
- Digital tools and learning products
- Plant clinic approach

Focus country

- Core offerings **plus:**
- Pest prevention and management plans
- Pesticide risk reduction through sustainable IPM approaches
- Agro-input dealer training/licensing schemes
