

SciDev.Net Services for Member Countries

Juliet Tumeo, Senior Digital Marketing Manager

SciDev.Net

SciDev.Net is the world's leading source of reliable and authoritative news, views and analysis about science and technology for global development.

A part of CABI, SciDev.Net's mission is to use independent journalism to help individuals and organizations apply science to decision-making to drive equitable, sustainable development and poverty reduction. Last year SciDev.Net's content was seen or heard over 350 million times.

Script

Script is SciDev.Net's specialist science communication training programme and a leading provider of science communication training globally. It has trained researchers from more than 100 countries across all continents on how to communicate their research findings effectively to policymakers and the public.

SciDev.Net consultancy services

SciDev.Net has a global network of science journalists and communication specialists with expertise across regions and countries. It offers consultancy on communicating research findings in ways that engage regional stakeholders.

Services include:

- Online debates
- Supported articles (e.g. features, videos, data visualisations)
- Research communication training for researchers
- Science journalism training for generalist or new journalists.
- Networking events to connect journalists and researchers
- Science communication support, including websites and communication materials

Script Science Communication Training

Script is SciDev.Net's specialist science communication training programme. Script helps researchers communicate their work more effectively to policymakers, the media and the public.

Training topics include:

- How communicating science to the public and policymakers can boost your career and enhance society
- Practical ways to simplify scientific information without compromising its meaning
- How to make research findings interesting to the media, policymakers and the public
- How to successfully pitch your research to policymakers and the media in 2 minutes
- Structuring a media article about your research
- Unlocking the Power of Generative AI for Research Communication

Free webinar series for researchers in CABI Member countries

Through this training programme, CABI supports researchers in Member Countries to increase the visibility and practical impact of their research.

How Member Countries can benefit:

- ✓ Build researchers' science communication skills
- ✓ Strengthen engagement between researchers, policymakers and media
- ✓ Strengthen science communication capacity and outreach
- ✓ Access specialist science communication expertise
- ✓ Participate in free online training opportunities
- ✓ Support effective communication of scientific evidence
- ✓ Increase the public visibility of research and innovation

Science Granting Councils Initiative

The SGCI is a multilateral initiative that strengthens the capacity of Science Granting Councils across Sub-Saharan Africa to support research and innovation for development. SciDev.Net supports the initiative through science communication activities.

SciDev.Net support includes:

- Communication strategy development
- News articles highlighting SGCI research and its impact
- Website management and communication materials
- Knowledge-sharing and media engagement activities
- Science communication training and capacity building

SGCI participating countries

Tanzania Science Communications Project

SciDev.Net provides training and science communication support to the Tanzania Commission for Science and Technology (COSTECH), the University of Dar es Salaam (UDSM) and Muhimbili University of Health and Allied Sciences (MUHAS).

SciDev.Net support includes:

- Communication strategy development
- SciDev.Net editorial articles highlighting research from the three institutions
- Communication materials
- Knowledge-sharing and media engagement activities
- Science communication training and capacity building
