

Perspective and opportunities for research partnerships

Dr. Ambrose Agona
DG NARO

Presented at 1st Virtual Africa Regional Consultation meeting organized by CABI, 11th May 2022

Perspective on research partnerships

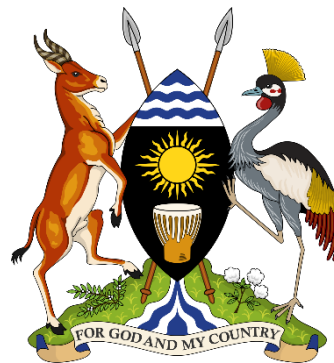

- Research partnerships should address and or contribute to:
 - ✓ Building resilience for sustainable food and climate systems
 - ✓ Building capacity for digital agriculture to leapfrog agriculture transformation
 - ✓ Building capacity for socioeconomic research to inform impactful investment decisions
 - ✓ Building capacity to understand, apply and explore gene editing (gED) to quick solutions
- They should be anchored on synergy and bridging gaps based on comparative advantages for enhanced innovation and efficiency

Opportunities for research partnership

- NARO conducts research in all aspects of Agriculture and there are several opportunities for partnership.
- In light of existing partnerships and depending on comparative advantages, priority research partnerships would be in the following broad areas:
 1. Information, Knowledge management and digital development
 2. Invasive species management
 3. Apiculture
 4. Ecotourism
 5. Animal/crop health
