eBooks

Many CABI titles are available in eBook format. These can be found through all major eBook retailers and institutional suppliers where available.

Please note: all details were correct at the time this catalogue went to press, but may be subject to change without notice. Please refer to www.cabi.org/bookshop for up-to-date title information.

US publication may be up to 2 months after UK publication.
Therapeutic Strategies in Veterinary Oncology
Edited by Chand Khanna, Ethos Veterinary Health, USA

A comprehensive resource for veterinary oncologists and trainees, covering therapeutic strategies used in the treatment of veterinary patients. The book gives readers a better understanding of the key differences between different treatment strategies in one relatively short reference book.

Dec 2022 | HB | 9781789245806 | 300pp
£75 | €90 | $105

Small Animal Neuroanatomic Lesion Localization Practice Book
Edited by Heidi Barnes Heller, Barnes Veterinary Specialty Services, USA

Neuroanatomic lesion localization is one of the main areas that veterinary students, interns, residents and practitioners struggle when faced with a neurologic patient. It is a common focus for questions on the North American Veterinary License Exam (NAVLE) as well as the American College of Veterinary Internal Medicine (ACVIM) general board examination for residents in Oncology, Internal Medicine, Neurology and Cardiology. This textbook will be laid out in a case-based format in a workbook style.

£45 | €55 | $65

Infection Control in Small Animal Clinical Practice
Edited by Kelly Bowlt Blacklock, AHT, UK, Fergus Allerton, Willows Veterinary Centre

Infection prevention and control is vital, but can find itself an automated part of care – and therefore vulnerable. This book uses evidence-based findings to convert infection prevention into a well-understood, passionate concept, considering key principles, infection control within surgery and hospitalised patients, and responsible antibiotic use.

One Welfare
A Framework to Improve Animal Welfare and Human Well-being
Edited by Rebeca García Pinillos, One Welfare, UK
Contemporary and thought provoking, this book provides a definition of the concept of One Welfare: the interconnection between animal welfare, human wellbeing and the environment. The book defines the concept and establish a conceptual framework with nine proposed elements within three different themes.

Jun 2018 | PB | 9781786393852 | 112pp
£25.65 | €30.75 | $46.15

Tourism and Animal Welfare
Edited by Neil Carr, University of Otago, New Zealand, Donald M Broom, Cambridge University, UK
Presented by senior researchers and from the fields of tourism and animal welfare, this is the first major text addressing the crossover of tourism and animal welfare. It includes contributions from major worldwide organisations.

May 2018 | PB | 9781786391865 | 188pp

Animal Welfare
3rd Edition
Edited by Michael C Appleby, University of Edinburgh, UK, Anna S Olsson, IBMC-i3S, Portugal, Francisco Galindo, National Autonomous University of Mexico (UNAM), Mexico
Updated and revised, this bestselling textbook provides a broad introduction to the welfare of animals large and small, farm and companion, wild and zoo. It retains the popular features of the previous editions, covering key issues such as ethics, animal pain and injury, health and disease, social conditions and welfare dilemmas and problems.

Feb 2018 | PB | 9781786390202 | 408pp
£40.99 | €56.40 | $66.65

The Ethology of Domestic Animals
An Introductory Text
3rd Edition
Edited by Per Jensen, Linköping University, Sweden
Completely updated, revised and redesigned in colour throughout, this classic bestselling text provides a concise introduction to the fundamentals of animal behaviour. It covers genetics, physiology, motivations, learning and cognition, through to social and reproductive behaviours, abnormal behaviour and human-animal interactions.

Sep 2017 | PB | 9781786391650 | 312pp

Proceedings of the 11th International Veterinary Behaviour Meeting
Edited by Sagi Denenberg, Langford Vets, UK
This book contains the proceedings from the 11th International Veterinary Behaviour Meeting. Keynote presentations cover topics such as reducing anxiety, reducing tension between household cats, researching animal welfare and making animal welfare sustainable.
Aug 2017 | PB | 9781786394583 | 200pp
£40.99 | €56.40 | $66.65

Olfaction in Animal Behaviour and Welfare
Edited by Birte L Nielsen, UFAW, UK
Olfaction and pheromones is an exploding area of research in animal behaviour and welfare. Focusing on animals managed by humans, this book introduces the subject of olfaction in an evidence-based, but easy-to-understand way, explaining the importance of odours for animal behaviour and welfare.
Jun 2017 | PB | 9781786391599 | 234pp
£46.15 | €61.50 | $76.90

The Animal Trade
Evolution, Ethics and Implications
Edited by Clive J C Phillips, Curtin University Sustainable Policy (CUSP) Institute, Australia
The trade in live and dead animals and animal parts is a significant aspect of the global economy, but economic considerations are at odds with animal welfare. This book discusses the background to modern international trade, welfare, and the environmental, economic and cultural issues for farm, zoo and sport animals as well as the pet industry.

The Behavioural Biology of Chickens
Edited by Christine J Nicol, Royal Veterinary College, UK

Chickens are the world’s most widely farmed animal, at the centre of debates regarding housing and production systems. This accessible book covers sensory biology, behavioural development, preferences and aversions, social behaviour, learning and cognition, behavioural issues in different systems and solutions for behavioural problems.

May 2015 | PB | 9781780642505 | 200pp

Sentience and Animal Welfare
Edited by Donald M Broom, Cambridge University, UK

Sentience – the ability to feel, perceive and experience – is central to the animal welfare debate. This book investigates and defines aspects of sentience such as consciousness, memory and emotions, and discusses brain complexity in detail. It looks at sentience from a developmental perspective and includes a chapter on ethical decisions.

Aug 2014 | PB | 9781780644042 | 200pp
£38.05 | €49.10 | $76

Rabbit Behaviour, Health and Care
Edited by Marit Emilie Buseth, Author, lecturer and independent consultant, Norway, Richard Saunders, Veterinary Adviser: Rabbit Welfare Association & Fund, UK

Covers all aspects of rabbit behaviour, welfare, health and husbandry, with updated and expanded content relevant to veterinarians. Case studies from around the world give this valuable resource an international perspective.

Dec 2014 | PB | 9781780641904 | 248pp
£20.45 | €25.65 | $41

Animal Abuse
Edited by Catherine Tiplady, Centre for Animal Welfare and Ethics, University of Queensland, Australia

Animal abuse affects everybody working in animal-related industries, and constitutes a significant part of veterinary caseloads and animal shelter work. Based on the author’s experience as a shelter worker and veterinarian, this book provides advice and assistance to those working with animal abuse.

Animal Machines
Edited by Ruth Harrison, Noted animal welfare author, UK, Marian Stamp-Dawkins, University of Oxford, UK
First published in 1964, Ruth Harrison’s book had a profound and lasting impact on world agriculture, public opinion and the quality of life of farmed animals. Animal Machines is reprinted here in its entirety, accompanied by new chapters by world-renowned experts in animal welfare discussing the legacy and impact of the book 50 years on.

Mar 2013 | HB | 9781780642840 | 224pp
£30.75 | €37.90 | $57.90

Behaviour of the Domestic Cat
2nd Edition
Edited by John W S Bradshaw, University of Bristol, UK, Rachel Casey, Dogs Trust, UK, Sarah Brown, University of Bristol, UK
This book presents an engaging overview of the behaviour of the domestic cat, adopting both a mechanistic and functional approach. Fully updated throughout, this new edition also includes two new chapters on behavioural disorders due to pathologies and from misdirected natural behaviour.

Nov 2012 | PB | 9781845939922 | 264pp
£38.05 | €49.10 | $76

Feline Behaviour and Welfare
Edited by Andrew F Fraser, formerly Memorial University of Newfoundland, Canada
Providing a veterinary perspective as well as an ethological one, this book looks at the feline genus as a whole. Focusing on identifying normal behaviour from the cat’s perspective, it has a welfare theme running throughout; as normal behaviour provides evidence of good welfare, abnormal behaviour can be an indicator of poor welfare.

Mineral Nutrition of Livestock
5th Edition
Edited by Neville F Suttle, Moredun Foundation, UK
The fifth edition of this important book reviews the recent advances in livestock mineral nutrition, updated throughout with new illustrations and references to reflect the growing complexity of mineral metabolism.
Apr 2022 | HB | 9781789240924 | 600pp
£145 | €165 | $195

Enzymes in Farm Animal Nutrition
3rd Edition
Edited by Michael R Bedford, AB Vista, UK, Gary G Partridge, Formerly Danisco Animal Nutrition, UK, Carrie L Walk, DSM, UK, Milan Hruby, ADM, USA
This fully updated new edition provides a comprehensive guide to enzyme-supplemented animal feeds. It explores using enzymes in fish and shrimp diets, new understanding of how phytases function, and NSPase research. It also includes new chapters on enzyme combinations, antibiotic free diets and measuring response in feed trials.
Mar 2022 | HB | 9781789241563 | 312pp
£95 | €110 | $130

Fasciolosis
2nd Edition
Edited by John Pius Dalton, National University of Ireland Galway, Ireland
Fasciolosis is a major infection of livestock, causing huge losses to the agricultural community and affecting human health.
This fully updated new edition covers parasite biology and development, immunology, diagnosis, vaccines, and emergence of drug resistance, as well as new advances in genomics, transcriptomics, proteomics and glycomics.
Dec 2021 | HB | 9781789241622 | 520pp

Insects as Animal Feed
Novel Ingredients for Use in Pet, Aquaculture and Livestock Diets
Edited by Heidi Hall, Anpario plc, UK, Elaine Fitches, Durham University, UK, Rhonda Smith, Minerva, UK

Covering global production systems of insect protein, oil and chitin, as well as industry co-products, this book considers nutritional and safety aspects of insects for feed. It reviews the challenges of regulation and legislation, consumer acceptance, and commercialisation of insects, and sustainable practices such as waste valorisation.

Fundamentals of Applied Animal Nutrition
Edited by Gordon Dryden, Dryden Animal Science, Australia, and University of Queensland, Australia

This book introduces the basic aspects of animal nutrition, giving a practical overview of the principles which underpin the design and management of farm animal feeding systems. It covers digestive function, nutrients and feed intake, feed related disorders, grazing behaviour and management, climate change and the environment, and more.

Jun 2021 | PB | 9781786394453 | 280pp
£45 | €50 | $60

Mycoplasmas in Swine
Edited by Dominiek Maes, Ghent University, Belgium, Marina Sibila, Centre de Recerca en Sanitat Animal (CReSA), Spain, Maria Pieters, University of Minnesota, USA

Swine can be infected with many mycoplasmas, some of which cause significant health and welfare issues in pigs, and major losses to the swine industry worldwide. This book provides up-to-date scientific, clinical and practical information of the most important pathogenic mycoplasmas, such as Mycoplasma hyopneumoniae.

**Paratuberculosis**
*Organism, Disease, Control*
2nd Edition
Edited by Marcel A Behr, McGill University, Canada, Karen Stevenson, Moredun Research Institute, UK, Vivek Kapur, Pennsylvania State University, USA

This new edition is the only comprehensive text on paratuberculosis, providing historical context and state-of-the-art knowledge. It examines epidemiology, the organism that causes the disease, and practical aspects of its diagnosis and control, as well as the link between paratuberculosis in the food chain and human health implications.

Sep 2020 | HB | 9781789243413 | 440pp
£117.90 | €133.25 | $158.90

**Nutrition of the Rabbit**
*3rd Edition*
Edited by Carlos de Blas, Technical University of Madrid, Spain, Julian Wiseman, University of Nottingham, UK

Bringing together international expertise, this fully updated volume covers digestive physiology, feeding, product quality, and the relationship between nutrition and health. With new material on immune response, dietary additives and organics, this book provides a valuable resource for researchers and students of animal nutrition and production.

Feb 2020 | HB | 9781789241273 | 368pp
£97.40 | €128.15 | $164

**Animal Nutrition**
*From Theory to Practice*
Edited by Philip Ian Hynd, University of Adelaide, Australia

This text covers digestive anatomy and physiology; energy, protein, vitamin and mineral requirements; and common nutritional and metabolic diseases for dogs, cats, horses, sheep, cattle, camelids, goats, pigs, and poultry.

Oct 2019 | PB | 9781789242911 | 416pp

Bovine Pathology
A Text and Color Atlas
Edited by Claus D Buergelt, University of Florida, USA, Edward G Clark, University of Calgary, Canada, Fabio Del Piero, Louisiana State University, USA
Illustrated with over 1000 color images, this is a comprehensive single resource to identifying diseases in dairy cattle, feedlot cattle and their calves. With summary key features, it correlates clinical information with pathology and differential diagnoses, covering naked-eye macroscopic appearance, microscopic pathology and immunohistochemistry.
May 2018 | HB | 9781780646718 | 448pp
£128.15 | €169.15 | $210.10

Bovine Tuberculosis
Edited by Mark Chambers, APHA, UK, Stephen Gordon, University College Dublin, Ireland, Francisco Olea-Popelka, Western University, Canada, Paul Barrow, University of Surrey, UK
This book is a systematic, comprehensive treatise of bovine tuberculosis and the bacterium, Mycobacterium bovis, which causes it. Bovine tuberculosis remains a major cause of economic loss in cattle industries worldwide. There is no other book which treats the various aspects of the problem in such a systematic way.
Apr 2018 | HB | 9781786391520 | 284pp
£46.15 | €51.25 | $61.50

Nutrition and Feeding of Organic Pigs
2nd Edition
Edited by Robert Blair, University of British Columbia, Canada
This second edition has been completely updated, addressing how to formulate organic diets as well as the feasibility of using novel feedstuffs and their acceptability by consumers. It includes international standards of organic feeding, feed-related disease in organic herds, and producers’ experiences of appropriate breeds and production systems.
Dec 2017 | HB | 9781780647906 | 272pp
£97.40 | €128.15 | $164

Nutrition Experiments in Pigs and Poultry
A Practical Guide
Edited by Michael R Bedford, AB Vista, UK, Mingan Choct, University of New England, Australia, Helen Masey O’Neill, AB Agri Ltd, UK
This text describes the limitations of experiment design involving different ingredients, and the characterization of experimental diets including ingredient selection, composition and the minimum proximate analysis required. It details measurements and the tools available for understanding data sets, data analysis and publication of research.
Aug 2016 | HB | 9781780647005 | 178pp
£81.30 | €105.60 | $136.10

Tuberculosis, Leprosy and other Mycobacterial Diseases of Man and Animals

The Many Hosts of Mycobacteria
Edited by Harshini Mukundan, Los Alamos National Laboratory, USA, Mark Chambers, Animal and Plant Health Agency, UK and University of Surrey, UK, Ray Waters, USDA, USA, Michelle Larsen, Albert Einstein College of Medicine, USA

This book covers Mycobacterium tuberculosis complex (MTC) and Mycobacterium leprae across a range of host species. They are considered in regards to increasing drug resistance, HIV co-infection associated with M. tuberculosis and the possible cross-infection of badgers and cattle associated with M. bovis.

Sep 2015 | HB | 9781780643960 | 580pp
£66.65 | €76.90 | $92.25

Nutritional Modelling for Pigs and Poultry

Edited by Nilva K Sakomura, University Estadual Paulista, Brazil, Rob Gous, formerly of University of Kwazulu-Natal, South Africa, Ilias Kyriazakis, Newcastle University, UK, L Hauschild, University Estadual Paulista, Brazil

Modelling is a useful tool for decision making in complex agro-industrial scenarios. Containing a selection of papers presented at the International Symposium of Modelling in Pig and Poultry Production 2013, this book reviews basic modelling concepts, descriptions and applications of production models and new methods and approaches in modelling.

Dec 2014 | HB | 9781780644110 | 318pp

Rabbit Production
10th Edition
Edited by Steven D Lukefahr, Texas A&M University-Kingsville, USA, James I McNitt, formerly of Southern University Agricultural Research and Extension Centre, USA, Peter Robert Cheeke, Oregon State University, USA, Nephi M Patton, Oregon State University, USA

This book provides an overview of domesticated rabbit production, covering breeding, husbandry, feeding and health. In this fully updated 10th edition, it includes expanded consideration of animal welfare and sustainable production methods, as well as new information on artificial insemination, embryo transfer, cloning and molecular genetics.

Apr 2022 | PB | 9781789249798 | 368pp

The Genetics and Genomics of the Rabbit
Edited by Luca Fontanesi, University of Bologna, Italy

Covering all aspects of the genetics and genomics of the rabbit, this book includes domestication, classical genetics, the rabbit genome, genetic maps and markers, coat colour genetics, immunogenetics, transgenic rabbits and biotechnology applications. It also covers the genetics of meat and fibre production, reproduction and disease resistance.

Jun 2021 | HB | 9781780643342 | 360pp
£95 | €110 | $130

Manual of Animal Andrology
Edited by Peter J Chenoweth, James Cook University, Australia, Steven Lorton, University of Wisconsin-Madison, USA

A succinct reference for managing the reproductive functionality of male animals, this practical manual covers a wide range of species from dogs to water buffalo. It provides normal values and ranges for male reproductive organs and traits, as well as guidelines for breeding soundness evaluations.

Feb 2022 | PB | 9781789243505 | 216pp
£39.99 | €45 | $55

The Impact of the International Livestock Research Institute
Edited by John McIntire, Independent Economist, USA, Delia Grace, International Livestock Research Institute, Kenya

The book recounts the history and achievements of research at the International Livestock Research Institute and its predecessors. Describing mixed crop and livestock systems' impact on the global environment, it also covers animal genetics, production, health and disease control, land management, public policy, and economics.

The Quest to Conserve Rare Breeds
Setting the Record Straight
Edited by Lawrence Alderson, International Consultant on animal genetic resources and Chairman of Countrywide Livestock Ltd., UK

Biological diversity is essential for sustainability, and this book recounts the creation and development of the rare breed conservation movement. It addresses extinctions, endangered breeds, and safe-guarding genetic diversity while considering our future – challenged as it is by climate change, sustainability and feeding the world.

Jun 2020 | PB | 9781789247114 | 136pp

Biosecurity in Animal Production and Veterinary Medicine
From principles to practice
Edited by Jeroen Dewulf, Filip Van Immerseel, both Ghent University, Belgium

Antimicrobial use is under debate, and it is becoming standard practice in the animal production industry to implement thorough biosecurity plans to prevent the spread of pathogenic micro-organisms. This book provides a wealth of practical information on the application of biosecurity measures in both farm and companion animal settings.

Jan 2020 | HB | 9781789245684 | 524pp

Goat Production and Supply Chain Management in the Tropics
Edited by Pramod Kumar Rout, ICAR-Central Institute for Research on Goats, India, Ashok Kumar, ICAR-Central Institute for Research on Goats, India, Basanta Kumara Behera, formerly M D University, India

This practical manual for goat production systems covers breeding and selection, feeding based on available crops and resources, and targeted preventative health care for increased productivity and income. It is required reading for livestock farmers, veterinarians, commercial farming companies, researchers and animal science specialists.

Dec 2019 | HB | 9781789240139 | 320pp
£128.15 | €169.15 | $210.10

Livestock Handling and Transport 5th Edition
Edited by Temple Grandin, Colorado State University, USA

Edited by world-renowned animal scientist Dr Temple Grandin, this fifth edition integrates scientific research and industry literature, providing a guide to humane handling and minimizing animal stress. Includes new coverage of temperament testing and change, principles of good stockmanship and new video material.

Oct 2019 | PB | 9781786399168 | 484pp

Biostatistics for Animal Science
3rd Edition
Edited by Miroslav Kaps, formerly University of Zagreb, Croatia, William R Lamberson, University of Missouri, USA
Covering techniques for analysis of data in the animal sciences, this textbook provides an overview of the basic principles, followed by more complex applications and detailed procedures commonly used in animal sciences. This new edition includes a wealth of new distributions and extensive new material on non-normal dependent variables.
Jun 2017 | PB | 9781786390356 | 562pp £46.15 | €61.50 | $76.90

Reproductive Technologies in Farm Animals
2nd Edition
Edited by Ian Gordon, University College Dublin, Ireland
Drawing on the interplay between farming and research, this popular textbook provides an updated account of the key techniques for manipulating reproduction in farm animals. It places due emphasis on techniques developed or improved over the last decade, covering technologies for cattle, pigs, sheep, goats, buffaloes, camelids, horses and poultry.
Jun 2017 | PB | 9781780646039 | 342pp £46.15 | €61.50 | $76.90

Companion Animal Economics
The Economic Impact of Companion Animals in the UK
Edited by Sophie S Hall, University of Leicester, UK, Luke Dolling, University of Lincoln, UK, Katie Bristow, Dogs for Good, UK, Ted Fuller, University of Lincoln, UK, Daniel S Mills, University of Lincoln, UK
Succinct, highly readable and thought provoking, this important text is designed to raise awareness of the potential economic impact of companion animals in the UK. It discusses the potential benefits and costs of companion animals to the economy and highlights the need for this matter to be thoroughly researched.
Dec 2016 | PB | 9781786391728 | 92pp £18.45 | €25.65 | $30.75

Sustainable Poultry Production in Europe
Edited by Emily Burton, Nottingham Trent University, UK, Joanne Gatcliffe, AB Vista Headquarters, UK, Helen Masey O’Neill, AB Agri Ltd, UK, Dawn Scholey, Nottingham Trent University, UK
Examining sustainable poultry production systems across Europe, this book contains a selected cross section of papers from the 2014 UK Poultry Science Symposium. It reviews essential topics such as resources and supply chains, the global poultry market, risk management, zoonoses and green issues.

The Genetics of Cattle
2nd Edition
Edited by Dorian J Garrick, Iowa State University, USA, Anatoly Ruvinsky, University of New England, Australia
This book covers genetic components in cattle production such as breeds, disease resistance, growth, development, behaviour, body composition and meat quality. This new edition includes updated material and new chapters on genetics of fat production, nutrition, feed intake and efficiency, growth and body composition and genomic selection.
Nov 2014 | HB | 9781780642215 | 634pp
£141.45 | €186.85 | $271.90

Beef Cattle Production Systems
Edited by Andy D Herring, Texas A&M University, USA
This textbook provides an integrated view of beef cattle production with a systems based approach, discussing the interrelationships of many aspects with the overall goal of optimising cattle production. A key read for upper level undergraduate and postgraduate students in animal & veterinary science, producers, extension workers and veterinarians.

Animal Andrology
Theories and Applications
Edited by Peter J Chenoweth, James Cook University, Australia, Steven Lorton, University of Wisconsin-Madison, USA
This book covers male reproductive biology, discussing the essentials of sperm production, harvest and preservation before covering the applications to a range of animals including cattle, horses, pigs, cats and dogs, poultry and exotic species. It also examines the laboratory procedures that provide the basis of general fertility research.

Linear Models for the Prediction of Animal Breeding Values
3rd Edition
Edited by Raphael A Mrode, SRUC, UK
The prediction of producing desirable traits in offspring is a vital tool to animal scientists. Summarising the developments in genomics and design of breeding programmes, this book covers models of survival analysis, social interaction and sire and dam models, plus advancements in the use of SNPs in the computation of genomic breeding values.

Dairy Herd Health
Edited by Martin Green, University of Nottingham, UK
Dairy herd health is an important topic in veterinary practice and farming. This book focuses on diseases within herds, husbandry practices, youngstock management and environmental issues. Major diseases and conditions are covered, including mastitis, lameness, nutrition, metabolic and common infectious diseases from a herd health perspective.

Camel Meat and Meat Products
Edited by Isam T Kadim, Sultan Qaboos University, Oman, Osman Mahgoub, Sultan Qaboos University, Oman, Bernard Faye, FAO Consultant, Camel and Range Research Centre, Saudi Arabia, Mustafa Farouk, AgResearch Limited, New Zealand
This book reviews up-to-date literature on camel meat and meat products, carcass and meat quality characteristics, muscle structure, post-mortem analysis and the nutritive value to humans. A comparatively small component of global meat consumption, camel meat has the potential to undergo an explosion of production worldwide.

Genetics of the Dog
2nd Edition
Edited by Anatoly Ruvinsky, University of New England, Australia, Elaine A Ostrander, National Human Genome Research Institute (NHGRI), USA, Jeff Sampson, The Kennel Club, London, UK
Recognizing the significant advances made in the field of animal genetics in the ten years since the first edition, this new edition of the successful 2001 book provides a comprehensive update as well as new material on topics such as genetic diversity of dog breeds, canine genomics, olfactory genetics and cancer genetics.

Handbook of Ornamental Fish Health and Welfare

Edited by Nick Saint-Erne, World Aquatic Veterinary Medical Association, USA, Nick Saint-Erne, World Aquatic Veterinary Medical Association, USA

A reference handbook aimed at veterinarians and ornamental fish breeders covering fish health and welfare.

Oct 2022 | HB | 9781789246018 | 416pp
£125 | €90 | $105

Aquaculture and Fisheries Biotechnology

Genetic Approaches
3rd Edition

Edited by Rex A Dunham, Auburn University, USA

This is an updating of the successful book on aquaculture and fisheries biotechnology that introduces traditional techniques but also adds the very latest in molecular genetic analysis.

Nov 2022 | HB | 9781789243444 | 568pp
£165 | €215 | $275

Aquaculture
An Introductory Text
4th Edition

Edited by Robert R Stickney, Texas A&M University, USA, Delbert M Gatlin III, Texas A&M University, USA

This new edition covers sustainable aquaculture development, culture systems, hatchery methods, reproductive strategies, harvesting and many other topics. Fully updated and revised, it includes more information on open ocean cage culture, diseases and parasites, nutrition, biofloc technology, climate change, probiotics, and the impact of COVID-19.

Key Questions in Zoo and Aquarium Studies
A Study and Revision Guide

Edited by Paul A Rees, formerly University of Salford, UK

This book is a study and revision guide for students following programmes of study in which zoo and aquarium biology and management are important components. It contains 500 multiple-choice questions (and annotated answers) set at three levels – foundation, intermediate and advanced.

Sep 2021 | PB | 9781789249002 | 248pp

Climate Change and Infectious Fish Diseases
Edited by Patrick T K Woo, University of Guelph, Canada, Jo-Ann Leong, University of Hawai‘i at Manoa, USA, Kurt Buchmann, University of Copenhagen, Denmark

This definitive reference work explores the effects of current and expected climate change, taking place throughout the world, on selected bacterial, viral, fungal and parasitic infectious fish diseases of economically important fish in tropical and temperate waters.

Sep 2020 | HB | 9781789243277 | 528pp
£179.40 | €225.50 | $240.90

Climate Change and Non-infectious Fish Disorders
Edited by Patrick T K Woo, University of Guelph, Canada, George K Iwama, University of British Columbia, Canada

An important new title on climate change, and its effects on selected non-infectious disorders of fish. Contains contributions by internationally recognized experts who have contributed significantly to our knowledge in this area.

Dec 2019 | HB | 9781786393982 | 258pp
£97.40 | €128.15 | $164

Diseases and Disorders of Finfish in Cage Culture
2nd Edition
Edited by Patrick T K Woo, University of Guelph, Canada, David W Bruno, Marine Scotland, UK

This new edition is a timely update due to important advances in the understanding of infectious diseases of finfish. The content has been significantly updated to reflect current knowledge and the developments in the fish production industry in the last ten years, including the dramatic increases in production in the Asia-Pacific region.

Oct 2019 | PB | 9781786395368 | 342pp
£66.65 | €82 | $92.25

Fish Viruses and Bacteria
Pathobiology and Protection
Edited by Patrick T K Woo, University of Guelph, Canada, Rocco C Cipriano, National Fish Health Research Laboratory, USA

Taking a disease-based approach, this book focuses on the pathobiology of and protective strategies against the most common, major microbial pathogens of economically important marine and freshwater fish. It covers well-studied, notifiable piscine viruses and bacteria, including new and emerging diseases.

Bacteria and Fungi from Fish and Other Aquatic Animals
A Practical Identification Manual
2nd Edition
Edited by Nicky B Buller, Department of Agriculture and Food, Western Australia, Australia

Illustrated with colour photos, this practical book provides an updated resource for the identification of bacteria which can be found in animals inhabiting the aquatic environment. This title also contains expanded biochemical identification tables.

£164.15 | €215.30 | $310.95
Equine Respiratory Endoscopy
Edited by Caspar Lindegaard, University of Copenhagen, Denmark, Julie Fjeldborg, University of Copenhagen, Denmark, Patrick J Pollock, Royal (Dick) School of Veterinary Studies
This book provides a practical approach to equine respiratory endoscopy. Full colour endoscopy images illustrate normal anatomy, variations of normal anatomy and disorders of the respiratory tract.
Nov 2022 | HB | 9781789242669 | 320pp
£79.99 | €100 | $135

Evidence Based Equine Nutrition
A Practical Approach For Professionals
Edited by Lizzie Drury, Saracen Horse Feeds, UK, Teresa Hollands, University of Surrey, UK
This down to earth book on equine feeding and feed management outlines the latest science and research, and how to apply this practically in everyday situations including essential guidelines on how to feed safely and get the best out of horses. It provides much needed guidance on a subject that is often regarded as product-saturated.
Aug 2022 | PB | 9781789245110 | 272pp

Equine Reproductive Physiology, Breeding and Stud Management
5th Edition
Edited by Mina C G Davies Morel, Aberystwyth University, UK
This text contains detailed coverage on the management of mares, stallions and foals, as well as stud management practicalities including infertility, artificial insemination and advanced reproductive techniques.
Nov 2020 | PB | 9781789242249 | 536pp
£48.70 | €56.40 | $61.50
Nov 2020 | HB | 9781789242232 | 536pp
£117.90 | €133.25 | $158.90
Solving Equine Behaviour Problems
An Equitation Science Approach
Edited by Rose M Scofield, Oxford Brookes University, UK

Riders can face a range of horse behavioural problems, which if left untreated could cause the horse-human relationship to break down. This book examines behavioural issues using academic research, offering practical solutions illustrated with photos and case studies. It covers over 30 major issues, including biting, kicking, shying and bolting.

Sep 2020 | PB | 9781789244878 | 160pp
£30.75 | €35.90 | $41

Equine Endocrinology
Edited by François-René Bertin, The University of Queensland, Australia, Natalie S Fraser, The University of Queensland, Australia

This book deals exclusively with the equine endocrine problems that the clinician would see in practice. It is the perfect reference for the practitioner who must quickly diagnose and treat the presenting problems.

Sep 2020 | PB | 9781789241099 | 152pp
£46.15 | €51.25 | $61.50

ECG Interpretation in Equine Practice
Edited by Katharyn Mitchell, University of Zurich, Switzerland

This book provides a practical guide for the veterinary practitioner on how to record and analyse ECGs in horses. It includes the basics of electrocardiography, recording, analyzing and interpreting the ECG.

Jul 2020 | PB | 9781789240825 | 144pp
£35.90 | €41 | $51.25

Horse Genetics
3rd Edition
Edited by Ernest Bailey, University of Kentucky, USA, Samantha A Brooks, University of Florida, USA

Completely updated and revised, the third edition of this essential textbook describes the basic genetics of the horse including coat colour, parentage, medical and population genetics, cytogenetics, performance, breeding systems and genetic conservation, as well as the many recent advances in genomics.

May 2020 | PB | 9781786392596 | 240pp

Manual of Equine Dermatology
Edited by Rosanna Marsella, University of Florida, USA
This book deals with the equine dermatological problems that a clinician would see in practice. Illustrated in color throughout, it covers history, signalment, identification of primary vs secondary lesions, and distribution of lesions, with examples of differential diagnoses.

Aug 2019 | HB | 9781786395085 | 150pp
£61.50 | €74.30 | $87.15

Equine Thermography in Practice
Edited by Maria Soroko, Equine Massage, Poland, Mina C G Davies Morel, Aberystwyth University, UK
Evidence-based and very practical, this book discusses how to use thermography in the diagnosis of equine musculoskeletal injuries. Giving guidelines for best practice, it covers core principles, applications, what the user can expect to see in normal versus injured horses, and the role of the technique for equestrian athletes in rehabilitation.

Animal Behaviour and Welfare Cases

Real-life examples of animal behaviour and welfare in practice

Case studies:

- focus on practical approaches to solving behaviour and welfare problems in a range of animals, to benefit the lives of real animals worldwide
- cover cats, dogs, equids, food animals and exotics – understanding that behaviour presentations and welfare needs differ across species
- include photos, illustrations and videos to bring the topic to life and enable a solid understanding of behaviours
- provide a ready-made study aid for students, as well as a source of continuing professional development for qualified professionals
