

Water Dynamics in Plant Production, 2nd Edition

Questions and Discussion Points

Chapter 2 – The Role of Water in Soil

Section 2.1

1. Describe, using examples, how water contributes to soil genesis.
2. To quantify the amount of pesticides leached into groundwater, which items have to be measured?

Section 2.2

1. Discuss the concept that soil animals and plants contribute to the development of soil chemical and physical fertility, and how the processes are supported by water.
