CABI new books

2022
CABI is not like other publishers

CABI is an international not-for-profit organisation that improves people’s lives worldwide by providing information and applying scientific expertise to solve problems in agriculture and the environment. CABI is also a global publisher producing key scientific publications, including world renowned databases, as well as compendia, books, eBooks and full text electronic resources.

The profits from CABI’s publishing activities enable us to work with farming communities around the world, supporting them as they battle with poor soil, invasive species and pests and diseases, to improve their livelihoods and help provide food for an ever growing population.

CABI is an international intergovernmental organisation and we gratefully acknowledge the core financial support from our member countries (and lead agencies) including the United Kingdom (Department for International Development), China (Chinese Ministry of Agriculture), Australia (Australian Centre for International Agricultural Research), Canada (Agriculture and Agri-Food Canada), The Netherlands (Directorate-General for International Cooperation) and Switzerland (Swiss Agency for Development and Cooperation).

Welcome to the CABI Books Catalogue 2022

This catalogue contains our recent and forthcoming monographs, textbooks and practitioner titles across our full range of publishing areas.

Contents

04 agricultural science
07 forestry, ecology and the environment
11 plant and crop science
14 horticulture
18 human health, food and nutrition
20 veterinary science and medicine
24 animal sciences
26 tourism, hospitality and leisure
30 title index
32 author index
35 how to order

Textbooks

Indicates the publication is a textbook and available for inspection by lecturers wishing to evaluate it for course use.

Please visit www.cabi.org/bookshop/textbooks to find out more.

A number of textbooks are now enhanced by open resources, to improve the learning experience for students and researchers. Including lecture slides, maps, images and other material, these resources provide additional information to supplement CABI’s publishing products: www.cabi.org/bookshop/openresources

Open Access

Indicates that the publication is Open Access.

CABI believes that a crucial way to solve problems in agriculture and the environment is by creating, managing, curating and disseminating information. Discover and download CABI’s open access books here: www.cabi.org/openaccess/books

New in paperback

Indicates that this title is now available in paperback for the first time.

eBooks

Many CABI titles are available in eBook format, and these are indicated throughout this catalogue. eBooks are available for individual purchase through the CABI Bookshop, in certain countries, as well as major eBook retailers and institutional suppliers.

Find out more at www.cabi.org/ebooks

Keep up-to-date

Receive news and updates on CABI’s books, eBooks and online resources direct to your inbox www.cabi.org/stay-informed

Please note: all details were correct at the time this catalogue went to press, but may be subject to change without notice. Please refer to www.cabi.org/bookshop for up-to-date title information.

US publication may be up to 2 months after UK publication.
Farmer Innovations and Best Practices by Shifting Cultivators in Asia-Pacific
Malcolm Cairns, independent scholar and researcher, Thailand

This book, the third of a series, shows how shifting cultivators from the Himalayan foothills to the Pacific Islands have devised ways to improve their farming systems. It considers the importance of swidden agriculture to food security and livelihoods, and its environmental significance across multiple cultures, crops and forest systems.

Oct 2022 | HB | 9781800620094 | 1100pp
£49.99 | €60 | $70

Gender and the political economy of fisheries and aquaculture
Meryl Williams

Fisheries and aquaculture have flourished, yet in the fish value chain, gender equality is declining. The book examines how growth in scale and intensity of the fish sector, changes in market orientation and gender-blind governance measures may create a human disaster by examining three commodity cases in the value chain: shrimp, tuna and seaweed.

Jul 2022 | HB | 9781789247145 | 200pp
£75 | €115 | $135

Science Communication Skills for Journalists
A Resource Book for University Faculty in Africa
Edited by Charles Wendo, SciDev.Net, Uganda

This book provides hands-on guidance together with examples, learning activities, graded and ungraded quizzes to facilitate learning. It also includes five academic review papers reflecting on key science journalism and communication issues in the region.

Jun 2022 | PB | 9781800621428 | 208pp

Gender-responsive Researchers Equipped for Agricultural Transformation
Trainer’s Manual for the Gender-Responsive Plant Breeding Course
Margaret Mangheni, Makere University, Uganda, Hale Tufan, Cornell University, USA

This manual presents the content and step-by-step training process for the Gender-Responsive Plant Breeding course, implemented by Makerere and Cornell Universities, over a period of five years (2016-2020), under the Gender-responsive Researchers Equipped for Agricultural Transformation (GREAT) project funded by the Bill and Melinda Gates Foundation.

Mar 2022 | ePDF | 9781800620520 | 272pp
Mar 2022 | ePub | 9781800620513 | 272pp

Genome sequencing and agriculture
Edited by Philipp Bayer, David Edwards, both University of Western Australia, Australia
CABI Biotechnology Series

This book summarises the impacts that the genome sequencing revolution has had in all areas across animal and plant agriculture, including cattle, orphan crops, cash crops, and more, with reference to applications in many species and locations. It explains new techniques and their use in understanding epigenetics, breeding and conservation.

Jul 2022 | HB | 9781789247824 | 168pp
£85 | €100 | $115

Sustainable Agricultural Intensification
A Handbook for Practitioners in East and Southern Africa
Edited by Mateete Bekunda, Jonathan Odhong, Irmgard Hoeschle-Zeledon, all International Institute of Tropical Agriculture, Nigeria

This book aims to demonstrate how sustainable intensification (SI) of smallholder livelihood farming systems can be achieved through the delivery, application, and adoption of evidence-based recommended technologies and knowledge.

Apr 2022 | HB | 9781800621602 | 208pp
£70 | €85 | $100

Conservation Agriculture in Africa
Climate Smart Agricultural Development
Edited by Saidi Mkomwa, African Conservation Tillage, Nairobi, Amir H Kassam, Food and Agriculture Organization of the United Nations, Italy and University of Reading, UK

Conservation Agriculture (the use of no tillage systems) to preserve soil structure and integrity has become an increasingly important step towards sustainable farming. This book brings together conservation agriculture and climate smart decision making processes for the first time, focusing on Africa.

Dec 2021 | HB | 9781789245745 | 512pp
£175 | €210 | $245
Land Governance and Gender
The Tenure-Gender Nexus in Land Management and Land Policy
Edited by Uchendu Eugene Chigbu, Namibia University of Science and Technology, Namibia
This book offers conceptual and empirical studies of land governance, focusing on land management approaches, land policy issues, advances in pro-poor land tenure, and land-based gender concerns. Topics include “Creating new understandings,” “Exploring alternative approaches for land management and land tenure,” “Viewing vistas of tenure experiences across the globe,” and “Stretching the gender perspectives.”

Dec 2021 | HB | 9781789247664 | 248pp
£95 | €115 | $135

Transforming Tertiary Agricultural Education in Africa
Edited by David Kraybill, Ohio State University, USA, John Lynam, Adipala Ekwamu, RUFORUM, Uganda
African agricultural universities are transforming themselves and achieving success in tackling the problems of production agriculture, urbanization and food consumption patterns. Adaptive strategies are creating an internal culture driven by stakeholder needs to improve the quality and relevance of teaching, research and outreach.

Dec 2021 | HB | 9781789246544 | 328pp
£95 | €115 | $135

A Manual for Agribusiness Value Chain Analysis in Developing Countries
Benjamin Dent, University of Queensland, Australia, Ray Collins, Emeritus, University of Queensland, Australia
This manual shows how value chain analysis (VCA) principles can be applied in developing countries, where time and funding is often restricted. It explains how to undertake affordable VCA that generate valid data and produce recommendations that will have impact.

Nov 2021 | PB | 9781789249361 | 128pp
£25 | €30 | $35

Presenting Science Concisely
Bruce Kirchoff, University of North Carolina at Greensboro, USA
The focus of this book is on short presentations, three-minute talks, poster presentations and elevator pitches. It begins by looking at story structure, and best practices for lightning talks or Three Minute Thesis (3MT®). Later chapters address longer conference presentations, good poster design, consideration of your audience, and presentation skills.

Nov 2021 | PB | 9781789246995 | 152pp
£19.99 | €25 | $30
World, excluding Aus & NZ

Water Conflicts and Cooperation: a Media Handbook
Edited by Rasha Dewedar
This handbook is for journalists, researchers and policy makers working on science communication for water peace and cooperation. It features descriptions of activities (including action research, training modules, joint workshops, reporting grants, podcast and an online photo campaign) implemented by the Open Water Diplomacy project in the Nile basin.

Nov 2021 | PB | 9781789247954 | 64pp
£20 | €25 | $30

Spices, Scents and Silk
Catalysts of World Trade
James F Hancock, Michigan State University, USA
This book describes the central role that these exotic luxuries – spices, scents and silks – played in the lives of the ancients, traces the development of the great international trade networks that delivered them, and explores how the demand for such luxuries shaped the world.

Sep 2021 | PB | 9781789249750 | 344pp
£29.99 | €35 | $40

Gender, Climate Change and Livelihoods
Vulnerabilities and Adaptations
Edited by Joshua Eastin, Portland State University, USA, Kendra Dupuy
This book applies a gendered lens to the dynamic linkages between climate change and livelihoods in developing countries. It examines how climate change affects women and men in distinct ways, and the implications for earning income and accessing the natural, social, economic, and political resources required to survive and thrive.

Jul 2021 | HB | 9781789247053 | 240pp
£95 | €115 | $135

An Introduction to Economics
Concepts for Students of Agriculture and the Rural Sector
5th Edition
Berkeley Hill, formerly Imperial College London, UK
A simple but effective introduction to economics. Fully updated and revised, this fifth edition covers the impacts of Brexit, animal welfare, sustainable agriculture, and the importance of natural, social and cultural capital on agricultural economics. It is an invaluable learning tool for students of agriculture, economics and related sectors.

Jul 2021 | PB | 9781800620063 | 264pp
£45 | €50 | $60

CAB Abstracts gives you instant access to over 10.4 million research records, with over 350,000 new records being added every year.

Used by hundreds of the world’s leading institutions, including government departments, premier universities, and esteemed research centres, it’s the most comprehensive bibliographic database of its kind.

Covering publications from over 120 countries in 50 languages from 1973 onwards, including a number of niche, independent journals, CAB Abstracts gives you the fullest global picture for the applied life sciences.

Key Questions in Urban Pest Management
A Study and Revision Guide
Partho Dhang, Independent Consultant, Philippines, Philip Koehler, University of Florida, USA, Roberto Pereira, University of Florida, USA, Daniel D Dye II, Brooker, Florida, USA

This book is intended as a study and revision guide for students following programmes of study in which urban pest management is an important component. It contains over 500 multiple-choice questions (and answers) set at three levels – foundation, intermediate and advanced.

Mar 2022 | PB | 9781800620155 | 168pp
£19.99 | €23.99 | $27.99

Key Questions in Biodiversity
A Study and Revision Guide
Paul A. Rees, formerly University of Salford, UK

This book is a study and revision guide for students following programmes of study in which biodiversity is an important component. It contains 600 multiple-choice questions (and annotated answers) set at three levels – foundation, intermediate and advanced.

May 2021 | PB | 9781789248630 | 224pp
£19.99 | €23.99 | $27.99

Key Questions in Hydrology and Watershed Management
A Study and Revision Guide
Leon Bren, University of Melbourne, Australia, Patrick Lane, University of Melbourne, Australia

This study and revision guide for students provides a series of exercises of various types in matters of catchment and watershed management. The exercises are true/false, multiple choice, numeric, graphical, and analytical. Some of the exercises would be suited to being done in class as a type of assignment, others designed for home study.

Nov 2021 | PB | 9781789249682 | 232pp
£19.99 | €23.99 | $27.99

Key Questions in Environmental Toxicology
A Study and Revision Guide
J P F D’Mello, formerly Scottish Agricultural College, UK

Questions review the origin, characterization and environmental distribution of major pollutants, followed by their absorption and metabolic disposition in living organisms, and their implications for human morbidity, ecological impact and biodiversity. A selection of questions types and full answer rationales keep learning varied and engaging.

Sep 2022 | PB | 9781789248524 | 296pp
£25 | €30 | $35

Soil Ecology
Sina M Adl, University of Saskatchewan, Canada

Soil Ecology is a new textbook which approaches this complex subject using a unique organism-based approach. It is suitable for undergraduate or graduate level courses in soil microbiology, soil ecology, ecological agriculture, forest management, soil remediation and environmental management, and as a comprehensive resource for professional soil scientists and ecologists.

Nov 2022 | PB | 9781800621336 | 456pp
£55 | €65 | $75
Nov 2022 | HB | 9781800621329 | 456pp
£120 | €140 | $160

Climate Change, Adaptation and Gender
Methodological Underpinnings
Mamta Mehar, Independent Consultant, India, Narayan Prasad, Indira Gandhi National Open University, Indiaa

CABI Climate Change series

This book offers a wide, in-depth study of the gender-climate change-agriculture nexus. Despite more than 40 years of research exploring this nexus, there is still ambiguity around the foundations, connections, and approaches for planning gender-inclusive climate policies. This volume aims to clear that ambiguity.

Oct 2022 | HB | 9781789249897 | 200pp
£95 | €110 | $125

Courtship and Mate-Finding in Insects
A Comparative Approach
Raymond J C Cannon, formerly of the Food and Environment Research Agency, UK

This fascinating and beautifully illustrated book describes the incredible variety of courtship behaviours and celebrates the wonderful natural history of a wide range of insects. It will be of interest to students of biology, professional entomologists and amateur naturalists with a desire to know more about the behaviour of the small creatures with which we share the planet.

Nov 2022 | HB | 9781789248609 | 400pp
£95 | €115 | $135

Dragonfly Conservation
Michael J Samways, Stellenbosch University, South Africa

This is the first, comprehensive, single-authored, modern text on the conservation of this iconic group of insects. Dragonflies are sensitive to the health of freshwater systems, and the quality of vegetation along rivers and around ponds. Dragonflies are excellent indicators of the quality of our freshwater supplies.

Sep 2022 | HB | 9781789248371 | 376pp
£95 | €115 | $130
Invasive Species and Global Climate Change
2nd Edition
Edited by Lewis Ziska, USDA-ARS, USA
CABI Invasives Series
This book explores the nexus of climate change and biological invasions, resulting impacts (biological and economic) and assesses ways to reduce vulnerability and increase the resiliency and sustainability of managed and unmanaged ecosystems in the following parts (1) the dimensions of the problem; background and science; (2) case studies; (3) Management: detection and prevention; and (4) management: control and adaptation.

Sep 2022 | HB | 9781800621435 | 304pp
£95 | €110 | $130

The Relationship Between Soil and Global Climate Change
Processes, Impacts And Adaptations
Pedro Antunes, Algoma University, Canada
A comprehensive, science-based, overview on how the planet’s soils affect and are affected by climate change, including an overview of the global contribution of soil to greenhouse gas emissions, evidence of how past climate change affected edaphic factors and how this knowledge can relate to the present and future climate.

Jul 2022 | HB | 9781789246780 | 232pp
£95 | €115 | $135

Crop Pollination by Bees
Crop Pollination by Bees, Volume 2
Individual Crops and their Bees
2nd Edition
Keith S Delaplane, University of Georgia, USA
Volume 2 of a practical guide to bees and how they pollinate essential crops. Provides simple, succinct advice on how to increase bee abundance and pollination. Very useful for farmers, horticulturalists, gardeners, and those interested in insect ecology and conservation, including students of entomology and crop protection.

Jul 2022 | PB | 9781786393524 | 128pp
£45 | €60 | $75

Crop Pollination by Bees, Volume 1
Evolution, Ecology, Conservation, and Management
2nd Edition
Keith S Delaplane, University of Georgia, USA
A practical guide to bees and how they pollinate essential crops. Provides simple, succinct advice on how to increase bee abundance and pollination. Very useful for farmers, horticulturalists, gardeners, and those interested in insect ecology and conservation, including students of entomology and crop protection.

Aug 2021 | PB | 9781786393494 | 192pp
£49.99 | €57.50 | $67.50

Transgenic Insects
Techniques and Applications
2nd Edition
Edited by Mark Quentin Benedict, Centers for Disease Control and Prevention, USA, Maxwell Scott, North Carolina State University, USA
CABI Biotechnology Series
This book describes the huge opportunity to modify insect phenotypes through genetic engineering to benefit human health and agriculture. Precise DNA modifications and gene drive approaches are much more focused with improved safety. The development of modelling, ethical considerations, public response and regulatory oversight is covered.

May 2022 | HB | 9781800621152 | 504pp
£125 | €145 | $170

Encyclopedia of Scale Insect Pests
Edited by Takumasa Kondo, Agrosavia, Colombia, Gillian Watson, Natural History Museum, London, UK
Scale insects are major pests worldwide. They are one of the most invasive plant pest groups and cause billions of dollars damage to a wide variety of crops each year. The Encyclopedia of Scale Insect Pests is the most comprehensive, fully illustrated work on scale insect pests worldwide.

Mar 2022 | HB | 9781800620643 | 720pp
£250 | €287.50 | $337.50

The Fruit Fly Fauna (Diptera : Tephritidae : Dacinae) of Papua New Guinea, Indonesian Papua, Associated Islands and Bougainville
Richard A I Drew, Griffith University, Australia, Meredith C Romig, Griffith University, Australia
A taxonomic treatise of the tropical fruit flies of Papua New Guinea, Indonesian Papua, associated islands and Bougainville, with an updated record of all known species of Dacinae that occur in this geographic area including descriptions of 66 new species out of an entire list of 296 known species covered.
Jan 2022 | HB | 9781789249514 | 152pp
£85 | €100 | $115

Pest Management in Cotton
A Global Perspective
Edited by Graham A. Matthews, Emeritus Professor, Imperial College London, UK, Thomas A. Miller, University of California Riverside, USA
This book describes the background and present state of pest management in cotton crops throughout the world. Cotton is one of the most economically important crops globally, and new, emerging pests driven by climate change, for example, are proving increasingly problematic. The book highlights new techniques in cotton crop protection.
Dec 2021 | HB | 9781800620216 | 288pp
£95 | €110 | $130

Climate, Ticks and Disease
Edited by Pat Nuttall, University of Oxford, UK
CABI Climate Change series
This book brings together expert opinions from scientists to consider the evidence for climate change and its impacts on ticks and tick-borne infections, and provide predictions for the future.
Dec 2021 | HB | 9781789249637 | 544pp
£150 | €175 | $205

Ecology of Freshwater Nematodes
Edited by Walter Traunspurger, University of Bielefeld, Germany
Nematodes, with a simple, tubular body form are the most abundant multicellular animals on earth. Freshwater nematodes are central in the context of environmental monitoring, pollution assessments, global warming and food chain complexes, and this is increasingly being recognised.
Aug 2021 | HB | 9781789243635 | 400pp
£95 | €110 | $130

Temperate Agroforestry Systems
2nd Edition
Edited by Andrew M Gordon, University of Guelph, Canada, Canada, Steven M Newman, formerly University of Leeds, UK, Brent Coleman, University of Guelph, Canada
This edition brings together many examples of temperate agroforestry and makes valuable reading for all those working in this area as researchers, practitioners and policy makers. It includes additional chapters on India and Chile, and as a result of ongoing advances in the field, separate chapters on the US, Canada, the UK and continental Europe.
Dec 2021 | PB | 9781780644868 | 326pp
£45 | €60 | $85

Invasion Biology
Hypotheses and Evidence
Edited by Jonathan M Jeschke, Leibniz-Institute of Freshwater Ecology and Inland Fisheries, Germany, Tina Heger, Technical University of Munich, Germany
There are many hypotheses describing the interactions involved in biological invasions, but it is largely unknown whether they are backed up by empirical evidence. This book fills that gap by assessing research hypotheses and applying it to a number of invasion hypotheses, using the hierarchy-of-hypotheses (HoH) approach.
Dec 2021 | PB | 9781800621619 | 188pp
£45 | €50 | $60

Understanding Soils in Urban Environments
2nd Edition
Pam Hazelton, University of Technology Sydney Australia, Brian W Murphy, Office of Environment and Heritage, Australia
Urban soils provide the foundation for buildings and infrastructure, and the medium for plant growth in fields, parks and gardens. This text recognises and draws attention to the particular nature of soils in urban environments and discusses their distinctive management needs.
Nov 2021 | HB | 9781789249934 | 200pp
£85 | €100 | $120
World, excluding Aus & NZ

Biology and Management of the German Cockroach
Edited by Changlu Wang, Rutgers University, USA, Chow-Yang Lee, University of California, Riverside, USA, Michael Rust, University of California, USA
A comprehensive overview of the German cockroach and its management.
May 2021 | HB | 9781789248104 | 320pp
£120 | €145 | $170
World, excluding Aus & NZ
Chalcidoidea of Iran (Insecta: Hymenoptera)
Edited by Hassan Ghahari, Islamic Azad University, Iran, Gary Gibson, Agriculture and Agri-Food Canada, Gennaro Viggiani, University of Naples, Italy

A catalogue and reference volume of the species diversity of the Chalcidoidea (an important diverse group of parasitic wasps used in biological control of crop pests) based on little known records from Iran and 15 neighbouring countries. It is an invaluable source of information for all those interested in Chalcidoidea and those working in crop protection (especially biological control) and Integrated Pest Management.

Feb 2021 | HB | 9781789248463 | 448pp
£225 | €270 | $315

Forestry Compendium
Global coverage of tropical, subtropical, temperate and boreal trees, forests and woody plant species as well as pests and diseases

- Over 2,300 detailed datasheets on tree species of economic importance worldwide and lesser-known species of local importance as well as forest pests, diseases and weeds
- Over 19,000 basic datasheets on further species
- Over 5,500 illustrations for easy identification and teaching
- A multilingual glossary including over 16,000 forestry terms in English, French, Spanish, German and Portuguese

Demand-led breeding has the potential to combine the best of institutional and commercial approaches to produce plant varieties that are really needed. This book shows how the approach works in practice with case studies and analysis.

Since publication of the first edition in 2012, there is increased awareness of plant health and biosecurity. This practical manual deals with recognition of disease symptoms, detection and identification of fungi and methods to characterise them, as well as curation, quarantine, quality assurance, and new chapters on tree health and outreach.

Agricultural biostimulants are a group of substances or microorganisms that are applied to plants or soils to improve crop vigour, yields, quality and tolerance of abiotic stresses. This book reviews their role in crop production and agricultural sustainability.

This book provides understandable, science-based and extension knowledge of the identity, biology, ecology and integrated management of turfgrass diseases.

Fungi are a major problem in agriculture, and one that affects us all. This is a guide for practitioners and scientists involved in fungicide research and use.

Nematodes, especially Caenorhabditis elegans have been used as a model for research in molecular biology since the 1960s. This is a much-needed update on research on fundamental processes in areas such as genetics, developmental biology, nutrition, toxicology, ecology, pharmacology and medicine.

Integrated Nematode Management  
State-of-the-Art and Visions for the Future  
Edited by Richard A Sikora, Professor Emeritus, University of Born, Germany, Johan Desaeger, University of Florida, USA, Leendert P. G. Molendijk, Wageningen University, The Netherlands  
This book reviews in a systematic crop by crop approach the state-of-the-art management strategies that have been developed to reduce nematode impact, and outlines their limitations.

Mutation Breeding, Genetic Diversity and Crop Adaptation to Climate Change  
Edited by Sobhana Sivasankar, International Atomic Energy Agency, Austria, Thomas Henry Noel Ellis, John Innes Center, UK and University of Auckland, New Zealand, Ljupcho Jankuloski, FAO/IAEA, Austria, Ivan Ingelbrecht, International Atomic Energy Agency, Austria  
International authors review achievements, new developments, trends and challenges in the field of plant mutation breeding, across the scientific community and the private sector. Chapters highlight specific challenges, such as emerging transboundary threats to crop production, and assess the overall importance of mutation breeding to food security.

Gene Flow  
Monitoring, Modeling and Mitigation  
Edited by Wei Wei, Institute of Botany, Chinese Academy of Sciences, China, Neal Stewart, University of Tennessee, USA  
This book discusses gene flow of transgenes from genetically modified organisms into nature, with a focus on monitoring, modelling and mitigation. It includes both scientific reviews and perspectives on gene flow and experimental case studies, for example, gene flow of soyabean and poplar.

Nov 2021 | HB | 9781789247480 | 168pp  
£85 | €105 | $120

Applied Crop Physiology  
Understanding the Fundamentals of Grain Crop Management  
Dennis B Egli, Emeritus, University of Kentucky, USA  
This book describes the fundamental processes involved in the accumulation of biomass and the production of grain yield by agronomic crops and discusses how these processes underlie and influence management decisions.

Sep 2021 | HB | 9781789245950 | 192pp

RNAi for Plant Improvement and Protection

Edited by Bruno Mezzetti, Università Politecnica delle Marche, Italy, Jeremy Sweet, National Institute of Agricultural Botany (NIAB), Cambridge, UK, Lorenzo Burgos, CEBAS-CSIC, Spain

International experts review RNA interference (RNAi), methods for developing RNAi systems in GM plants and a range of applications for crop improvement, crop production and crop protection. Chapters examine both endogenous systems in GM plants and exogenous systems where interfering RNAs are applied to target plants, pests and pathogens.

Crop Production Science in Horticulture series

**Peach and Nectarine**
Edited by George Athanasios Manganaris, Cyprus University of Technology, Cyprus, Guglielmo Costa, University of Bologna, Italy, Carlos H Crisosto, University of California, Davis, USA

New book providing comprehensive, fundamental and up-to-date information on the production processes for fresh market and canning peach and nectarine, including orchard establishment, production, postharvest handling and uses. Highly illustrated in full colour. Essential reading for students and professionals in pomology, including growers, consultants and extension specialists.

Jul 2022 | PB | 9781789248432 | 320pp
£49.99 | €60 | $70

**Date Palm**
Edited by Jameel M Al-Khayri, King Faisal University, Saudi Arabia, Shri Mohan Jain, University of Helsinki, Finland, Dennis V Johnson, Robert R Krueger, USDA-ARS, University of California, Riverside, USA

A new comprehensive standard reference work on modern practices in date palm cultivation for researchers in horticulture and producers.

Sep 2022 | PB | 9781800620186 | 496pp
£60 | €70 | $80

**Cut Flowers and Foliages**
Edited by James E. Faust, Clemson University, USA, John Dole, North Carolina State University, USA

The cut flower and foliage industry is a global business with major production locations around the world. With a focus on production in protected cultivation, this book describes how to successfully grow and harvest high quality flowers.

Jun 2021 | PB | 9781789247602 | 408pp
£49.99 | €60 | $70

**Chrysanthemum**
Edited by Ep Heuvelink, Wageningen University and Research, The Netherlands, M. SharathKumar

This book serves as a practical reference for researchers and growers with comprehensive and accessible information on all aspects of production, physiology, genetics -breeding and biotechnology of the chrysanthemum crop.

Oct 2022 | PB | 9781789248265 | 256pp
£49.95 | €60 | $70

**Mushrooms**
Agaricus bisporus
Edited by Youssef Najib Sassine, Lebanese University, Lebanon

Addresses both scientific and practical aspects of growing the common mushroom, *Agaricus bisporus*. It includes general aspects of mushroom cultivation, substrates properties, breeding, casing and cropping, pests and diseases, harvesting and postharvest technologies.

Oct 2021 | PB | 9781800620144 | 400pp
£60 | €70 | $80

Botany, Production and Uses series

**Edible Alliums**
*Botany, Production and Uses*
Edited by Haim D Rabinowitch, Hebrew University of Jerusalem, Israel, Brian Thomas, University of Warwick, UK

Allium crops include many economically important species, such as onions, shallots, garlic, leeks, and chives. They grow in a range of ecological conditions and are harvested worldwide. This book provides a comprehensive review of edible Alliums from a scientific and horticultural perspective.

**The Fig**
*Botany, Production and Uses*
Edited by Ali Sarkhosh, University of Florida, USA, Alimohammad Yavari, Pomologist & Consultant, Tehran, Iran, Louise Ferguson, University of California, Davis, USA

This book provides a comprehensive review of fig growing from a scientific and horticultural perspective, covering botany, production, processing, health, and industrial uses.

**Guava**
*Botany, Production and Uses*
Edited by Sisir Mitra, International Society for Horticultural Science, India

Guava is considered a minor tropical fruit (together with lychee, longan, durian etc.), although is the largest in terms of output. This is the first comprehensive book authored by an international team of experts, and covers botany, biotechnology, propagation, production, pests and diseases, postharvest, and processing.

**Loquat**
*Botany, Production and Uses*
Edited by Sisir Mitra, International Society for Horticultural Science, India, Aytekin Polat, Mustafa Kemal University, Turkey

With contributions from leading international researchers, this book reviews the current state of knowledge concerning the history, physiology, culture and marketing of loquat throughout the world.

**Yams**
*Botany, Production and Uses*
Anthony Keith Thompson, King Mongkut’s Institute of Technology Ladkrabang, Thailand, Ibok Oduro, The Kwame Nkrumah University of Science and Technology (KNUST), Ghana

*Dioscorea* species, commonly known as yam, are tuberous plants which constitute a major staple food in many parts of Africa, Southeast Asia and the South Pacific. This book covers botany, taxonomy, composition and uses, cultivation, production, diseases and pests, and storage.

Vegetable Seeds
Production and Technology
Gregory E Welbaum, Virginia Tech
University, USA
Farmers all over the world share one concern: how to get the best seed and planting material for next season’s crops. This book covers it, and is a replacement for CABI’s Vegetable Seed Production by R.A.T. George, now out of print.
Nov 2022 | HB | 9781789243246 | 350pp
£95 | €125 | $160

Advances in Fig Research and Sustainable Production
Edited by Moshe A Flaishman, The Volcani Center, Agriculture Research Organization, Israel, Uygun Aksoy, formerly Ege University, Turkey
This book provides a comprehensive review of fig research, both basics and applications. It addresses the recent scientific results in genetics, genomics, metabolomics, pharmaceutical properties, understanding of symbiosis, new management, post-harvest technology and diseases and pest management of figs.
May 2022 | HB | 9781789242478 | 536pp
£135 | €155 | $210

Plants for Soil Regeneration
An Illustrated Guide
Sally Pinhey, Institute of Analytical Plant Illustration, UK, Margaret Tebbs, The Natural History Museum, UK
This book gives farmers, growers and gardeners information and a visual guide to the plants which can be used to improve soil quality without the use of agrichemicals.
Mar 2022 | HB | 9781789243604 | 168pp
£55 | €63 | $75

Concepts for Understanding Fruit Trees
Theodore M. De Jong, University of California, Davis, USA
This book provides a clear set of integrative concepts for understanding how fruit trees work. The emphasis is on overarching principles rather than detailed descriptions of tree physiology or differences among the numerous species of fruit trees.
Jan 2022 | PB | 9781800620865 | 136pp

The Constituents of Medicinal Plants
3rd Edition
Andrew Pengelly, Maryland University of Integrative Health, USA
Pengelly’s book is a classic in the literature of herbal medicine. It is an easy to understand introduction to the chemistry of medicinal plants. This new edition is thoroughly updated incorporating topics of contemporary interest, including cannabinoids, mushroom polysaccharides, and toxicology of phytochemicals.
May 2021 | PB | 9781789243079 | 232pp
£25 | €30 | $35

Hydroponics and Protected Cultivation
A Practical Guide
Lynette Morgan, SUNTEC International Hydroponic Consultants, New Zealand
A comprehensive, practical text which covers a diverse range of hydroponic and protected cropping techniques, systems, greenhouse types and environments. It also covers related subjects such as the use of indoor plant factories, vertical systems, organic hydroponics, aquaponics and other systems.
Mar 2021 | HB | 9781789244830 | 320pp
£49.99 | €57.50 | $67.50
Horticultural Science

The leading database on tropical, subtropical and temperate horticultural science research

- Over 1.7 million bibliographic records (derived from CAB Abstracts) with detailed keyword (metadata) tagging and coverage since 1930
- Weekly updates; with over 50,000 records added per year
- Over 125,000 full text documents (journal articles, conference papers, reports), with over 9,000 currently added per year
- English summaries from literature from over 100 countries
- More than 140 CAB Reviews – timely analysis written by subject experts

www.cabi.org/horticulture
Climate Change and Global Health
2nd Edition
Edited by Colin Butler, University of Canberra, Australia, Kerryn Higgs, University of Tasmania, Australia, Kim Van Daalen, University of Cambridge, UK
This new edition provides a substantially updated, authoritative, critical and yet accessible perspective on public health aspects of climate change, including chapters on “cross-cutting” issues (e.g. mental health) and the impacts on several regions, including China, Africa and South Asia.
Dec 2022 | HB | 9781800620001 | 360pp

£95 | €110 | $130

The Handbook of Mites of Stored Products
Vincenzo Vacante, Mediterranean University, Italy, Carlos H W Flechtmann, University of Sao Paulo, Brazil
The presence of mites in stored food has serious hygienic and health implications associated with economic loss; this book provides up-to-date and comprehensive information, written by an experienced author in the field.
Oct 2022 | HB | 9781786390899 | 464pp
£175 | €230 | $290

Infodemics
Edited by Millie Phiri, University of Johannesburg, South Africa, Jennifer Cole, Royal Holloway, University of London, UK, Tim Nguyen, World Health Organisation, Switzerland, Sylvie Briand, World Health Organisation, Switzerland
Information dissemination is particularly important during pandemics, as it can spread more quickly than disease. Beginning with an introduction to this phenomenon, this text illuminates the characteristics of infodemics, as well as the challenges and public health skills needed, before discussing how to implement an infodemic programme.
Aug 2022 | PB | 9781800620681 | 216pp

Applied Animal Endocrinology
3rd Edition

E. James Squires, University of Guelph, Canada

This text explains the role of hormones in improving and monitoring the production, performance, reproduction, behaviour and health of livestock animals. It covers different endocrine systems and how these can be manipulated to advantage, covering the mechanism of action and highlighting common themes to help stimulate development of new methods.

Animal Health and Climate Change

Edited by Luke York, Australian Government Department of Foreign Affairs and Trade, Australia, Naomi Bull, London School of Hygiene and Tropical Medicine, UK, Claire Heffernan, London International Development Centre, UK

Climate change and changing weather patterns are major factors impacting the spread of animal disease. This book provides a balanced assessment of the current state of knowledge and potential future impacts of climate change across a range of infectious animal diseases, including viral, tick-borne, parasitic and zoonotic diseases.

Aquaculture
An Introductory Text
4th Edition

Robert R Stickney, Texas A&M University, USA, Delbert M Gatlin III, Texas A&M University, USA

This new edition covers sustainable aquaculture development, culture systems, hatchery methods, reproductive strategies, harvesting and many other topics. Fully updated and revised, it includes more information on open ocean cage culture, diseases and parasites, nutrition, biofloc technology, climate change, probiotics, and the impact of COVID-19.

Insects as Animal Feed
Novel Ingredients for Use in Pet, Aquaculture and Livestock Diets
Edited by Heidi Hall, Anpario plc, UK, Elaine Fitches, Durham University, UK, Rhonda Smith, Minerva, UK

Covering global production systems of insect protein, oil and chitin, as well as industry co-products, this book considers nutritional and safety aspects of insects for feed. It reviews the challenges of regulation and legislation, consumer acceptance, and commercialisation of insects, and sustainable practices such as waste valorisation.

Fundamentals of Applied Animal Nutrition
Gordon Dryden, Dryden Animal Science, Australia, and University of Queensland, Australia

This book introduces the basic aspects of animal nutrition, giving a practical overview of the principles which underpin the design and management of farm animal feeding systems. It covers digestive function, nutrients and feed intake, feed related disorders, grazing behaviour and management, climate change and the environment, and more.

Jun 2021 | PB | 9781786394453 | 280pp
£45 | €50 | $60

Nutrition and Feeding of Organic Cattle
2nd Edition
Robert Blair, University of British Columbia, Canada

After an overview of the principles behind organic cattle production, this book presents how to feed cattle in order to meet organic standards. Including a comprehensive summary of ruminant digestive processes and nutrition, this new edition considers sustainability, profitability, declining organic feed supplies and diet-related health issues.

Mycoplasmas in Swine
Edited by Dominiek Maes, Ghent University, Belgium, Marina Sibila, Centre de Recerca en Sanitat Animal (CReSA), Spain, Maria Pieters, University of Minnesota, USA

Swine can be infected with many mycoplasmas, some of which cause significant health and welfare issues in pigs, and major losses to the swine industry worldwide. This book provides up-to-date scientific, clinical and practical information of the most important pathogenic mycoplasmas, such as Mycoplasma hyopneumoniae.

Tourism Planning and Development in Eastern Europe
Edited by Hania Janta, University of Basel, Switzerland, Konstantinos Andriotis, Middlesex University London, UK, Dimitrios Styliidis, University of Crete, Greece
This book outlines contemporary strategies for tourism development in post-socialist countries, reviewing the opportunities and challenges as well as initiatives and approaches to sustainability. Reviewing development and planning across Albania, Bulgaria, Croatia, Czechia, Estonia, Latvia, Poland and Romania, it also considers post-COVID tourism.
Jul 2022 | HB | 9781800620339 | 208pp
£95 | €110 | $130

Tourism Planning and Development in South Asia
Edited by Dimitrios Styliidis, University of Crete, Greece, Boopen Seetanah, University of Mauritius, Mauritius
Presents key issues of tourism planning and development in India, Sri Lanka, Pakistan, Bangladesh, Nepal, Maldives, Afghanistan, and Bhutan. Demonstrates experiences, challenges, successful and unsuccessful stories and specific cases of countries within South Asia. Written by scholars with extensive research experience on tourism in these countries.

The growth of peer-to-peer (P2P) accommodation has been remarkable. However, the rapid expansion of the phenomenon has yielded several concerns over its potentially negative impacts on the economic, social and environmental levels. This edited book addresses the need to examine the P2P accommodation phenomenon from a sustainability lens.

Mar 2022 | HB | 9781800621282 | 168pp
£85 | €100 | $120

This book provides an overview of the history and evolution of tourism to the present, and speculates on possible and probable change into the future. It uses several practitioner-linked, real-life examples and case studies derived from all aspects of the tourism, travel and events industries.

Mar 2022 | HB | 9781800621497 | 268pp
£95 | €110 | $130

This edited book addresses the need to examine the P2P impacts on the economic, social and environmental levels. This edited book addresses the need to examine the P2P phenomenon from a sustainability lens.

CAB eBooks offers anytime, anywhere unlimited access to CABI’s renowned book list via our web-based platform. That means complete applied life science coverage with no limits or restrictions to concurrent users, downloads, printing, sharing or interlibrary loan.

CAB eBooks Front File (2017–present)
The CAB eBooks Front File is a dynamic subscription product that grows as newly published books are added. There are over 230 books in this collection published from 2017 onwards, with 40-50 new titles added each year.

Fixed collections
All of CABI’s fixed, multi-disciplinary eBook collections are available for one-off purchase with perpetual ownership.

- CAB eBooks 2017–2019: 135 titles
- CAB eBooks 2014–2016: 119 titles
- CAB eBooks 2007–2013: 341 titles

CABI Choice Collections
CABI Choice Collections are precision tools for selecting exactly the right content for your library. With flexible pick and mix options, you can choose from over 900 titles and you own your collection with outright purchase.

Choice Annual Collections
Yearly collections are available from 2017 in concise packages of CABI’s most recent content.

Choice Reference
CABI reference eBooks are available to buy for site-wide access. Easy-to-search PDFs bring encyclopedias, dictionaries and taxonomic keys straight to readers’ fingertips.

Your Choice
Choose any titles from the entire Choice Collections list: no minimum or maximum number, select exactly the eBooks you want.

Subject Collections
Seven subject collections available on a subscription-based model. These collections are continually growing as new titles are published.

- Agriculture: 247 titles
- Environmental Sciences: 254 titles
- Forestry: 71 titles
- Human, Food and Nutrition Sciences: 98 titles
- Plant Sciences: 338 titles
- Tourism, Leisure and Hospitality: 180 titles
- Veterinary and Animal Sciences: 192 titles

More information
To find out how our eBooks can fit your library, please contact your CABI Regional Sales Manager or email our team on sales@cabi.org

We have many regional representatives worldwide. For a complete list, please contact the Sales Operations Manager (details above).
The use of multiple-choice questions and other short-answer exercises in the assessment of students is popular at many stages of education because marking can be automated and they remove the possibility of subjectivity. Questions are designed to test knowledge, understanding and the ability to interpret data. These handy books can be used anywhere, whilst the structure allows students to focus on one topic at a time, progressing from simple to more demanding questions, making them useful at any time in a student’s career.
