eBooks

Many CABI titles are available in eBook format. These can be found through all major eBook retailers and institutional suppliers where available.

Please note: all details were correct at the time this catalogue went to press, but may be subject to change without notice. Please refer to www.cabi.org/bookshop for up-to-date title information.

US publication may be up to 2 months after UK publication.

Textbooks

Indicates the publication is a textbook and available for inspection by lecturers wishing to evaluate it for course use. Please visit www.cabi.org/bookshop/inspection-copies to request your copies.

A number of textbooks are now enhanced by open resources, to improve the learning experience for students and researchers. Including lecture slides, maps, images and other material, these resources provide additional information to supplement CABI’s publishing products: www.cabi.org/openresources
Key Questions in Environmental Toxicology  
J P F D’Mello, formerly Scottish Agricultural College, UK  
Questions review the origin, characterization and environmental distribution of major pollutants, followed by their absorption and metabolic disposition in living organisms, and their implications for human morbidity, ecological impact and biodiversity. A selection of questions types and full answer rationales keep learning varied and engaging.

Apr 2022 | PB | 9781789248524 | 136pp  

Presenting Science Concisely  
Bruce Kirchoff, University of North Carolina at Greensboro, USA  
The focus of this book is on shorter presentations, three-minute talks, poster presentations, elevator pitches and advocacy speeches. It begin with best practices for three-minute presentations, then applies the same principles to slightly longer (posters) and shorter (elevator pitches and advocacy speeches) presentations.

Practical Control of Mosquitoes as Disease Vectors  
Edited by J Derek Charlwood, Liverpool School of Tropical Medicine, UK and Instituto de Higiene e Medicina Tropical, Portugal, Carla A Sousa, IHMT, University of New Lisbon, Portugal  
Disease vector control is rapidly changing, and this book provides a practical review of conventional control methods, and new and underused techniques. Also considering issues such as resistance, mosquito behaviour change, cost and climate change, it concludes with the politics and practicalities of method choice and implementation.

£35 | €40 | $47.50

Health and Natural Landscapes  
Concepts and Applications  
Alan W Ewert, formerly Indiana University, USA, Denise Mitten, Prescott College, USA, Jillisa Overholt, Warren Wilson College, USA  
Natural landscapes are intricately tied to human health and well-being, and increasingly valued for their stress-reduction benefits. Providing an overview of the history, theory, and individual and societal implications of human connection to landscape, this book delivers a research-backed introduction for students, academics and policy makers.

The Constituents of Medicinal Plants
3rd Edition

Andrew Pengelly, Maryland University of Integrative Health, USA

Pengelly’s book is a classic in the literature of herbal medicine. It is an easy to understand introduction to the chemistry of medicinal plants. This new edition is thoroughly updated incorporating topics of contemporary interest, including cannabinoids, mushroom polysaccharides, and toxicology of phytochemicals.

May 2021 | PB | 9781789243079 | 232pp
£25 | €30 | $35

One Health
The Theory and Practice of Integrated Health Approaches
2nd Edition

Edited by Jakob Zinsstag, Swiss Tropical and Public Health Institute, Switzerland, Esther Schelling, Vétérinaires Sans Frontières Suisse, Switzerland, Lisa Crump, Swiss Tropical and Public Health Institute, Switzerland, Maxine Whittaker, James Cook University, Australia, Marcel Tanner, Swiss Tropical and Public Health Institute, Switzerland, Craig Stephen, University of Saskatchewan and University of British Columbia, Canada

Retaining its interdisciplinary focus, this new edition includes more non-infectious disease issues and climate change discussion alongside revised case studies and expanded methodology chapters to draw out implications for practice.

Oct 2020 | HB | 9781789242577 | 464pp
£125 | €145 | $170

Health Promotion
Global Principles and Practice
2nd Edition

This new edition covers key concepts, theory and practical aspects of health promotion practice worldwide. It reviews social determinants, equality and equity, policy and health, working in partnerships, sustainability, evaluation and evidence-based practice, drawing upon international settings and teaching experience in the global North and South.

Dec 2020 | PB | 9781789245332 | 264pp

Antimicrobial Stewardship for Nursing Practice
Edited by Molly Courtenay, Cardiff University, UK, Enrique Castro-Sánchez, Imperial College London, UK

With antimicrobial resistance on the rise, appropriate stewardship is more important than ever. This textbook, the first written by nurses for nurses, provides a clear and concise approach to good practice.

Feb 2020 | PB | 9781789242690 | 152pp
£19.99 | €25.99 | $32.99

A Handbook of Environmental Toxicology
Human Disorders and Ecotoxicology
Edited by J P F D’Mello, formerly Scottish Agricultural College, UK

This handbook focuses on human disorders and ecotoxicology, as affected by major toxins originally from biology sources and pollutants, and radiation generated spontaneously or as a result of anthropogenic activity. The book explores the cutting edge of research and also indicates the likely direction of future developments.

Dec 2019 | HB | 9781786394675 | 608pp
£195 | €255 | $320

Natural Environments and Human Health
Alan W Ewert, formerly Indiana University, USA, Denise Mitten, Prescott College, USA, Jillisa Overholt, Warren Wilson College, USA

The role natural environments play in human health and wellbeing is attracting increasing attention. This book examines the history of natural environments used for stress-reduction, enjoyment, aesthetics and catharsis, and traces the development of connections between humans and environment, and how they impact our personal and collective health.

Oct 2019 | PB | 9781786395290 | 248pp
£40 | €50 | $55

Planetary Health
Human Health in an Era of Global Environmental Change
Jennifer Cole, Royal Holloway, University of London UK

Planetary Health - the idea that human health and the health of the environment are inextricably linked - promotes the preservation of natural systems for the benefit of human health. This book reviews the varied approaches to the subject, as well as providing case study chapters on the main links between human health and environmental change.

CABI Invasives series

**Invasive Species and Human Health**
Edited by Giuseppe Mazza, Università degli Studi di Firenze, Italy, Elena Tricarico, Università degli Studi di Firenze, Italy

This book examines direct effects to human health from invasive species such as bites, wounds and illness and indirect effects via changes induced in the ecosystems. It covers case studies from different taxa (animals and plants) and in developed and developing countries.

Jul 2018 | HB | 9781786390981 | 208pp
£85 | €110 | $140

**Urban Pest Control**
A Practitioner's Guide
Partho Dhang, Independent Consultant, Philippines

This guide provides the key information required by practitioners engaged in urban and household pest control. Written with an emphasis on practical advice, this book is heavily illustrated and printed in full colour throughout to act as a useful tool for self-learning as well as training fellow practitioners.

Apr 2018 | PB | 9781786395146 | 138pp
£19.99 | €25.99 | $32.99

**Antimicrobial Stewardship**
Principles and Practice
Edited by Kerry LaPlante, Veterans Affairs Medical Centre, USA, Cheston Cunha, Brown University, USA, Haley Morrill, Veterans Affairs Medical Center, USA, Louis Rice, Rhode Island Hospital, USA, Eleftherios Mylonakis, Division of Infectious Diseases, Rhode Island Hospital, USA

Antimicrobial research has hit a wall: treatment discoveries are rarer and resistant pathogen strains more prevalent. Antimicrobial stewardship is an essential measure in ensuring management of hospital-acquired infections. Throughout this book, international experts discuss all angles of stewardship.

Dec 2016 | HB | 9781780644394 | 450pp
£159.15 | €206 | $265.25

**Antimicrobial Peptides**
Discovery, Design and Novel Therapeutic Strategies
2nd Edition
Edited by Guangshun Wang, University of Nebraska Medical Center, USA

This thoroughly updated new edition lays the foundations for studying antimicrobial peptides (AMPs), including a discovery timeline, terminology, nomenclature and classifications. It covers current advances in research, examines state-of-the-art technologies, and describes new methods and strategies for AMP prediction, design and applications.

Natural Polymers for Drug Delivery
Edited by Harsha Kharkwal, Amity University, India, Srinivas Janaswamy, South Dakota State University, USA
This book provides an overview of the source, chemical structure and action mechanism of natural polymers. Focusing on their utility in developing effective drug delivery systems, it covers polymers’ role in binding drugs towards enhancing bioavailability, modification and derivatisation for targeted delivery, and modification as active drugs.

Dec 2016 | HB | 9781780644479 | 216pp
£100.99 | €132.80 | $169.95

Global Health Research in an Unequal World
Ethics Case Studies from Africa
Gemma Aellah, Royal Anthropological Institute, UK, Tracey Chantler, London School of Hygiene and Tropical Medicine, UK, P. Wenzel Geissler, University of Oslo, Norway
This book is a collection of fictionalised case studies of everyday ethical dilemmas and challenges, encountered in the process of conducting global health research in places where the effects of global, political and economic inequality are particularly evident.

Sep 2016 | PB | 9781786390042 | 274pp
£25 | €35 | $35

Health Emergency Preparedness and Response
Edited by Chloe Sellwood, NHS England and University of Nottingham, UK, Andy Wapling, NHS England, UK
Intensely practical and illustrated with real-life examples, this text covers the breadth of health emergency preparedness, resilience and response topics in the context of inter-disciplinary and whole society responses. It includes public, private and third sector roles in preparation for and in response to natural and man-made events.

Aug 2016 | PB | 9781780644554 | 230pp
£39.99 | €55 | $65

Climate Change and Global Health
Edited by Colin Butler, University of Canberra, Australia
In this authoritative book, international experts examine long-recognised areas of health concern for populations vulnerable to climate change, describing effects that are both direct, such as heat waves, and indirect, such as via vector-borne diseases.

Jun 2016 | PB | 9781780648583 | 342pp

Chronic Non-communicable Diseases in Low and Middle-income Countries
Edited by Ama de-Graft Aikins, University College London, UK, Charles Agyemang, Department of Public Health, The Netherlands
Low and middle income countries bear a significant proportion of the global burden of chronic non-communicable diseases. This book synthesizes evidence across countries that share similar socio-economic, developmental and public health profiles, providing insights on successful and sustainable interventions and policies.

Dec 2015 | HB | 9781780643328 | 248pp
£45 | €55 | $65

Geographic Health Data
Fundamental Techniques for Analysis
Edited by Francis P Boscoe, New York State Cancer Registry, USA
This book is an accessible overview of recurring global problems in the display and analysis of health data involving a geographic component. Focusing on proven techniques for real-world data sets, it provides a comprehensible introduction to geographic information systems (GIS) and includes information on GIS applications in disaster response.

Sep 2013 | HB | 9781780640891 | 232pp
£99.90 | €127.20 | $187.95

Disaster Management
Medical Preparedness, Response and Homeland Security
Edited by Rajesh Arora, Defence Research and Development Organization, Delhi, India, Preeti Arora, Guru Gobind Singh Indraprastha University, India
Disaster management is increasingly important, as effective management can save lives and minimize casualties. This book discusses best practice in both developed and developing countries, including planning and preparedness of hospitals, emergency medical services, communication and IT tools for medical disaster response and psychosocial issues.

Sep 2013 | HB | 9781845939298 | 680pp
£132.85 | €176.10 | $253.40

Rodent Pests and Their Control
2nd Edition
Edited by Alan P Buckle, University of Reading, UK, Robert H Smith, University of Huddersfield, UK
In the last two decades, the science and practice of rodent control has faced new legislation on rodenticides, the pests’ increasing resistance to chemical control and the impact on non-target species. This updated 2nd edition is therefore a key read for researchers, conservationists, practitioners and public health specialists within pest control.

Genetic Epidemiology
Methods and Applications
Melissa A Austin, University of Washington, USA

Following an overview of the field, this textbook reviews key genetic concepts, provides an update on relevant genomic technology, and describes methods for assessing the magnitude of genetic influences on diseases and risk factors. It is an essential resource for graduate students in epidemiology and public health genetics.

Jun 2013 | PB | 9781780641812 | 216pp
£39.95 | €55 | $75

Maternal and Perinatal Health in Developing Countries

Edited by Julia Hussein, formerly University of Aberdeen, UK, Affette M McCaw-Binns, The University of the West Indies at Mona, Jamaica, Jürgen König, University of Vienna, Austria, Donato F Romagnolo, University of Arizona, USA, Roger Webber, formerly London School of Hygiene and Tropical Medicine, UK

Taking a practical approach, this book covers the background and concepts underlying efforts to improve maternal and perinatal mortality, the current global situation and problems that prevent progress. It includes case studies and examples of successful strategies, recommends good practices, and provides a critical analysis of knowledge gaps.

Jun 2012 | HB | 9781845937454 | 256pp
£99.90 | €127.20 | $187.95

Statistical Epidemiology

Graham Law, University of Lincoln, UK, Shane Pascoe, Pascoe Psychology Pty Ltd, Australia

This textbook introduces students to statistical epidemiology methods in a structured and accessible format. Drawing on the authors’ extensive teaching experience, with defined learning outcomes, the suggested chapter orders can be tailored to the needs of students at both undergraduate and graduate level from a range of academic backgrounds.

Food Industry 4.0.
Unlocking advancement opportunities in the food manufacturing sector
Linh Duong, University of Lincoln, UK,
Sandeep Jagtap, Cranfield University, UK,
Wayne Martindale, University of Lincoln, UK,
Mark Swainson, University of Lincoln, UK
Highlights the advancement opportunities for the food manufacturing sector, including innovation in products, processes and services, and considers disruptive business models which offer alternative solutions to the food sector as it seeks to combine productive, efficient and sustainable practices. Draws on authors’ extensive industry and academic expertise.

Jan 2022 | PB | 9781789248425 | 192pp

The Fight Against Food Shortages and Surpluses
Perspectives of a Practitioner
John McClintock, ACTION for Food Reserves, Belgium

This book presents a logical argument, rigorously formulated, for practical policy options to fight food shortages and surpluses. It navigates the reader through issues and ideologies surrounding hunger, presents and tests hypotheses with theory and evidence, and concludes with workable policies to address food crises.

Oct 2020 | HB | 9781786394842 | 198pp
£95 | €110 | $130

Consumer Behaviour in Food and Healthy Lifestyles
A Global Perspective
Isaac K Ngugi, University of Bournemouth, UK, Helen O’Sullivan, University of Bournemouth, UK, Hanaa Osman, University of Bournemouth, UK

This book is an essential resource exploring the concepts, theories and methods in consumer behaviour specifically applicable to the food and drink sector. Drawing examples from all continents, it provides accessible coverage and a global perspective of the characteristics of this industry.

Health Benefits of Green Tea
An Evidence-based Approach

Edited by Yukihiko Hara, Tea Solutions, Hara Office Inc., Japan, Chung S Yang, Rutgers University, USA, Mamoru Isemura, University of Shizuoka, Japan, Isao Tomita, University of Shizuoka, Japan

This book reflects current understanding of the prevention of major chronic and some infectious diseases by tea and tea constituents. It explores common emerging themes related to the actions of tea polyphenols against different diseases, offering up-to-date data, evidence and comprehensive research.

Oct 2017 | HB | 9781786392398 | 260pp
£108 | €144 | $180

Microbial Food Safety
A Food Systems Approach

Charlene Wolf-Hall, South Dakota State University, USA, William Nganje, North Dakota State University, USA

This interdisciplinary, full-colour textbook describes microbial contaminants from plants, fungi and animal products that are potential risks to humans, reviewing their origin, risk, prevention and control. Using models to explain concepts, it shows interactions between humans moving food through global systems and impacts on microbial food safety.

Nutrition and Behavior
A Multidisciplinary Approach

2nd Edition

John Worobey, Rutgers University, New Jersey, USA, Beverly J Tepper, Rutgers University, New Jersey, USA, Robin B Kanarek, Tufts University, Medford, USA

The relationship between nutrition and behaviour is bi-directional, with nutrition able to affect activity, and behavior impacting diet and food intake. This book shows how behaviour may determine choices through peer modelling and poor dietary habits. Micronutrients and eating disorders are addressed, with a review of research methods and results.

Improving Diets and Nutrition
Food-based Approaches
Edited by Brian Thompson, FAO Italy, Leslie Amoroso, FAO Italy

Nutrition-sensitive, food-based approaches towards hunger and malnutrition are effective, sustainable and long-term solutions. Discussing the policy, strategic, methodological, technical and programmatic issues associated with such approaches, this book also provides practical lessons for advancing nutrition-sensitive, food-based approaches.

Dengue and Dengue Hemorrhagic Fever
2nd Edition
Edited by Duane J Gubler, Duke-NUS Graduate Medical School, Singapore, Eng Eong Ooi, Duke-NUS Graduate Medical School, Singapore, Goro Kuno, Arboviral Disease Branch, Centers for Disease Control and Prevention, Subhash Vasudevan, Duke-NUS Graduate Medical School, Singapore, Jeremy Farrar, Wellcome Trust, UK

This updated edition gathers leading research and clinical scientists to review the latest findings on dengue virus biology, epidemiology, entomology, Borrelia interactions, diagnostic testing, clinical manifestations, therapeutic options, host immunity and pathogenesis, and prognosis.

Nov 2019 | PB | 9781786395382 | 624pp
£50 | €60 | $70
Aug 2014 | HB | 9781845939649 | 624pp
£144 | €187.50 | $272.95

Communicable Diseases
A Global Perspective
6th Edition
Roger Webber, formerly London School of Hygiene and Tropical Medicine, UK

This well-established textbook provides a comprehensive account of diseases and their transmission, covering epidemiology, control strategies, notifications and regulations. Reviewing the major diseases established, new, and emerging, this new edition includes updates on human endogenous viruses, zika, monkeypox, vaccination, melioidosis and more.

Nov 2019 | PB | 9781786395245 | 392pp
£39.99 | €50 | $55

Lyme Disease
An Evidence-based Approach
2nd Edition
Edited by John J Halperin, Overlook Medical Center, USA

This new, full colour edition covers the rapid advances made in our understanding of the pathogen and disease. It explores the causative organism, its ecosystem, disease epidemiology, host- Borrelia interactions, diagnostic testing, clinical manifestations, therapeutic options, host immunity and pathogenesis, and prognosis.

Aug 2018 | HB | 9781786392077 | 298pp
£95 | €125 | $160

Disease Selection
The Way Disease Changed the World
Roger Webber, formerly London School of Hygiene and Tropical Medicine, UK

Diseases have played a major role in making us human and probably determine the way we run our lives. History is full of the great epidemics of plague, smallpox and anthrax, but we survived because of our genetic variation and immune system. Disease continues to have a profound effect, setting the course of the world just as much as nature has.

Oct 2015 | PB | 9781780646831 | 192pp
£13.99 | €18 | $20.95

Biological and Environmental Control of Disease Vectors
Edited by Mary Cameron, London School of Hygiene and Tropical Medicine, UK, Lena Lorenz, London School of Hygiene and Tropical Medicine, UK

Covering the theory and practice of non-insecticidal control of insect vectors of human disease, this book provides an overview of methods including the use of botanical biocides and insect-derived semiochemicals, with an overall focus on integrated vector management strategies.

May 2013 | HB | 9781845939861 | 224pp
£99.90 | €127.20 | $187.95

Pandemic Influenza
2nd Edition
Edited by Jonathan Van-Tam, Deputy Chief Medical Officer, UK, Chloe Sellwood, NHS England and University of Nottingham, UK

Comprehensively updated to incorporate major lessons from the 2009/10 pandemic, this accessible new edition includes new contributions from global experts on surveillance, the International Health Regulations, clinical management and local health service responses, illustrated with vibrant international case studies.

Dec 2012 | PB | 9781845938574 | 264pp
£44.30 | €60.45 | $82.90
Dec 2012 | HB | 9781845938567 | 264pp
£99.90 | €127.20 | $187.95

Dogs, Zoonoses and Public Health
2nd Edition
Edited by Calum N L Macpherson, Windward Islands Research and Education, Grenada, François-Xavier Meslin, World Health Organization, Switzerland, Alexander I Wandeler, OIE Reference Laboratory for Rabies, WHO Collaborating Centre, Ontario, Canada

This edition covers the viruses, bacteria and protozoan and helminth parasites that are transmitted between man and dogs, discussing population management, control disease agents and human-dog relationships. It also includes new chapters on the benefits of human-dog relationship and non-infectious disease issues with dogs.

Dec 2012 | HB | 9781845938352 | 288pp
£110.20 | €143.15 | $210.05

Global Health Archive

Access over 800,000 records on public health from out-of-print journals dating back to 1910.

Global Health Archive is fully compatible with Global Health and can be searched alongside it for records from 1910 to the present day. Together they provide a global picture of international public health research both past and present.

Advances in Molecular and Cellular Microbiology series

Meningitis
Cellular and Molecular Basis
Edited by Myron Christodoulides, University of Southampton Medical School, UK
Examining meningitis mainly from a bacterial perspective, but also including an overview of viral, fungal and chronic meningitis, this book describes the anatomy of the meninges and clinical signs and symptoms of meningitis.

Aug 2013 | HB | 9781780641621 | 280pp
£99.90 | €127.20 | $187.95

The Human Microbiota and Microbiome
Edited by Julian R Marchesi, Cardiff University, UK
This book provides a research-level review of the current understanding of human microbiomes, functions they bring to the host, how we can model them, their role in health and disease, and exploration methods. It also covers current, hot-topic research in areas such as the long-term effects of antibiotics.

Oct 2019 | PB | 9781786395320 | 208pp
£45 | €55 | $65

May 2014 | HB | 9781780640495 | 208pp
£89.99 | €117 | $170.95

**Tuberculosis**
*Laboratory Diagnosis and Treatment Strategies*
Edited by **Timothy D McHugh**, University College London, UK

Tuberculosis is a global health threat and this book features contributions from a range of experts that captures the latest developments in the advent of bacteriological, immunological and molecular tools for diagnosis and the development of new drugs.

**Bacteriological, Immunological and Molecular Tools for Tuberculosis**

Fasciolosis
2nd Edition
Edited by John P Dalton, National University of Ireland Galway, Ireland

Fasciolosis is a major infection of livestock, causing huge losses to the agricultural community and affecting human health. This fully updated new edition covers parasite biology and development, immunology, diagnosis, vaccines, and emergence of drug resistance, as well as new advances in genomics, transcriptomics, proteomics and glycomics.

Dec 2021 | HB | 9781789246162 | 464pp
£165 | €200 | $225

Metabolomics and Systems Biology in Human Health and Medicine
Edited by Oliver A.H. Jones, RMIT University, Australia

This book provides an introduction to medical metabolomics and systems biology, and demonstrates how they have been applied to studies in medicine and human health, including nutrition and pathogenic microorganisms. Focusing on diagnosis, pathology and aetiology of disease, it provides a reference in how to use metabolomics for medical research.

Oct 2019 | PB | 9781786395429 | 206pp
£45 | €55 | $65

Climate, Ticks and Disease
Edited by Pat Nuttall, University of Oxford, UK

This book brings together expert opinions from scientists to consider the evidence for climate change and its impacts on ticks and tick-borne infections, and provide predictions for the future.

Nov 2021 | HB | 9781789249637 | 200pp
£85 | €100 | $115

555 Questions in Veterinary and Tropical Parasitology
Hany Elsheikha, University of Nottingham, UK, Xing-Quan Zhu, Lanzhou Veterinary Research Institute, Chinese Academy of Agricultural Sciences, China

This book covers the most highly important and the most neglected parasites in a concise manner, with questions on parasite biology, epidemiology, diagnostics and management, all in relation to animal health. Designed to help you study anywhere, with any amount of time, 555 questions test your parasite knowledge!

Oct 2019 | PB | 9781789242348 | 128pp
£19.99 | €24.99 | $27.99

The Handbook of Microbial Metabolism of Amino Acids
Edited by J P F D’Mello, formerly Scottish Agricultural College, UK
This book collates and reviews recent advances in the microbial metabolism of amino acids, emphasizing diversity - in terms of the range of organisms under investigation and their natural ecology - and the unique features of amino acid metabolism in bacteria, yeasts, fungi, protozoa and nematodes.

Apr 2017 | HB | 9781780647234 | 544pp
£200 | €262.50 | $329.50

Ticks and Tick-borne Diseases
Geographical Distribution and Control Strategies in the Euro-Asia Region
Edited by Mo Salman, Colorado State University, USA, Jordi Tarrés-Call, European Food Safety Agency, Italy
This book is an expansion of the EFSA report on the subject, and details the significance of tick-borne diseases, identification of tick species, emerging tick-borne infections, factors influencing the spread and distribution of ticks and surveillance and control measures.

Dec 2012 | HB | 9781845938536 | 320pp
£110.20 | €143.15 | $210.05

The Handbook of Microbial Bioresources
Edited by Vijai Kumar Gupta, Tallinn University of Technology, Estonia, Gauri Dutt Sharma, Bilaspur University, India, Maria G Tuohy, National University of Ireland Galway, Ireland, Rajeeva Gaur, Dr. RML Avadh University, India
This book provides a detailed compendium of the methods, biotechnological routes, and processes used to investigate microbial applications. It covers the applied aspects of microorganisms in the health, industry and environmental sectors.

Jun 2016 | HB | 9781780645216 | 720pp
£206 | €270.40 | $339.40

Beneficial Microorganisms in Agriculture, Food and the Environment
Safety Assessment and Regulation
Edited by Ingvar Sundh, Swedish University of Agricultural Sciences, Sweden, Andrea Wilcks, Danish Working Environment Authority, Denmark, Mark S Goettel, formerly Agriculture and Agri-Food Canada, Lethbridge, Canada
This book provides an overview of the available methodology for safety assessments of microorganisms. Also covered are the regulatory systems in risk assessment and management of microbial products, quarantine legislations, international treaties, the importance of public risk perception and risk reduction behaviour.

Nov 2012 | HB | 9781845938109 | 360pp
£110.20 | €143.15 | $210.05
