

# Internship Positions in Biological Control

**CABI** in Delémont, Switzerland is offering BSc or MSc students in Biology, Ecology, Agronomy or related fields a unique opportunity to gain experience in biological weed and insect control. The Centre is located about 40 km south of Basel in the Swiss Jura. Students with a background in entomology will be preferred.

The work involves host-specificity testing of potential biological control agents, insect collections and rearing, studies on life history, impact experiments, and investigations on pest population biology and parasitoid host interactions.

**Time period:** min. 1 – max. 7 months  
starting between April and June

**Salary:** 2000 CHF per month for students  
with, or still completing a BSc

2500 CHF per month for students  
with, or still completing an MSc
